

Butterflies of Filet
Crochet Featured

A crochet hook, some string and this simple pattern are all one needs to turn out this lovely patterning of butterflies and flowers—a charming contrast of solid crochet and airy stitch. Get busy on a set!

Pattern 1084 contains directions and charts for making the set shown; illustrations of stitches needed; material requirements; suggestions for a variety of uses. Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Write plainly pattern number, your name and address.

Memorial to Crusoe

The government of Chile has decided to make a national park of Robinson Crusoe's island in the Pacific, Juan Fernandez.

The cave where lived Alexander Selkirk, the original of Robinson Crusoe, the lookout from which he watched for passing ships, and his other associations will now be in the care of keepers, and guides will be available for visitors to the island.

Alexander Selkirk, the son of a Scots shoemaker, ran away to sea and rose to be sailing master in one of Captain Dampier's privateers in the South Seas. In September, 1704, he quarreled with his captain and had himself landed with his effects on the uninhabited island of Juan Fernandez. He lived there till January, 1709, when Captain Wodes Rogers took him on board.

Captain Rogers told his story in a book three years later, and it was mostly from this account that Defoe built up his immortal story for boys.

biliousness, sour stomach, bilious indigestion, flatulence and headache, due to constipation.

EATING HEAVY FOODS
brings on highly acid stomach condition—"morning after" distress. Milnesia, original milk of magnesia in wafer form, quickly relieves distress. Each wafer equals 4 teaspoonfuls milk of magnesia. Crunchy, delicious flavor. 20c, 35c & 60c at druggists.

BRISBANE
THIS WEEK

Choses Vues
Furs, Conscience-Proof
Caterpillars and Weeds
Wise Generosity

An able Frenchman, long since dead, wrote about choses vues—"things seen."

There are still many things to see and to hear, although there is nobody to write about them as that old Frenchman wrote.

At the head of the London Times' "personal column," some one pays to print this impressive extract from the Psalms:

"Seek the strength; seek His face evermore. Remember his marvelous works that He hath done; His wonders, and the judgments of His mouth."

You spend a moment wondering what kind of English man or woman, strong in faith, decided to put that text before statesmen that today seek the "face" of Hitler, Mussolini, Stalin, but forget the greater power of the Creator of those gentlemen.

After that, you read in the same Times this advertisement:

"Furs humanely obtained that can be worn with a clean conscience—full particulars from Maj. C. Van Der Byl, Wappenham, Towcester."

This being an ingenious and doubtless quite sincere appeal to the tender-hearted Englishwoman who does not like to think that the fur around her neck once belonged to an animal that suffered for days and perhaps weeks tortured in a trap.

Possibly the best way to "obtain furs humanely obtained that can be worn with a clear conscience" is to buy and wear some of the innumerable furs, from rugged bears to silky chinchilla, made from the skins of rabbits that are nourished in little hutches in the suburbs of Los Angeles, and fed with "rabbit hay," tender young alfalfa, grown on the Mojave desert, a good deal of it on a ranch owned and operated by this writer.

When you buy furs, no matter what kind, with a rabbit skin foundation, you may be sure that the animal suffered very little, if at all, and when you buy that fur you also buy honest American alfalfa, which is a vegetarian product.

F. C. Cobb wrote from the Boy Scout reservation at Allaire, N. J.:

"The last four week-ends have been spent by our scouts collecting tent caterpillar egg clusters from wild cherry and apple trees along the highways of Monmouth and Ocean counties. Many thousands of egg clusters, each containing on the average 250 eggs, have been destroyed."

No better work could be done by scouts and other boys. It is far better exercise than perfunctory "hikes," often exhausting for smaller boys.

The fathers of the boys, also in need of exercise, can be useful mowing weeds along highways, excellent work for the lungs and for reducing the waist.

Edward S. Harkness, generous young New York financier, gave to Lawrenceville School for Boys a sum that will make possible important new building, plus rebuilding and a more extensive system of small-group instruction, with more teachers.

Mr. Harkness, who does not like publicity, refused to make public the amount of his gift of Lawrenceville, but he gave \$7,000,000 to Exeter academy, \$13,000,000 each to Yale and Harvard, to finance their housing systems. That gives some idea of the size of his gifts.

Some Americans will agree that it is a good thing to have men of unusual ability accumulate wealth wisely.

Old-fashioned Americans would rather encourage such gifts and praise the givers than inculcate the notion that anybody with brains enough to accumulate wealth in this country of opportunity is probably a thief and ought to be in jail.

