A COLLECTION OF NEWSY HAPPENINGS AND PERSONALS FROM GREGG TWP.'S METROPOLIS.

Townsend Meeting on Grange Park Our town was largely represented at the Townsend picnic held at Grange Park last Thursday, which was a red letter day for the Townsend Club, of Centre county. There were approximately 2900 present. The committee which brought out the huge throng and made the picnic a decided success was headed by Walter S. Auman secretary of Club No. 1 of Spring Mills. Full cooperation was given this committee by Prof. Charles S. Kniss and C. L. Nonemaker, National representatives of Altoona. The Aaronson band and Penns Valley Harmonizers furnished music and entertainment. Hon. Kenneth Haines of Rebersburg, Harry A. Corman, Spring Mills, and C. L. FARM CALENDAR

Timely Reminders from The Penn'a State College School of Agriculture

Control Potato Blight—Late blight has appeared on potatoes in several counties. Plant pathologists of the Pennsylvania State College warn that the vines must be kept thoroughly covered with a 8-8-100 Bordeaux spray put on with 300 to 400 pounds pressure. They suggest careful adjustment of top and side nozzles to get the best coverage.

Prune Christmas Trees—Pines grow into shapely Christmas trees if they are pruned for symmetry in mid-summer. Penn State foresters report that the market demands compact trees. After the third or fourth year the pines grow rapidly and become open and scrawny. Summer shaping eliminates losses caused by unruly growth.

Crabgrass Is Lawn Pest—Crabgrass can be controlled, according to Penn State agronomists. They recommend high cutting of lawn, at least 1-2 inches, raking crabgrass to raise seed heads so mower will cut them off, liming and fertilizing in late August, and reseeding and topdressing of thin and bare spots in early September.

Train Colts Early—Foals which are handled and halter-broken at an early age lose their fear of man and are easier to care for as they grow older. Livestock specialists of the Pa. State College say that the early training saves a lot of hard work later.

Protect Grain from Insects—Penn State entomologists make six recommendations for protection of stored grain from insects. These are clean barns, early threshing, keeping loose straw and shocks of grain out of barns, fumigation of grain, tight bins and granaries, and granaries built outside the barns.

Grow Cover Crops—Rye-grass has proved to be a good cover crop for sowing in corn or truck crops at the last cultivation, Penn State agronomists report.
