How to Curtain a Group of Windows

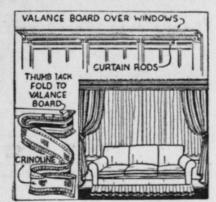

By RUTH WYETH SPEARS "DEAR MRS. SPEARS: I want to tell you how much practical help I have received from both of your books. I have been sewing for years but these books have explained many points that I never understood before. I am now planning new draperies to dress my living room up a bit. One group of three windows is especially difficult as the davenport has to be placed in front of them. Can you give me a suggestion? I think I would like a plain valance without gathers or pleats

bands .- A. D. W." I would use plain cream colored glass curtains for all three windows and overdrapes at the ends

across the top. How should this be made and hung? I have just

made a beige slipcover for the

davenport with green pipings and

only. A striped material in tones of tan and green and blue would be nice for the draperies with a narrow fringe edging in green and tan or green and blue. A valance board at the top of the windows is essential when a plain valance is used. This board should be four inches wide and 1/2 inch thick. It is screwed in place with L brackets. Ordinary metal curtain rods are placed just under it for the glass curtains and side drapes. The plain valance should be long enough to fit around the ends of the board and should be about six inches deep finished. It should be stiffened with an interlining of crinoline, and an allowance should be made at the top for a tuck or fold to be tacked to the board as shown.

NOTE: Mrs. Spears' Book 2-Gifts, Novelties and Embroidery has helped thousands of women to use odds and ends of materials and their spare time to make things to sell and to use. Book 1 -SEWING, for the Home Decorator, is full of inspiration for every homemaker. These books make delightful gifts. Mrs. Spears will autograph them on request. Books are 25 cents each. Crazypatch quilt leaflet is included free with every order for both books. Address Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

CREOMULSION For Coughs or Chest Colds

As Your Self-Control Is "You can never have a greater or a less dominion than that over yourself."-Leonardo da Vinci.

CONSTIPATED! **Gas Crowds Heart.**

"For thirty years constipation caused me headaches and pains in the back. Awful gas bloating crowded my heart. Adlerika helped right away. Now I eat sausage, bananas, pie, anything I want and never feit better."—Mrs. Mabel Schott. Two things happen when you are constipated. FIRST: Accumulated wastes swell up bowels and press on nerves in the digestive tract. SECOND: Partly digested food starts to decay forming GAS, bringing on sour stomach, indigestion, and heartburn, bloating you up until you sometimes gasp for breath. Adlerika gives double relief with DOUBLE ACTION. Adlerika relieves STOMACH GAS almost at once. It often clears bowels in less than two hours. No griping, no after effects, just quick results. Recommended by many doctors for 35 years.

WHO'S **NEWS** THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—Dr. Robert H. Goddard, experimenting with rockets for the last 24 years, and steadily making progress, has had as his goal the pene-

Dr. Goddard Has Both Feet On This World

tration of the higher atmosphere, the possible catapulting

of messages across the ocean, and sundry scientific inquiries to which he has thought his unique gunnery might supply the answer. Although much Jules Vernish stuff has been written about his "rockets to the moon" and about shooting people across the Atlantic in a few minutes, he has been an aloof and patient scientist, intent on seeing only what he sees and not making any handsome promises.

So far as this courier knows, the suggestion by Maj. James R. Randolph that rockets may replace heavy artillery, for longrange bombardment of cities, is the first official recognition of their possible use in warfare. He specifically cites the work of Doctor Goddard, at a time when Doctor Goddard is piling up new patents and getting some of his biggest sizzlers under control. It is also the time when the tiny, motored plane, evolving from the toy, and controlled by radio, is absorbing the interest of the army experimenters

as a possible bomb-dropper. At Roswell, N. M., financed by the Daniel Guggenheim foundation, Doctor Goddard has a unique desert laboratory with plenty of elbow room and sky room. He now has a gyro steering mechanism on his rockets, by which they may be accurately aimed. He has gained 30 per cent in range over his best shots of two years ago, and is now forcing his rockets to a speed of 700 miles per hour.

His most valuable contribution to rocketeering, noted by Major Randolph, is his continuous flow of power, instead of the single initial explosion. Gasoline and oxygen, mixing and exploding as they issue from a tail nozzle, give steady propulsion.

Doctor Goddard, an amiable, unassuming, baldish man, began his rocket experiments at Clark university in 1914. He is a physicist, absorbed in pure science, admitting that we might hit the moon with a rocket if we wanted to spend that much power, but so far he keeps down to earth on immediate and specific problems-and makes pro-

our measure for

Cannon Cure Not Crammed Down Throats

its immediate application. When Professor Cannon put out "biocracy" several years ago, as a cure for the ills of the "body politic," he made it clear that we could take it or leave it. Hence, while biocracy is still in the suspense file, Professor Cannon finds honor and advancement as the newly-elected president of the American Association for the Advancement of Science, which body is driving for some grand scale rationalization of science and society. That's the main idea of biocracy-a society which is not at war with the life force.

