## LIGHT CONDITIONING THE KITCHEN

The last word in kitchen efficiency is this lighted cabinet. Small tubular bulbs are installed at either side of each shelf and automatically controlled to turn on and off as the door is opened or closed. While it doesn't show in the picture, there is also a lumiline bracket under the cabinet to light the work space beneath. The soft lighting unit over the sink is one of the most approved methods for lighting that work center, harmonizing as it does with the lines of the modern kitchen and giving a high intensity of light on the work.

By LOUISE BROWN

THE living room is naturally the first room we think of when we plan better home lighting, for it's there the family spends most of its leisure hours and does most of its close seeing tasks. But what about the kitchen? Isn't it just as important to condition the light there, in the work shop of the home?

Kitchen lighting should be just as efficiently planned as the lighting for a modern factory or office so that tasks can be done more quickly and with less effort. A well lighted kitchen relieves nervous tension and helps eliminate those annoying kitchen mishaps—sand in the spinach, broken dishes or the wrong flavoring in the cake. Good lighting adds cheer to the kitchen on dark days and in the evenings. From a decorative point of view the modern kitchen needs plenty of light to bring out the charm of its gay colors and add a certain warmth.

**Simple Rules**

The rules for good kitchen lighting are really very simple. There should be some sort of ceiling fixture (a large kitchen may need two) to give general illumination. This fixture should be large enough to hold a lamp bulb of the right wattage to give sufficient light.

In addition, there should be a

**ALLENSVILLE NATURALIST PLANTS MOUNTAIN FLOWERS**

Always a lover of flowers, especially those God hid away in our mountains, Amos Zook, some three years ago decided to bring some of these wild plants to his Alleensville home in Kishacoquillas Valley, and plant them in "Tipping Brook Gardens." Being successful in his first attempt, he continued this recreation until it became a hobby with him and today more than one hundred varieties are growing and blooming in his gardens under his care and nursing. Among the varieties are found wild columbine, bittersweet, trillium, ginger, five different kinds of jack-in-the-pulpit, giant Indian turnip, found only recently on the flat of Standing Stone mountain where, as Mr. Zook expressed it, "Jehovah had planted them in a nice row"; trailing arbutus, partridge berries, wild alum, pink lily coral lily, wood lily, Solomon's Seal, spikenard, two varieties of snakeroot, golden seal, Indian moccasin, five kinds of orchids, lion's tongue, Indian point brush, ginseng, laurel and rhododendron, hain berries, yams, shoevay lady's slipper (very rare here), and many others.

At present Mr. Zook is busy preparing a section of his garden, a space 70 ft. by 40 ft. for the tea family, of which there are over eleven hundred different varieties and of these he has about twenty test hopes to have one hundred soon. Most of his wild flowers are growing in what he calls "the lath garden," a section inclosed with lattice work.
