THOUGHT ELECTRIC RANGE "NICE" BUT FEARED OPERATING COST HIGH

Enjoy the Benefits of Cheap Electricity

"A neighbor of mine had an electric range, and just seeing how clean and nice it was, made me want one too.

"She said that operating cost was very reasonable, but I hesitated. Somehow I thought that if I were to get an electric range our electric bill would go away up. At last, however—Christmas, a year ago—my husband and I had one installed, consoling ourselves by saying that such a wonderful cooking service would be worth a whole lot more.

"But the bill didn't go up much. Our total monthly cost for electricity averages only \$6.00 —and that includes the operation of our electric range, a refrigerator, radio, washer, cleaner, iron and several other appliances. And I never saw cooking done any faster!"
