# BETTER FLAVORS

with an

Electric Roaster THOUSANDS of women who have not yet purchased an electric range already own an electric roaster. Many of them use their electric roaster regularly, instead of their old-style stove, just because it's so easy to do and the

cods taste better. Pie-baking, for instance, is so ample. You just put the pie into the roaster, cover it-then bake it as long as the recipe tells you to. When you take it out, you'll find that the fruit in the pie is very 'done', that the crust is "flaky" -and the taste is marvelous. It's , fast, clean way to bake-and

very little trouple An electric roaster is also convenient in cooking complete meals, -and for stewing, grilling,

reasting Operating cost is low, too. Investigate-You Can Get A Good Electric Roaster For Less Than \$20

REDDY KILOWATT "Your Willing

Servant"

FAST, CHEAP

THERE is no faster method of cooking than the electric method-and all it costs, at West Penn's low electric rates, is about \$2.00 a month. Many families pay even less!

# ELECTRIC RANGE makes the cooking of tasty meals so much easier!

ONE of the first things that the family learns. after an electric range has been installed, is that everything tastes better! And mother learns that she is able to get these fine results with far less work than ever before.

Electric cooking requires very little water-in some cases none at all. It is "sealed-in" cooking. Juices don't steam away. They remain in the

foods and develop into rich, fine flavors. Electric heat is measured—there is a correct heat for all foods. You can depend on an electric range to do the job right-without the necessity

of watching and testing. That's why it is so easy. Users will tell you that they prefer this modern cooking method-that they're cooking electrically "for keeps!"

Go to the Electric Stores and See the New Models-Join the Swing to Electric Cooking!
