Toxoid Inoculations for School Children—Under the direction of Dr. J. A. Parrish, County Health Officer, assisted by Miss Jean Noll, R. Vocational Meets Defeat in Basketball—No alibi is being conjured by the Vocational basketball team for their defeat Friday night by the Centre Hall-Potter team on the latter's floor, by a 22-13 score. Fully aware of the improvement in speed and technique of their competitors before going into action, the boys resent the idea defeat was due to being cocksure of winning. Of course, like anyone engaged in a contest, they expected to win, but that expectation was an incentive to do so rather than a hindrance. The game was one furiously fought through every minute of the quarters. There was no lagging on either side. At this time the Vocational team is on a par with Millheim to win the championship of the Centre-Clinton league, and hopes to do so.

FARM CALENDAR.

Timely Reminders from Pennsylvania State College School of Agriculture

Silage is Economical—Silage has proved valuable in lowering the cost of beef production, say Penn State livestock specialists. Trials at various experiment stations have shown that it is commonly more economical to give fattening cattle twice a day all the silage they will clean up without waste than to limit the amount of silage fed.

Keep the Bulbs—Bulbous plants, such as tulips, narcissi, hyacinths, and others which have bloomed indoors should be given an opportunity to continue to grow until the tops have turned yellow, after which they should be stored in the cellar until replanted in the garden next fall, say Penn State floriculturists.

Use Hardy Clover Seed—Locally grown red clover is the best adapted but cannot always be obtained. Next in hardiness is red clover seed produced in the Middle West, explain Penn State agronomists. Central European seed is decidedly less hardy than good domestic seed, while seed

from Italy seldom survives our winters. Dry Housing Helps—A dry condition in the brooder house will aid in preventing coccidiosis. This may be accomplished by giving the chicks plenty of room, having light fluffy litter that will absorb moisture, and using fountain that do not spill water, according to State College poultrymen.

Get Good Varieties—A list of good varieties of vegetables for the home garden can be obtained from your county agent or the vegetable gardening department at State College.

Legumes "Fix" Nitrogen—Legumes are available to the farmer because they can take nitrogen from the air and "fix" it in forms available for other plants. Inoculation of the seed is necessary, say Penn State bacteriologists.
