BELSHIAZZAR—When we think of this ancient king of the Babylonians one incident in his reign comes to mind. That is, namely, that when Belshazzar at the height of his power foresaw the handwriting of his fallen kingdom on the wall. The Republican party of this state and nation have in their ranks a number of gentlemen who bear a kinship to the ancient king but to this point only one has seen the handwriting so far as any outward feeling is concerned.

Charles W. Carroll, of Philadelphia, who for the past number of years has enjoyed the privilege of being numbered among those of special choice, and who is at present State Chairman of the Republican Crusaders, sent out questionnaires to those who still adhere to the Republican faith. Mr. Carroll's questionnaire asks point blank the opinion of his colleagues in crime, what's wrong with the party and in asking the questions has given the answers himself, thus saving us the trouble. But for editorial sake we'll give you a few of them not asked in question but in statement form. For example: Are the principles of our party adequate? and so on. In the following we'll simply turn the questions of this document into answers and statements. The principles of the Republican party are not adequate. The party is too conservative, and has not kept abreast of the times. The party has very poor management. There is dissatisfaction in the ranks. Big business has controlled the party. Big business has put up the money. The party is organized to death and still dictated as to its policies by a few. The only gesture of merit on the part of Mr. Carroll is the fact that this is the first time in years that the opinion of the man in the ranks has been sought. The idea of seeking the Mr. Common Man's thoughts is a good one, BUT it's too late. The Democratic party has had and will have the interest of the common man at heart and will take care of his troubles and try to make this his country, and his America, instead of the "Happy Hunting Ground" for only the "BIG CHIEFS."

ADAPTED SEED IS NEEDED FOR 1938 PROGRAM The seed crop harvested this year must be depended upon to a greater extent than would ordinarily be the case in providing grass and legume seed needed for the 1938 program, says W. F. Rishel, chairman of the Centre County Agricultural Conservation Program, because of the small carry-over and the fact that the Agricultural Conservation Program has greatly increased the demand for seed of legumes, grasses and green-mature crops. Surveys made of the seed situation show that demand for seed of soil-conserving crops in 1937 and the 1936 drought, reduced the commercial reserves of seed of domestic clover, alfalfa, sweet clover, lespedeza, soybeans, cowpeas, velvet beans and of grass seed in general, to much lower levels than normally prevail. In general, seed that has been grown locally for a period of years is likely to be well adapted, and if properly harvested, stored and cleaned, may be expected to give excellent results, according to Mr. Rishel.

Mr. Lee purchased the place in 1910 from the Hartsock family.
