FARM CALENDAR. Timely Reminders from Pennsylvania State College School of Agriculture. Summary Shows Methods—Practiced followed by 276 Pennsylvania tomato growers who produced more than ten tons an acre in 1936 have been summarized by extension workers of the Penna. State College.

Plan for Bouquets.—Apple trees which are to supply bouquets for cross pollination of York Imperial, Stayman Winesap, Red Delicious, and Paragon should be pruned lightly or not at all. McIntosh, Grimes Golden, Jonathan, Golden Delicious, Rome, Yellow Transparent, and York are good pollinators of the other varieties mentioned, according to Penn State fruit specialists.

Cleanliness Pays—Sanitation in rearing saves the lives of chicks. The program includes clean chicks, clean brooder houses, clean litter, clean feed, clean management, and clean ground. Last year 59,104 chicks grown under this system suffered a loss of only 5.43 per cent. by death, report Penn State poultry specialists.

Good Seed Needed.—Production of large yields of high quality potatoes requires the use of good seed. Inferior seed often results in poor stands, waste in cutting, lack of vigor, stem rot, scab and other diseases, and low yields of poor quality potatoes, say Penn State College pathologists.

Layers Must Eat.—Flocks of White Leghorns laying 50 per cent or better at this season of the year should consume at least 25 pounds of feed per 100 birds daily, explain poultry specialists at Penn State.

Produces Large Flowers.—Floradale Beauty verbenas, a 1937 All-American flower, produces large flowers of salmon rose shade.

The Independents lost to Bellefonte in a basketball game on the local floor on Tuesday night by a score of 49 to 44. Milroy and the Independents put on a scrappy basketball game on the Centre Hall floor on Friday evening. The score board showed a margin of 100 per cent for the locals—48 to 24.

By WILL ROGERS I WONDER how the girls are coming out that studied how to cook in school. There has always been jokes about brides and the way they can't cook, although I never could understand why being a bride would make anybody cook wrong.

Anyhow, there was one bride that never took cooking at school. She served lamb chops and her husband acted awful funny about eating them.

"Well, they just taste funny," he said. "I'd like to eat them, but you know that taste is just a little queer. You must have done something to them lamb chops, because no lamb ever tasted like that on its own hook." "Why, John," she says, "I cooked them lamb chops awful careful. I burned them a little bit here and there, but I remembered what the radio woman said about what to do for burns, and I put a little soda and witch hazel wherever I'd burned 'em. They ought to be good."
