Summer Charm with Eye-Appeal and Eye-Comfort

In this cool, summery room, floor lamps at divan and easy chair provide restful light for reading, while above the mantel, new-type wall urns add a charming decorative touch.

By Louise Brown

DOESN'T this room look as cool as the proverbial cucumber? No need to give up reading, a game of bridge or a bit of sewing on a warm evening if you give your living room a summer treatment like this.

Flowery cretonne slip covers, delicate sprays of ivy against plain light walls, simplicity of arrangement, all contribute to the cool effect. Even the lighting has been given a warm weather treatment. The floor and table lamps have inexpensive light colored shades that give both eye-appeal and eye-comfort. The floor lamps at the davenport and easy chair on either side of the fireplace are the kind that have glass diffusing bowls under the shades and are equipped with three-light bulbs by which three different quantities of light may be obtained at successive turns of the switch. Thus you have a moderate amount of light for conversation—and abundant light for reading or close work. It's a pleasure to read or relax in a spot that looks so restful and inviting.

Do you notice the two little wall urns flanking the pictures just above the mantel? They're quite new and bid fair to become extremely popular. Their colors, by the way, are made to match the wall paper or paint. Open at the top, they send considerable light to the ceiling, to soften the general effect. At the bottoms, glass plates permit diffused light to reach the ivy plants and keep them growing healthily. Small round glass ornaments on the curved outer surface add a delightful decorative touch.

These little wall urns were installed to replace the heavier, more ornate fixtures that were originally provided, and which are now stored away. When moving day rolls around, the old fixtures can be put back, and the new ones taken along. There's a growing feeling among homemakers that lighting fixtures, which form such important parts of the decorative scheme, should be just as removable as the rest of the furnishings. Rather sensible, don't you think?
