Get a glass of water and drop in one or two tablets of Alka-Seltzer The New Pain-Relieving, Alkalizing, Effervescent Tablet Watch it bubble up, then drink it. You will be amazed at the almost instant relief. It is called Alka-Seltzer because it makes a sparkling alkaline drink, and as it contains an analgesic (Acetyl-Salicylate) it first relieves the pain of everyday ailments and then by restoring the alkaline balance corrects the cause when due to excess acid. After trying many brands of medicines—so-called relief for gas, and all of them a failure, gave up hopes. By chance I tried Alka-Seltzer—I am more than satisfied. Geo. Bennett, New York, N. Y.