He is one of the most distinguished physiologists in America, given to novel research. He is the discoverer of a method by which we may hear our brains ticking.

New Soft Styling Technique Calls for Definite Fullness

By CHERIE NICHOLAS

ent" that adds zest to each season's modes are the excitingly new silhouettes given to fashions through | tell the story better than words. a soft styling technique that makes fullness its theme.

The versatile ways in which the new fullness is manipulated impresses one. In some instances skirts are frankly full all around, inspired no doubt by the dirndl vogue that has been having a successful run for some time. The all-around pleated skirts will hold good among foremost fashions not only for midseason and spring, but their style prestige will endure the whole summer through. Unpressed pleats is also a favorite method with designers for acquiring desired fullness. Then, too, there is the circular-cut skirt that measures yards around the hem. It is getting lots of notice especially in the very new petti-coat versions which are made to reveal a swish of taffeta or a splash of white that repeats the pique neckwear which finishes off the blouse. These petticoat dresses are providing a big sensation on the new style

program. For women who cannot stand for more than a certain amount of fullness, the new skirts that make particular appeal show a controlled treatment in that they are smooth at the back and hips with fullness brought to the front in gathered or pleated panels. In both day and evening clothes this idea is carried

This matter of soft styling and intriguing fullness is by no means confined to the skirt but rather is consistently worked throughout the costume so as to preserve continuity in a unifying way. The smart coat and dress shown in the illustration

The stunning coat is typical of the new trend to fullness. It is made of a rust-color wool in handsome texture. The definitely full skirt is balanced with a soft blouse top which has roomy sleeves gathered full into the wrist. A small muff and a hat of red fox complete the ensemble. Very significant is this coat as to

new color trends for spring. In the early collections special emphasis is placed on the importance of rust shades and mustard yellows and kindred bues with jewelry accompaniments of amber topaz and like stones. For immediate wear stylealert women are selecting chic little dresses tailored of sheer woolens with a sophisticated simplicity that abounds in dramatic details.

Rows and rows of shirring achieve fullness for the dress pictured. This very high-style model by International is the type sure to call forth compliments wherever you go. Shirring at the waistline achieves a flattering dirndl. The bodice above the slim mid-riff corselet adds a related soft touch. Horizontal shirring on the sleeves gives them that casual "pushed-up" look that indicates "last word" chic. Expert designing makes it a perfect dress for a busy social calendar that carries from luncheons to informal dinners and the theater. The three jewelled pins at the waistline are individual. A soft kid bag, kid gloves and a simple felt hat with face veil complete the costume. With her upsweep hair-do she wears small, clip earrings foregoing any ornaments at the V-neckline.

Smart Plaid Coat

Plaids had such a good start this winter their style momentum is carrying right through into the midseason and early spring style pic-ture. A coat like the one shown here will prove a real joy during the coming months. The plaid itself is in green and brown. The wide kindings of plain green enhance the picture of a charming gay coat for winter. Large motherof-pearl buttons add a final note

Pleated Vogue to

Repeat Triumphs Pleat it! And again fashion says pleat it, which is exactly what designers are doing for spring. Only this time the pleatings are more so than ever. That is the pleated mood permeates the whole scheme of

things from neckline to hemline. In the newer fashions it is not only the skirt that is pleated, but the whole thing, including blouse top sleeves and just as like as not a pleated bolero is added.

The use of pleats is taking on a decidedly designful flair. The versatile way pleats are being handled is clever beyond words. You see most unique touches especially in blouse styling such as pleats brought down from each shoulder to tie in a soft knot at the girdle top. Surplice pleats that cross from shoulder to shoulder finishing in a bow at the waist-line with pleated streamers. Much of the charm of the newer print frocks lies in the fact of their lavish and unique pleatings.

Flounces Return

With a Flourish Of all things, guess what's coming! It's flounces on your new frocks. Yes'm flounces old-fashioned, now new-fashioned flounces. The idea of flounces has been taken up by designers with a will and if you would be "first" in fashion you take your cue right now and select for your newest gown one of the smartly flounced versions. The flounce trend is as apparent in day dresses as in evening floor-length party frocks.

Choice for Evening The stiff silks being used for evening gowns are tulle, faille and taffeta, while moire and grosgrain are the choice for stunning afternoon

Glasses Need Not Detract From Beauty

By PATRICIA LINDSAY

SOME beauty authorities stress eye make-up if you must wear eyeglasses, but I stress hair styling and lip rouge.

