

Spring Mills

A Collection of Newsy Happenings and Personals from Gregg Township's Metropolis.

Democrats Meet—One of, or probably the largest, and most enthusiastic, assembly of Democrats held in many years was staged Thursday night of last week. The gathering had all the appearance and spirit found at Gregg township political gatherings during National campaigns when political conditions were such that all believed a complete victory over every foe would be realized on election day. That is the belief today, consequently reverting to such a spirit was natural. The meeting was held in the Grange hall and was presided over by former Sheriff A. B. Lee. The speakers devoted their remarks to affairs in Centre county, leaving for the moment the splendid opportunities to enthrone by recalling the benefits an agricultural community like this was receiving at this very moment, the aids offered to finance the farm, including the taking of the squeeze out of the farm mortgage. Neither was the Earle State administration dwelt on to any extent but the points developed applied to the necessity of electing men to office in Centre county who had the good common sense and unerring judgment found in the candidates on the Democratic ticket. Each of the candidates was represented to stand four-square on the policies of our Democratic President and Democratic Governor, and that each candidate was working not only to secure the election of himself but all the Democratic aspirants—a condition not always found in times past.

All the candidates were present and before and after the meeting devoted themselves to furthering their personal interests and the interest of their fellows on the ticket.

The leaders the chairman induced to talk included Senator Thompson, Mrs. Merrell, Dr. F. K. White, Mrs. Ebon Bower, Claude S. Herr, Henry Brockerhoff, C. A. Walker, and Representative John W. Decker.

More than sixty years ago and for a long time since public school teachers taught that the geographical center of Pennsylvania was in Gregg township, somewhere near Spring Mills but recent declarations by the Department of Internal Affairs takes that distinction from this township and places it in Spring township at a point near the fish hatchery.

Miss Mayme Gentzel has returned to her home in York after spending some time with relatives here.

Mr. and Mrs. William Johnson, of Philadelphia, are the proud parents of a son born on Sunday, October 20th. The mother is a daughter of Mr. and Mrs. Bright Bitner, Spring Mills. The new arrival came as a birthday present on the maternal side of the grandparents, since he came on the birthday of Mrs. Bitner. This is the second child born to the couple, the first having been a girl.

The Spring Mills band will again stage a Halloween parade to which residents in the community are invited to participate. The time is Thursday evening, 31st. A large list of prizes will be offered, assuming the business men in Spring Mills rise to the same height of enthusiasm attained during the past few years. It is said the parade will be found to contain some unusual Halloween funmakers and that the costumes will be more elaborate than at any previous time. Hold the date open for Halloween.

On Thursday, November 7, the Spring Mills baseball club will hold a bingo party in the Vocational school gymnasium. More definite information will appear later.

W. F. MacMoran, wife and young daughter are now located in the home they recently purchased from J. C. Lee, having come here Thursday from Centre Hall. Mr. MacMoran is manager of the Sheffield Farms company milk plant here.

The Vocational school soccer team is well on the way to snatch the championship of the Eastern division. Mr. and Mrs. Harold E. Stover and family visited the former's sister Mrs. John Hoy, in Bellefonte, on Sunday.

THE NEW FORD V-8 FOR 1936

Why do we say The New Ford V-8 for 1936?

What is new about it?

Of course, the newest engine in the low-price car field is still the V-8 engine. Since Ford made it available to all car users (keeping it as economical as cars with fewer cylinders) the Ford V-8 has been the newest engine on the market, and remains the newest for 1936.

You may buy a car on minor "talking points"—some specially advertised feature "with the car thrown in"—but after all, it is the engine you buy when you buy a car. Hence we put the engine first.

Other new points about the car make a long list.

Its lines are much more beautiful. The hood is longer and sweeps forward over the distinctive new radiator grille, giving the car a length and grace that are instantly impressive. The fenders are larger, with a wide flare. Horns are concealed behind circular grilles beneath the headlamps. New steel wheels.

Ford upholstery—always of sterling quality and excellent taste—is rich and enduring. The appointments of the car have a new touch of refinement. There

is no question about the increased beauty of the Ford V-8 for 1936.

In more practical matters, many improvements have been made—

Steering is made easier by a new steering gear ratio. The cooling system circulates 5½ gallons of water through a new, larger radiator. Natural thermosyphon action is assisted by two centrifugal water pumps. New style hood louvers permit a rapid air-flow around the engine.

Easier, quieter shifting of Ford gears—The gear shift lever now travels a shorter distance.

The two qualities you want in brakes—Brakes that stop the car with ease and certainty. Ford Super-Safety Brakes of the long-tested, fool-proof, mechanical design.

Safety—as always—in the electrically welded genuine steel body. Safety Glass all around at no extra cost. Hundreds have written grateful letters because this glass has protected the safety of their families.

A car you can drive without strain all day, if you like, in city or country. Steady, holds the road, responds to the

driver's touch like a well-trained horse. You don't have to "push" or "fight" the Ford V-8—driver and car easily get on terms of good understanding with each other.

An engine has much to do with the roominess of a car. Very much indeed. A long engine uses up car space. The compact V-8 engine permits much of the ordinary engine space to be used by passengers.

It really is a great car in every way, this 1936 Ford V-8—the finest, safest, most dependable Ford car ever built. Now on display by Ford dealers.