Mussolini knows how a dictator can keep his hold on the people. He establishes 2,000 government camps where half a million poor children enjoy free vacations at sea and mountain resorts. For nine years Mussolini has carried on this work.

In Europe, English, French, German, Italian or Czechoslovakian will believe anything you say about American crime, and that is hardly surprising.

The heading "Chicago Politician Dies Under Hall of Racketeers' Bullets" surprises nobody. There might be mild surprise if the heading read, "Chicago Politician Dies NOT Die Under Hall of Racketeers' Bullets."

STAR
DUST
Movie • Radio

By VIRGINIA VALE

IRENE DUNN has just returned from Europe with a lot of interesting information regarding the famous Madame Curie, whom she will portray on the screen.

Most of us have thought of the famous scientist as a solemn sort of person, but Irene has discovered that she most decidedly had a lighter side. For example, she was the best dancer in her village, and loved music.

Incidentally, Irene has drawn another plum out of the motion picture pie. One of the three pictures which she is to do for Paramount is "The Count of Luxembourg." Gladys Swarthout seemed to be all set for it, but, although she is beautiful and has a lovely voice, she is not too good in pictures. Her technique seems to be better suited to opera than to the screen.

Marlene Dietrich finally got off to New York and then to Europe, with 19 trunks (she took an extra room on the train for the trunks, so that they'd be handy whenever she wanted to change), various servants and attendants, and her daughter.

Marlene Dietrich

Interviewed on her arrival in New York, she said all the right things—that American women were the most beautiful in the world, that Garbo was her favorite actress, etc. She was dressed in a sheer black frock, and a tiny hat, trimmed, of course, with feathers.

If you love thrills and automobile racing, be sure to see "Speed," with James Stewart and Wendy Barrie. Young Mr. Stewart is climbing fast, perhaps because he's so natural, perhaps because all of us who go to pictures seem to be getting tired of too-handsome men.

As for Wendy Barrie, she is charming. Incidentally, she's been seen around again with the young millionaire whom rumor had her all set to marry when she landed on these shores.

Warren Hull is both resourceful and sensible. His young sons wanted a swimming pool, but Hull is one movie actor who refuses to have a pool (and what with the cost of the pool and the cost of keeping it filled, who can blame him?)

So he did what fathers all over the land have done; had a tank built, seven by nine, that can be filled easily with the garden hose, and now everybody's happy.

Joan Crawford's favorite records are no longer those made by Bing Crosby. She's switched to operatic recordings, and likes to sing along with the soloist.

And as for Bing—"Pennies from Heaven" is his next picture, and he's doing good work in it. His family is all settled in their new home, his horses are settled at his ranch, he's established as a big attraction on the radio—and how's that for a lad who'd never amount to anything, according to the prophets of not so many years ago?

Auto trailers are becoming more and more popular in the movie colony. Twentieth Century-Fox went in for them heavily a while ago—the Jones family used six to get to the location site of "See America First," and during the location scenes of "Ramona" Loretta Young, Kent Taylor and Director Henry lived in them.

Loretta Young

Somebody had the "Ramona" cast worried by arranging for some peacocks to be used in the picture—not that anyone would come right out and admit being superstitious, of course, but they all recalled the fact that peacocks are supposed to bring bad luck.

So—somebody else just "forgot" to bring the peacocks along.

ODDS AND ENDS... Don't blame me if you miss "The Ex-Mrs. Bradford"—it's great... Cora Sue Collins has outographs from all the famous folk she's worked with... Evelyn Venable recently bought her infant daughter her first bonnet—but the baby won't wear it... George O'Brien is working hard on "Daniel Boone"... George Raft is going to try his hand at pictures in England... Claudette Colbert and Clark Gable did their hitch-hiking scene from "It Happened One Night" at the Actors' benefit show the other night and the audience all but rolled in the aisles... Maureen O'Sullivan may marry John Farrow when "Tarzan" is completed... The next Quintuplets picture will be "Reunion," with Jean Hersholt again playing a doctor.

Uncommon
Sense

By JOHN BLAKE

© Bell Syndicate.—WNU Service.

I am writing this on a hot day—a very hot day. The thermometer on my porch

Don't Watch the Thermometer informs me that it is a hundred degrees Fahrenheit. I could believe that it is very much hotter than that.