In the first place, if your eyes are so weak that constant use of glasses is necessary, the less you tamper with them the better. The simplest care of daily bathing with a reliable lotion, and healing drops prescribed by your occulist, should be the extent of your fussing. Plenty of rest and eye exercise, of course, but no mascara nor eye shadow nor penciling.

Touch up your brows, yes, and keep them trim. But do not pluck them to a thin line. Many physicians offer the opinion that too frequent plucking of the eyebrows weakens the eyes. So you see?

Concentrate on Hair and Lips

Put on your glasses and sit before your mirror. Comb your hair softly around your face. Change your regular part. Experiment.

In most cases, hair brought down softly over the ears, fluffed a bit to fall out on the cheek, just below the ear shaft of the glasses, is the most

But if you are the sleek type, and comb your hair back from your face, then you must accent your lips to detract from the frames. Full lips of rich color, not too deep, does a lot for you.

Sleek or feminine in hair style, the manner in which you rouge your lips is most important. Try two lip sticks. The lighter color for the upper lip, the deeper tone for the lower lip. Liquid lip rouge painted on with a fine brush and a steady hand, is the most lasting. It takes a little practice to apply it well, but it is worth the effort in the end.

Keep your hair glossy, with daily care, and nicely set. Keep your skin clear and your teeth sparkling white; your brows trim and your lip coloring intact and I can vouch that your eyeglasses will be hardly noticed.

If you feel the desire for some eye make-up rely on vaseline or a reliable eye oil with which to lightly massage your lids and lashes. They glisten and give some depth to the eyes, and are also beneficial.

Health Essential To Charm

"Watch A rule she teaches is: your health. Sleep, exercise and drink water. Too many women in this country are below par. Nothing reveals your character to people more quickly than the expression you carry, your voice and your state of health.

"If you are physically below par you may have a nervous disorder which should be taken care of, but otherwise you should be able to keep well by eating proper food at regular hours, getting eight, nine or ten hours of sleep, and by exercising in the fresh air and sunlight.

"Don't always complain of being tired and of things making you nervous. If your health is good you are not nervous, merely cranky, and people soon discover it. If your health is poor do something about

Strong words, aren't they? And here are some more well worth digesting and particularly suited to

the growing girl. "Don't count on being only beautiful. You can overestimate the appeal of a beautiful foot, a tiny waist or long lashes. Cultivate wit, humor, tact, genuineness. Pay attention to your posture, carriage and gesture. Develop gentleness of gesture, a pleasing manner. Be yielding in your dealing with others, never dictatorial, never too aggressive.

And above all things be particular about your personal appearance. Dress neatly, appropriately, and with an eye to the decorative. Never, never be overdressed!" @ Bell Syndicate,-WNU Service,

HINT-OF-THE-DAY

Care of the Hair Not all women can afford the luxury of having their hair done by a professional every week. But with a little practice, you can do a professional job yourself.

Cleanliness of the hair is the first requisite. This means a good shampoo at regular intervals. Then choose a hairdress that you can handle yourself. Stay away from anything elaborate or extreme. That requires a really professional touch. If you want curls, make them

few and substantial. The trick combs that curl and comb at the same time are a big help. For grooming, the maker of one of these combs has a quick drying lacquer that makes an excellent setting fluid. The bottle has an atomizer, permitting you to spray the lacquer where you want it.

This lacquer helps tremendously with the new high hair-do. Spray it on the stragglers at the back of your neck and comb them flat. Your hair will stay in place for a long

Ask Me Another A General Quiz

The Questions

1. Was John Witherspoon the only preacher who signed the Declaration of Independence?

2. Are there as many Indians in the United States today as there were at the time of the Battle of the Little Big Horn?

3. Who was the first Roosevelt to come to this country? 4. What is a digamist?

5. Is a knot or nautical mile longer or shorter than a land

The Answers

1. Yes. 2. There are more Indians in America today than there were in 1876, the year of the battle. 3. According to genealogists the first Roosevelt to come to this country was Claes Martenzen van

Roosevelt, in 1640. 4. Anyone married legally the second time.

5. The land mile is 5,280 feet; the nautical mile is 6,080 feet, or 800 feet longer.

HOW TO RELIEVE COLDS

Simply Follow These Easy Directions to Ease the Pain and Discomfort and Sore Throat Accompanying Colds

THE SIMPLE WAY pictured above often brings amazingly fast relief from discomfort and sore

throat accompanying colds.

Try it. Then — see your doctor.

He probably will tell you to continue with the Bayer Aspirin because it acts so fast to relieve discomforts of a cold. And to reduce

This simple way, backed by scientific authority, has largely sup-planted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered. But make sure you get genuine BAYER Aspirin.
