YOUR EYES NEED GOOD LIGHTING

... And Now Good Lighting  
Will Cost Less Than Ever!

ANYONE who reads at all consistently reads as many as a million words a year—mostly under artificial light.

Our habits have so changed within the last generation that we hardly realize the added burden placed upon our eyes.

Lighting experts say we should have good general illumination . . . and abundant light on the object where the eyes are steadily focused.

Lights should be so placed, so diffused, that eyes are never troubled by the glare of bare bulbs.

Check your home lighting! We will gladly furnish a Sightmeter for this purpose . . . and make specific lighting suggestions. Better Light means Better Sight.