The people that pass my door have taken off their coats—if they are men.

The women, who refuse to be beaten even if they can't really keep cool, are wearing flimsy raiment, but they don't pant the way men do.

But while I admit that I am inconvenienced, and wish I could be in Alaska and lean against an ice floe like a polar bear, I know that if I stop thinking about the weather and go to work I will soon lose myself in my job.

A little way down the street is a fire-engine house. The firemen have rigged a pipe up in front of the building and from its mouth spouts a continuous man-made geyser. All the children in the neighborhood, and they make as much noise as all the children in town, are stripped to their little buffs and are shouting joyfully as they bend down their backs and let the spray from the pipe run over them.

Every time there is a lull in the proceedings to change children—for there are too many of them to soak all at once—a flock of sparrows alight to have their turn at the cooling process.

But in the suburban town where I live, and in the great city which is not far away, men and women are doing their regular work.

If a fire should break out in another part of the town, the fire-

men who are now watching the children enjoy their shower baths would mount their ladder trucks and man their engines, and be off with a blare of sirens to do their appointed job.

If they decided they didn't want to get any hotter and stayed where they were perhaps the town might be consumed.

Men and women can do in a pinch what they have to do, whether the temperature is up or down.

When the need arises, especially the need to help others out of danger, their courage crops out and they all become heroes for the time being.

And I, who have nothing to do for the present but pound a type-writing machine would do well to forget the fact that it is uncomfortable, and stop breathing hard and making continuous trips to the refrigerator for ice cubes to fill my glass.

Rain or snow, cold or hot, one is easier in his mind if he forgets the discomforts that are bound to come, and to continue with his work.

And the more indispensable work he has to do, the more easily he will withstand the steaming streets and the torrid skies.

As long as it is not humanly possible to change the weather, the only intelligent thing to do is to forget about it.

Heavy Stuff

The neutron, the infinitesimal particle of matter being used to bombard the nucleus of the atom in the hope of releasing its energy, is so heavy that a thimbleful of them would weigh about a million tons.—Collier's Weekly.

SUCCESS PROCESS
TOO COMPLICATED
TO BE GIVEN OUT

Few processes are so delicate or complicated as those of success. Who would venture to say that he has mastered them so thoroughly that he can venture to tell another human being how to make a success of this individual life. Some people who succeeded never seek counsel. They have instincts which guide them aright in the most difficult moves of the game. They make mistakes, of course. It is often necessary to make mistakes once, so that one need not make them a second time.

William Watson, in one of his poems, has spoken of "that stillness on a base of power." There is fine counsel, as well as truth, in the phrase; for true power goes as quietly about its work as gravitation.

Failure is usually a nervous, fidgety creature, perpetually agitating itself as to whether or not it is succeeding; whether or not it is winning acceptance. Success, on the other hand, does its work, does it with all its might, knows for certain that it has done it well, and, come, praise or blame, passes quickly on to its next job; or if it be not always so scientifically sure of itself as this, it practices what I have called an "optimistic fatalism."

Village of Tongues

More different noises and voices are heard in a villa in Uccle, Belgium, than in any other spot on earth. There, day and night, a staff of the Union Internationale de Radiophonie "police" the radio stations of Europe to see that they are adhering to their wavelengths. The place is a bedlam of squeals, whistles and roars and programs that come through in about 12 languages and dialects.—Collier's Weekly.

BUY the New Firestone STANDARD AT Today's LOW PRICE

FIRST GRADE QUALITY—The new Firestone Standard Tire is built of first grade materials, by skilled workmen, and embodies the Firestone patented construction features.

GUM-DIPPED CORD BODY—Every cotton fibre in every cord in every ply is soaked in liquid rubber, providing greater strength, blowout protection and longer life.

TWO EXTRA LAYERS OF GUM-DIPPED CORDS UNDER THE TREAD—This patented Firestone feature binds the whole tire into one unit of greater strength giving extra protection against punctures.

LONGER NON-SKID MILEAGE—The new scientifically designed non-skid tread is wider, flatter, with more and tougher rubber on the road, giving long even wear and thousands of extra miles.

THE FIRESTONE NAME AND GUARANTEE—Every Firestone Standard Tire bears the Firestone name, your guarantee of greater safety, dependability and economy.

LOW PRICES—These low prices are made possible by volume production in the world's most efficient factories. See your nearby Firestone Auto Supply and Service Store or Firestone Dealer and equip your car at these low prices.
