\$1,000 IN COLD CASH NINETEEN years old last week and this boy—hardly a man—has \$1,000 in bank. Years ago he began with a small savings account. By working during odd hours he managed to build up a substantial account. AND altogether apart from the money value is the character value attached to this account. For knowledge of what a boy can do with money is the foundation for banking credit for the man. The FIRST NATIONAL BANK CENTRE HALL, PA.

YOU DON'T HAVE TO "BREAK IN" THE FORD V-8 You can drive it 50 miles an hour the day you buy it THE FORD V-8 is ready for normal driving when you buy it. There is no tedious period of breaking-in for 500 or 1000 miles. You can drive it up to 50 miles an hour the first day. And after the first hundred miles you can drive it as fast as you desire. That means greater motoring enjoyment for every motorist. It is especially important to motorists who are thinking about a new car for a vacation trip—to physicians, salesmen and all those who use a car for business. Instead of dragging along at slow speeds for days, you can make good time from the start. The reason for this is as important as the result. The Ford V-8 needs no breaking-in because of unusual accuracy in the manufacture of moving parts and the smoothness of bearing surfaces. Clearances are correct when you buy the car. It is not necessary to depend on a long wearing-in period to eliminate tightness and insure smooth running. Longer life, greater economy and better performance are bound to result from such precision methods. The Ford V-8 gives you fine-car construction, along with fine-car performance, comfort, safety and beauty. FORD V-8
