“I'M ALWAYS LOOKING FOR TROUBLE!”

“That’s my job—to find trouble on your telephone line before you find it. You see, I’m a Test Man in a telephone central office. It’s my job to find trouble before it troubles you! Switches and dials tell me what and where trouble may hit. Then I send a repairman to fix it. Very often we can catch it before it affects your service and you never realize that there has been trouble on your line!”

We telephone people spend a lot of time and money to keep your service free from mechanical failures. But some people have telephone troubles of another kind. They waste time and effort—even lose sales and customers—due to inadequate telephone facilities or the wrong equipment to meet the needs of office, home, store or factory. Why not let us study your telephone problems and check your facilities? There’s no obligation. Just call the Business Office.
