

### Spring Mills

A Collection of Newsy Happenings and Personals from Gregg Township's Metropolis.

William A. Neese, who Saturday morning a week sustained a severe injury to one of his knees, was taken to the Centre County hospital Tuesday following, where an x-ray picture was made. The picture indicated the knee cap to be split, the muscles drawing the upper and lower sections in opposite directions, so that nature could not unite them. Mr. Neese was brought to his home the same day, but later returned to the hospital where he is now a patient. During the latter part of the week an operation was performed by Dr. Adams, which included placing the limb in a plaster Paris cast. The hospital reports his condition as very favorable, all of which is good news to his many friends in and about Spring Mills.

The "shoot" held by the Spring Mills Fish and Game Association last Friday night was one of the most successful of any during this winter. Among the best shots were Jacob Sharer, Thomas Kerstetter, G. G. Neff, Daniel Daup, Jr., Rev. D. R. Keemer, Eugene Stover and "Buzz" Bierly. This coming Friday night the Future Farmers of America will stage a shoot in the Rossman building. They have the promise of a number of crack shots attending the affair.

It is hard to believe, but evidently true, that Fred Auman, who makes his home with Ezra Harter, refuses to open the envelope which contains, or at least is thought to contain, an old-age pension check. Mr. Auman gives no reason for his refusal to extract the check, but he just doesn't do so. His attitude in this respect will be hard to match anywhere in the State. A delay of sixty days on the part of the pensioner will oblige him to make application for a second check for the first month's pay.

Albert Lingle, who is engaged in hauling timber, etc., with a large truck, is suffering from an infection on the hand. The trouble began after he opened a blood blister, the result of a pinch. During the beginning of the week pain began subsiding.

Miss Delcey Morris unexpectedly came here for the week-end from Doylestown and was a guest of her foster mother, Mrs. C. A. Kraspe.

Former "Squire" E. T. Jamison, a Centre County hospital patient, was reported slightly improved during the beginning of the week. His son, Miller Jamison, and wife, returned to their home at Conestoga, Crawford county.

Mr. and Mrs. Blaine Hittner visited W. A. Neese and E. T. Jamison, who are patients in the Centre County hospital, and report both of them improving. Rachael Foust, of Potters Mills, was another patient the couple called to see.

### NOTICE TO DELINQUENT TAXPAYERS.

Notice is hereby given that all unpaid taxes are to be returned to the County Commissioners by the first of May. This procedure automatically places a lien on your property. Would suggest that delinquent taxpayers pay on the installment plan if not convenient to pay in full, and make the final payment before the above date, if possible, to avoid additional penalty of 1/2% a month at the Treasurer's office.—S. Thomas Swartz, Collector for Potter Township.

### FARM CALENDAR.

Timely Reminders from Pennsylvania State College School of Agriculture

VENTILATE POULTRY HOUSE—Air currents should flow through the part of the poultry house where the moisture is most prevalent, which usually is on the floor. The walls and ceiling generally do not get wet until the floor and litter are quite damp. If the floor can be kept dry there usually is no trouble with the ceiling.

KNOW COWS RECORD—All cows in the dairy herd should be treated as individuals. Milk records on every cow should be carefully studied and checked. The best cows should be retained and the low producers moved out at the first opportunity.

BALANCE THE DIET—Scientific authorities say that the best diet for the normal human being includes a certain variety of the common foods and that poor diets are poor not because of what they contain but because of what they lack.

GOOD SOIL NEEDED—Properly prepared soil for growing early plants in hotbeds and flats is essential. This soil may be prepared the previous season by composting. The soil should contain one-third to one-half organic matter.

SPRAY TREES CAREFULLY—Care in the application of insecticides during the dormant period of apple trees is emphasized by extension entomologists of Penn State. They urge growers to read carefully the spraying information as these will contain variations from the standard practice as indicated by insect conditions.

LEARN ABOUT STRAWBERRIES—Thirty-seven strawberry variety demonstrations conducted by extension workers the past two years gave helpful information on yield, quality, time of maturity, and length of picking season.

WHERE TO PLANT—Tall shrubs can be used to emphasize certain important points such as entrances and corners of the house.
