The game is looked forward to with much interest by the ball fans in this community and their anticipation of a few hours sport on the new diamond on the Vocational school athletic field will not be a disappointment. You will also please remember that a festival by the local ball club will be on at the same time. Make it a point to be not only present, but to lend your patronage.

The Sheffield Farms milk plant is a busy place these mornings, since its great increase of milk producers who patronize it following the closing of a plant nearby. A number of men have been engaged during the past week installing a more efficient brine and water cooler which is utilized in cooling the daily supply of milk received every morning preparatory to pumping it into the massive thermo container.

W. F. MacMorrin, former manager of the Sheffield plant at Centre Hall, has been transferred to the plant here and is now its manager. He has had large experience in the work and will no doubt be able to please his employees and be acceptable to the large number of producers with whom he will contact every morning.

There is considerable discussion among residents of this community as well as by the workers in the Groce Silk Mill relative to the new scale of wages and hours of employment. Both the wage and hour scales have been quoted with much lack of uniformity that your correspondent is unable to give a correct statement of them. One thing, however, is certain.

Since the Blue Eagle was slaughtered by the Supreme Court, wages have also been slaughtered and hours lengthened. Mr. Robinson, the manager of the mill, is invited to give the public the schedule of wages and

hours now in force and compare them with wages and hours prevailing under the Blue Eagle. This column is open for such a statement.

It is stated on good authority that the long threatened measure to combine the two rural mail routes into one will be put into force in the near future. When this is done J. A. Wagner, long in service as a rural mail carrier, will be retired. He has attained the age for retirement as well as time of service. He will receive a pension based on the salary received while in service.

The route covered by Mr. Wagner will be served by Blaine Bitner, and this in addition to the route he now serves. The combining of routes is being adopted in all sections where feasible as a measure of economy.
