SCOUTS RESTORE WALLET WITH SMALL FORTUNE TO OWNER

Thursday evening at the Democratic banquet held in the local high school auditorium, the loss of a wallet was reported to J. F. Wetzel by a well-dressed middle-aged man.

Mr. Wetzel immediately reported the loss to the local Boy Scout Troop who had charge of the cloak room. Francis Snyder stated he found a wallet and placed it with check No. 226 from which he supposed it to have been lost. The owner identified it by giving a very accurate description of the wallet, the most outstanding details being the initials F. F. B. and the gold corner decoration. The wallet contained several hundred dollars in cash and a number of endorsed checks. Francis was rewarded with a \$2.00 bill for his integrity.

The scouts need to be congratulated for their honesty as they had sole charge of the fund and never examined the contents but stowed it away for the owner. More of this type of honesty is sorely needed in our modern day.

FARM CALENDAR.

Timely Reminders from Pennsylvania State College School of Agriculture

Control Oats Smut—Smut is the worst enemy of oats in Pennsylvania. It can be controlled by treating the seed with a solution of formaldehyde. One pint of 40 per cent formaldehyde diluted with a pint of water is sufficient for 50 bushels of oats, say Penn State plant pathologists.

Tools Are Needed—Many tools and other equipment are needed by the flower gardener. The tools should be kept in good condition so that they will perform efficiently when there is work to be done with them.

It also is advisable to have essential supplies on hand for the season's needs declare Penn State ornamental horticulturists.

Feed Lambs Grain—Lambs that are being produced for an early market should have access to some grain feed as well as good legume hay. A ration of 2 parts of cracked corn, 2 parts of oats, 1 part of bran, and 1 part of linseed oil cake should be available to the lambs to be fed separately from the ewe flock, explain Penn State animal husbandmen.

Rural Groups to Sing—Rural community choruses are planning to sing in the fifth annual state-wide festival at the Penna. State College Thursday June 19, which is Farmers' Field Day. Entries should be filed with the county agricultural extension associations before April 1.

Grow Healthy Pullets—Since 1929 more than 1,500,000 chicks have been grown in Pennsylvania under the "Grow Healthy Pullet" program of the Penna. State College agricultural extension service. Six requirements are met: clean chicks, clean brooder, clean litter, clean feed, clean management and clean ground.

Provide Excellent Condition—Clover and alfalfa seedlings need a fine soil worked until it is solid and firm, say Penn State agronomists. Fall or winter plowing gives this condition better than spring plowing.
