By Charles Sughroe BUTTONS BESTOW SMARTNESS HERE

PATTERN 9176

Buttons emphasize every smart detail of this unusual dress with such slender lines. See the way they follow the surplice from the right shoulder, close it at the side, and strut half the way up the forearm of the sleeve. Tiny vertical tucks are used to mold the waistline at the back, giving extra ease to the bodice. Then, too, stitched seaming down the front of the skirt seems to take away inches from the hips. The irregular neckline is softened by a most becoming scarf. This design would be charming in black satin with a scarf of the queerly named, but very love-

dirty pink color, or metal cloth. Pattern 9176 may be ordered only in sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 requires 3% yards 39 inch fabric and 1/2 yard contrasting

Complete, diagrammed sew chart included.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth Street, New York, N. Y.

A Handsome Corner Treatment in Antiques. The French Chair Has No Central Back Support and Should Be Handled as Described for Hepplewhite Chairs.

FURNITURE has to be treated with | One hand should be about or under a certain respect for its infirmities. These may be due to the fact that it is old and has not had proper care, or because it is not of fine craftsmanship, whatever its age, old or new. In every home, not entirely furnished with new pieces, there are certain articles which require kindly care. When it is possible, the pieces should be restored as nearly as they can be to their original state. However, it may be that the cost of doing over the article may be more than can be afforded at the time, or that, even after being out in excellent repair the piece may be rather fragile because of its delicate shape or slender construction.

Genuine antiques frequently must have the consideration due after many many years of active service.

Positioning Furniture. Two of the most important factors in this kindly treatment are the placing of pieces where they will not get the brunt of hard and continual usage, and where they will not need constant shifting. A chair, for example, should be so positioned that it will not be the first to be sat on and where it will be' in more continual use, probably, than in any other position. Also it is likely to be pushed back and forth more often than if it were in a less

of furniture unless it is moved with special caution. When a chair is heavy as an arm chair is apt to be, it is hard on it to be shifted about. It is not easy to move and it seems actually to balk. But its difficulty of easy manipulation is its protection. So place the chair in some pleasant corner where it will escape frequent moving, and will be enjoyed by those who have time to rest in its kindly embrace.

prominent place. This wracks the joints

the seat. Nor should these backs be suddenly leaned against. Hepplewhite chairs are cherished for their exquisite beauty rather than their durability. This is true of other choice chairs,

especially in French furniture. Tables should not be expected to bear more weight than their size and build invite. Drop-leaf tables should be shut only after their supports have been properly positioned. The hingeswill give without this precaution. Then the leaves will not fit closely when the table is open and they will have a ency to sag when down,

Government Agency Answers Questions

On by Many for Aid.

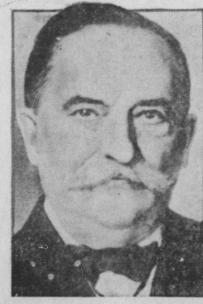

Washington.-Established by the national emergency council in March to assist Washington visitors to thread the maze of federal agencies and emergency units, the United States information service now answers questions from far and near. Whereas previously, inquirers resorted to the trial and error method, addressing queries to a particular department, they now have at hand an information "central" in close touch with every department, burean, commission or other federal

agency, says the New York Times. Directed by Miss Harriet M. Root, a graduate of Wellesley, a dozen expert research workers, all women, answer the queries which come in by personal call, by telephone and by letter. Not infrequently one day's mail will bring in 400 letters-each carrying one or more questions. On a busy day, as many as 200 persons have called at Miss Root's office seeking general information, or assistance in contacting some federal

Cover Wide Range.

The queries cover an encyclopedic range. A New Jersey woman, for example, having what she believed to be ambergris in her possession, asked where she could find out whether it was genuine. Her question was referred to the bureau of fisheries. Requests for information on divining rods and buried treasures go to the bureau of mines. A lawyer in New York asked for a list of all federal corporations since the establishment of the United States government-a request that necessitated considerable research. Another letter called for "anything you

, He's Still Mayor

For fully one-third of a century Charles S. Ashley, seventy-six years old, has been mayor of New Best ord, Mass., setting what is believed to be a record. He has been elected for his twenty-seventh term, winning in a close three-cornered race.

Information Service Called can find on capital and labor." In due course, a reply furnished references to

government publications on the subject. "Does a bullet from a high-powered rifle actually change its course when entering water? If it does, why? And in what direction?" inquired another correspondent. Here, obviously, was an opportunity for government ballistic experts, to whom the query was forwarded. From a small town came a request for a check on the source of certain statements carried in an article in a local newspaper. And a woman with potatoes to sell sought the help of the service in finding the best market for them.

Many Personal Questions.

Personal questions are numerous. The widow of a naval man who was lost when a ship went down in the war wanted guidance in preparing a claim for compensation from the government. Another inquirer sought directions on how to obtain a medal for a child who had saved a playmate from drowning. A father asked how he should go about finding for his son a billet in the merchant marine. And whenever former Secretary of War Newton D. Baker comes to town, the information service invariably receives one or more calls for his Washington

Requests for information on federal activities reflect the increased interest in public affairs, particularly in the work of the New Deal agencies. The national emergency council publishes a daily manual, covering changes in the federal setup, and also charts showing graphically the present federal organization. Both the manual and the charts are in great demand. Universities and schools and faculty members send many requests. A California college plans to use the NEC manual as a textbook; a professor in a midwestern university ordered 300 copies of the chart of the federal government.
