"I'm one of the girls who make up the Bell Telephone Directories. Accuracy—with a capital A—is the big aim on my job. There are millions of chances for errors in the spelling of all those names, initials, addresses and telephone numbers. But we're mighty careful in our effort to get every letter and figure exactly right because to us they're not just names and numbers—they're people and telephones. So, every listing—name, address and telephone number—is checked and double checked. Then after the printer sets the type, each page is checked four separate times—by six experienced proof readers."

When things happen that you should know about; your name in the telephone book may be worth many times the small cost of telephone service. Business and social opportunities... new jobs... chances for extra work or extra sales... can find you without trouble if you're in the telephone directory. Millions of people refer to it daily. It's the nation's calling list.

More than 12,000,000 names are listed in the directories of Bell companies. You can go straight to any one of them—easily, quickly and economically—by telephone.
