

SUCH IS LIFE—Too Much Curiosity

By Charles Sughrue

Plan to Protect Arctic Musk Oxen

Valuable Animal Is Threatened With Extinction.

Washington.—The recent birth of two musk oxen in Alaska, the first in a century, may be the beginning of a New Deal for this remarkable animal, which has been threatened with extermination by Eskimos, Indians, explorers and hunters.

"Beyond the tree limit, on bleak, treeless tundras, deserted by man and most animals, lives the musk ox—one animal that thrives in blizzards," says a National Geographic society bulletin.

"Over the frozen prairies of the Barren Grounds, where no Indians dwell, and across vast expanses too cold for Eskimos, the musk ox plods through the darkness and whispering silence of the Arctic night, cropping frozen grass that sticks up through thin snow. Pausing occasionally to rub frost from its eyes, grazing contentedly as a cow in a sunny pasture, the musk ox wanders from the Barren Grounds to Cape Morris Jesup, where the northernmost point of land meets the glittering ice of the polar sea. Under the musk ox's shaggy dark coat, protecting him from bitter winds, is a dense coat of wool.

Sheds Winter Suit.

"In the Arctic summer the musk ox sheds its unnecessary wool.

"To those familiar with the protective coloration of Arctic animals—the silvery-white polar bear, snowy wolves and owls—the dark brown coat of the musk ox seem to afford no protection.

Back With Giants

Phil Weintraub, a Jewish lad, who measures 6 feet 1 inch in his stocking-feet and weighs 185 pounds, has been called back by the New York Giants, with whom he made a rather unfavorable appearance some time ago. Now he is fielding and batting with the best of them.

SHOCKING ANIMALS!
ANIMALS ARE FAR MORE SENSITIVE TO ELECTRIC SHOCK THAN HUMANS, 20 VOLTS BEING DANGEROUS TO CATTLE AND HORSES.

FLY FISHING—
TROUT FISHING WITH DRY FLIES MADE OF CELLOPHANE IS VERY SUCCESSFUL.

RAY'S FOR BABY—
A NEW BABY CARRIAGE HAS A GLASS HOOD WHICH LETS THROUGH ULTRA-VIOLET RAYS BUT KEEPS OUT INFRARED RAYS.

OUR REAL NEED

By LEONARD A. BARRETT

A writer on economics is quoted as having said, "What the people of this country really want is not spiritual resources but material values." Perhaps so; but it is rather a sweeping statement to affirm that material resources in the place of spiritual values is the desire of all persons. Of course many persons, perhaps the majority, earnestly desire the elimination of poverty, less hours of work which means more leisure, and the assurance of dividends. "A condition devoutly to be wished"—someone says, and what's wrong with it?

Granted that to every family in this country there shall be guaranteed the security of home, plenty of work, and a reasonable pension for old age. Would they be any better off? The materialist, who sees no farther than values expressed in houses and lands,

Prettiest of All

Frances Jean Lupe, three years old, won the title of Illinois' most beautiful baby, in a contest held at the World's fair in Chicago.

unhesitatingly replies, "we would be a great deal better off." The idealist, who looks beyond material values, replies with equal emphasis in the negative. He reminds us that we would doubtless be just as self-indulgent and greedy; perhaps more so. Surely we would be just as sensual and mean. In other words the conditions which brought on the depression would still exist and, perhaps, in a more intensive form. Instead of conditions improving they would become much worse.

"Man shall not live by bread alone." Nations as well as individuals who have attempted to build the superstructure of their life's ambitions upon no more permanent foundation than the desire for "bread" soon discovered that the tower of their best efforts fell, much like the Babel tower of old.

No—the writer on economics is wrong. What this country needs most of all is a resurgence of spiritual power which will rebuild character and make permanent such values as education, culture, home and government. What this country of ours needs is an attitude toward life which not only belittles sensuality and greed but also eliminates self-indulgence and false pride.

The question still remains—Are we going to learn anything worth while from the experience of the past four years, or, are we anticipating the return of another prosperous period in order that we may again repeat the same mistakes and be plunged farther than ever in the gulf of despair?

Trout Encircled
by Rubber Washer
Salida, Colo.—D. J. Dewland landed a "rubber-tired" fish near here. It was a 6-inch rainbow trout. About its body was embedded a 1/4-inch rubber washer. The rubber had apparently been around the fish for some time, as it had sunk deep into the fish's flesh just in front of the fins.

The Household

By Lydia Le Baron Walker

BLUE is a color which can be used in decoration, with reservations, it is true, since it is so cold a color, but it is not alone in decoration that it is valuable. The quality of the color makes it particularly suited to certain practical purposes. It has a tendency to preserve the whiteness of articles kept next to or surrounded by it. This is a fact that was recognized by old-time homemakers, but which seems to have been somewhat overlooked by women of today. Just now there is a return to this color for practical uses.

