FARM CALENDAR

Timely Reminders from The Pennsylvania State College

Know Power Needs—Economic operation demands that farms be not over-powered, say Penn State agricultural engineers. Where the tractor is too large the problem is made more serious because the machinery used with it may be larger than necessary also. Overpowering is costly.

Club Members Are Active—A survey of 4-H club members attending 11 Leadership Training Schools at the Pennsylvania State College shows that 459 are still living in the counties from which they were sent as delegates. They are engaged in more than 45 different occupations.

Use Winter Bouquets—Homes can be brightened with winter bouquets, say home management specialists of the Pennsylvania State College. Among those lasting for several weeks are various bright berries, highly decorative seed pods, everlasting flowers and many aromatic evergreens. Containers for these should enhance instead of overshadow the beauty of the arrangements.

Call Feeds Available—Many dry mixes have been compounded for feeding dairy calves. Some of these are in the form of pellets or cubes, report Penn State dairymen. Cereal yeast feed used as 10 per cent of calf starters has increased growth 15 to 25 per cent.

Lime Pastures Now—Fall or early winter is a convenient season for liming pasture say Penn State agronomists. The lime has a chance to work into the soil before spring.

Light Yolks Preferred—Hens fed liberal quantities of oats lay eggs containing pale yolks. Most markets prefer eggs of this type, according to Penn State poultrymen. The oats carry practically no yolk-coloring pigments.

COOK ELECTRICALLY... IT COSTS FAR LESS THAN MOST PEOPLE THINK

MANY persons do not know how little it really costs to cook electrically. While they would like to cook by this fast, clean, easy method, they think it costs far more than it actually does.

For instance, not long ago 626 women who do NOT own electric ranges were asked: "What does it cost to cook electrically?" Guesses averaged \$3.04 a month—over \$1 high!

West Penn Power Company recently installed meters on electric ranges in 100 representative homes—and for two months measured, separately, the electricity used for cooking. Electric cooking costs are steadily coming down, for this test disclosed that the average monthly cost in those 100 homes was less than \$2!

"AND BESIDES, FOLKS"—

"Have automatic electric hot water service in your home and your water heating troubles are gone forever. Clean, safe, certain—operates for only about 10c a day!"

BEFORE YOU BUY ANY RANGE—INVESTIGATE THE NEW ELECTRIC MODELS. THEY COMBINE ALL MODERN COOKING AIDS—AND AT LOW PRICE.
