APPEAL. For the purpose of correcting any error of appraisement, the County Treasurer and a Mercantile Appraiser will hear all appeals at the Court House, in Beliefonte., Pa., on the 14th day of July, 1926.

HAROLD D. COWHER,
Mercantile Appraise.

## Dog Paddle Was Called

the First Swim Stroke The dog paddle, such as children adopt when left to themselves to learn to swim, was probably the first swimming stroke, says J. W. McVicar, director of physical activities at the Central Y. M. C. A. in Toronto, Can., in the Research Quarterly. Next in the evolution of swimming, he says, came the breast stroke, in imitation of the

So popular was this stroke that in 1865 in London a machine was invented upon which a person could spread himself in the breast-swimming position, placing his hands and feet into loops mechanically arranged on plates so that when the swimmer moved his hands and feet they were guided into the proper movements.

Until the latter part of the Nineteenth century the breast stroke prevailed as the racing stroke. Then the side stroke was adopted for races, followed by the overarm stroke. The trudgeon, first cousin to the crawl, came next. This stroke was named after John Trudgeon, who learned it on a trip to South America.

## "Cave-in-Rock" Was Known as Far Back as in 1744

"Cave-in-Rock" is at the southern tip of Illinois Route No. 1, the Dixle highway. Long before it was known to white men, the Illinois tribes called it the "Habitation of the Great Spirit," says Chicago Daily News.

The first recognition it received by our forefathers was on a map in Charlevoix' "History of New France," published in 1744. At that time the cave was the center of Indian life along the lower Ohio river.

However, as the Indians gradually retired at the advance of the white man, the cave took on a more ominous meaning to the early settlers. It became the rendezvous of robbers who preyed on surrounding settlements and Ohio river traffic. Driven from the cave, the robbers were succeeded by a band of counterfeiters who operated there until cleaned out in 1831. Another band of robbers took up their abode there but their life of crime was short lived, the last of the gang being executed in 1834.

House, Field Mice Differ

House mice which are found in houses and hotels are more cosmopolitan than the same species found in fields in the sense that they present more variations in color, length of tail, size of skull, odor and standardization. according to an authority. Field mice, on the other hand, have a cleaner appearance, their odor is sweeter and more pungent, their skulls appear more blunt, and the specimens smaller, with shorter tails. The difference in odor is due to the vegetable matter field mice eat as compared with meat, cheese and odds and ends the house specimens live on.

American Corn

To Americans corn means but one thing, Indian maize or its improved counterpart, which is native to this country. This is quite different from the meaning of corn in ancient Rome which, according to several Bible passages, refered variously to wheat, barley and other grains. Even today, says Pathfinder Magazine, corn in Scotland usually means oats, and what Americans would refer to as a rye field would be termed corn field in most of northern Europe. Likewise, many Englishmen speak of a head of wheat as an ear of corn.

"The Devil's" Bridge "The Devil's Bridge," over the River Mynach, near Aberstwyth in Wales, was built by the Good Monks, but superstition has long attributed the work to the devil himself, because of the water rushes of the mighty chasm, Near Bowes is the famous God's Bridge, which introduces the massive slabs so characteristic of the medieval bridges in Devonshire, Dartmoor and Exmoor. These are typical of the venerable structures breathing the his-