Use blue tissue paper to wrap around laces to prevent them turning creamy white instead of their original pure white, or dead white as the untinged color is called. What is known as sky blue or baby blue is the preferred hue of blue for this purpose. Linens that are laid away, either as heirlooms, or awaiting the return of the style of the particular pieces, such as large white damask tablecloths will not be nearly so apt to get the creamy tint if wrapped around in blue paper.

For Lounging

The material which fashions these modish lounging pajama outfits is a dull-luster chardonize. The color scheme for the attractive model to the left is burnt orange trimmed with cream color. The other girlish pajama costume is in a soft shade of peach banded with blue, having a bib effect at the front neckline, of ecru lace applique. This young lady is refreshing herself with an eau de Cologne perfumed with an fil de l'eau, which happens to be her particular choice from among a half-dozen or so odors available. She is using one of the new-type atomizers which is of the automatic bulbless sort which eliminates the old-fashioned cord and bulb.

About Tablecloths.

The history of tablecloths is a subject to interest every homemaker who delights in knowing about her household furnishings as well as in using them. Today there is a pronounced trend toward the return of dinner tablecloths of pure white linen as well as those of lace and colored linens. This makes the subject of tablecloths especially timely. The cloths with the napkins are termed napery. While in

Blue-Paper-Lined Boxes.

White ribbons and silk pieces are also benefited by being kept in blue-paper-lined pasteboard boxes. When white shawls were in fashion, the women of that day were punctilious to keep them folded in light blue paper, and placed in pasteboard boxes where there would be no pressure on the folded beauty of the choice shawls.

White Paper-Lined Boxes.

Today the fashion for using blue to keep white silks and laces, linens and fine white textiles, from changing color has taken a new turn, or we may say has reverted to a very old-time method. Then inside surfaces of bureau drawers are being painted blue. Whatever the white contents, its whiteness will be helped to keep its right tint by the action of the blue on the goods.

Here is Dr. Vance Murray, the "flying doctor of the North," recently appointed medical director for the Alaskan Indian territory. He plans to make his rounds of a vast region of the Arctic by plane, thus eliminating the traditional dog sled. The plane, especially equipped for northern flying weather, was landed by Doctor Murray on the newly leveled army landing field at Juneau.

EXPERT SUMS UP FORMIDABLE LIST OF EYE DEFECTS

Many a driver who sees clearly, so far as he is aware, and who pays attention to the road still finds driving a car hazardous business. Such a man will be interested in what Dr. Alvah R. Lauer, of Iowa State college, says about the physical shortcomings of apparently normal people.

Clarity of vision is merely one of the qualities of normal eyesight. A secondary quality is width of the field of vision. Normally, a person looking straight ahead detects the presence of a car when it pulls up beside him, but some do not become aware of it until it moves ahead. Extreme sufferers from narrow vision are said to possess tunnel vision, but many persons have less than the normal field of 185 to 195 degrees and do not suspect the fact.

Depth of vision also is necessary to safe driving. This means that the man behind the wheel must not only be able to see a car in the road but must be aware of whether it is traveling with him, standing still, or coming toward him, and approximately how fast. Depth perception is linked with another point, eye dominance. Many people who get headaches when they are tired do so because they are seeing out of only one eye, although they do not know it. Two eyes are needed for three-dimensional sight.

Color blindness is a common and widely recognized fault. Another thing needed for safe driving is strength in the hands for emergency use; there must also be the ability to judge speed of movement, and the right amount of awareness to sudden noise. All these and many other abilities are part of every person's makeup in varying degrees. We recognize them by saying a driver is alert, or capable, observant, quick, cool, but seldom think to discover which particular combinations of perception and nervous control produce these desirable qualities. It goes without saying, however, that a driver who recognizes his deficiencies can take steps to compensate for them.—Detroit Free Press.

Cloudy Weather

Jones—Why do you let your wife rule the house?
Smith—Because if I didn't let her reign she'd storm.

MURINE
FOR YOUR EYES
Quick, Safe Relief For Eyes Irritated By Exposure To Sun, Wind and Dust At All Drug Stores

For Burns, Scalds, Cuts, Red, Rough Hands
Cuticura Ointment
Is soothing and healing. A box should be at hand in every household.

Flying Doctor of the Far North
Here is Dr. Vance Murray, the "flying doctor of the North," recently appointed medical director for the Alaskan Indian territory. He plans to make his rounds of a vast region of the Arctic by plane, thus eliminating the traditional dog sled. The plane, especially equipped for northern flying weather, was landed by Doctor Murray on the newly leveled army landing field at Juneau.

PARKER'S HAIR BALSAM
Removes Dandruff, Stops Itchy Scalp, Imparts Color and Beauty to Gray and Faded Hair. No more blades to buy. Exclusive territory, permanent position on commission to start, salary when qualified. Almar, 2231 24th St., Astoria, N.Y.

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balsam. Makes the hair soft and fluffy, 60 cents by mail or at drugists. Hiseox Chemical Works, Patchogue, N.Y.

NO MORE WORMS "DEAD SHOT"
Dr. Peery's Vermifuge kills and expels Worms and Tapeworm in a few hours. Good for grown-ups, too. One dose does the trick.
