PWA Makes Grant Payment to Gregg School Board—The Public Works Administration announces the payment of \$555.10 to the school directors of Gregg township. This amount represents the third of a series of grant payments which are being made by the Public Works Administration in the fulfillment of its agreement to contribute \$6,954, or 45 per cent of the total cost of the project which estimates show will amount to approximately \$15,454. This brings the total amount paid thus far by the Federal government through the Public Works Administration to \$5,254.

This useful Public Works Administration project, which was only recently completed, made possible the construction of the new combination auditorium and gymnasium addition to the Spring Mills school building in Gregg township.

Although estimates show that this new addition which will long serve the entire community as a social and recreational center will cost approximately \$15,454, the cost to the taxpayers of Gregg township will be only about \$8,500, or 55 per cent of the total cost of the project, the difference being contributed by the Public Works Administration.

This project created over 8,000 man-hours of useful employment both for construction workers living in Gregg township and for many other workers in industry who were engaged in preparing, fabricating and transporting the materials and equipment which were used in the construction of this important school addition.

ROOKIE

"I've only been with the telephone company two months. I'm just a rookie in the ranks. But I've noticed one important thing about this outfit. The big idea around here is SERVICE. That's all I hear. And it's more than a word — it's the real thing. Everybody I've met here works with one thought always in mind — how can we best serve the public? Seems to me, a company with that attitude is on the right track."

Service records of twenty, thirty, even thirty-five years are not unusual among telephone men and women. Most of us regard this as our life's work. Naturally, then, we're vitally interested in this business of ours. That interest is reflected in constant improvement in your telephone service. Today you can telephone across the state or across the nation as easily and clearly as you telephone across the street. Try a long distance call tonight after seven, or any time Sunday, when reduced rates are in effect, and see for yourself.
