ON OCTOBER 31 of last year, Henry Ford announced his intention to build a million Ford V-8s in 1935. We are pleased to report that this goal was reached in exactly ten months instead of a full year.

One million cars and trucks is an impressive total. But figures by themselves mean nothing. It is what they represent that counts. Selling a V-8 at a low price has brought a new kind of automobile within reach of the people. Producing it has provided steady work for hundreds of thousands of men in the Ford plants, in associated industries and on the farm.

These million Ford V-8 cars and trucks have helped to make things better all around. In the first ten months of 1935 the Ford Motor Company paid out, in the United States alone, \$140,119,326.00 in wages and \$223,111,389.00 for materials.
