The local barber, F. P. Geary, who rarely took a vacation during the thirty-three years he has followed his trade in Centre Hall, did so during last week, when he autored to Steubenville, Ohio, where he remained for a few days. The barber is afflicted with an almost incurable "disease," that all of us know can be successfully treated nowhere else than in the Ohio Valley Hospital, in Steubenville. While in that Ohio industrial city, Mr. Geary, in company with several others, among whom was Miss Nellie Smith, superintendent of the hospital named, made tours into West Virginia's capital and other points. The vacation, the barber is convinced, was like a real vacation should be.

NEW DAIRY FEED BEING DISPLAYED BY BRADFORD & CO.

Considerable interest among dairy farmers is being shown in a new dairy feed just out and now on display at Bradford & Company, known as Body Cow Chow. It is made particularly to fit local pasture conditions and fills a vital feeding need, according to Bradford & Company.

"There are two ways of making liberal quantities of milk on pasture," they say. It can be made with grass, and feed or with grass and cow flesh. As every man who keeps cows knows, there's nothing like green grass to stimulate a heavy milk flow. At the same time there's no getting around the fact that pasture over-stimulates milk production early in the season, and invariably leads to a falling off in flesh and milk later on. This always means an extra feeding cost to build the herd back to normal in weight and production.

"Two, pasture forces a cow to put out a great deal more than she takes in. This is especially true of bone building calcium, phosphorus, and the other things needed to keep the cow in healthy condition. And there is an over-laxative condition in grass that must be controlled.

"To take care of all these factors," Bradford & Company says, "a pasture balancing feed was recently announced by Purina Mills and we have it in stock. Purina Body Cow Chow it is called and it's built to go exclusively with green pasture."

**CHEVROLET**  
WHY do you suppose Chevrolet keeps repeating, in all of its advertising, "Drive it only 5 miles"? Very frankly, here's the reason: Chevrolet engineers have tried out all the various makes of cars in today's low-price field. They have compared performance—on rough roads, in traffic, over hills, through sand and mud and water! And they have proved, to their complete satisfaction, the same things that hundreds of thousands of Chevrolet owners are proving in their daily driving. The Chevrolet ride simply can't be matched by any other in the low-price field. That's why we urge you to "Drive it only 5 miles"—and that's why we promise, "you'll never be satisfied with any other low-priced car."
