Laughing Around the World With IRVIN S. COBB

Pleasure Out of Pain

By IRVIN S. COBB

JOHN GOLDEN, the New York theatrical producer, likes to go to dinners—public dinners. Religiously he sits through the speaking, no matter how bad it may be—and generally is; and emerges usually with a smile of rare content on his face.

Not long ago a friend questioned him regarding his peculiar notions of an evening's entertainment.

"You must love bad oratory," said the friend. "Not particularly, answered Mr. Golden. 'I derive my greatest pleasure after the speakers finish.' "Just what do you mean by that?" "I can best explain," said Mr. Golden, "by telling you a little story: Once upon a time up in New England the village idiot was discovered sitting on a fence and at intervals hitting himself in the head with a tolerably heavy hammer. 'Why do you do that?' inquired a citizen. 'Because,' answered the idiot, 'it feels so good when I stop.'"

A representative bull and representative calves of each breed also are on display at the Borden Dairy World of Tomorrow.

MEALS FOR MODERNS

By LOUISE BROWN

THESE are busy days—the children are busy with their lessons, father is working away at his job and mother is up to her eyebrows in household tasks. There's fall cleaning to be done, it's time to get out the heavy clothes and blankets so that the family will be ready for winter. The clubs are starting their fall programs, too, and there are so many special things mother has promised herself to do this winter. Many days there isn't much time for cooking, and yet the family must have hearty nourishing food. That's when the modern housewife looks to her new automatic electric range for help. She has found that she can prepare steam cooker and oven meals, set the time and temperature controls on the range and leave them to shift for themselves while she goes about other tasks or goes out for the afternoon. There's really no end to the tasty food combinations that can be cooked by these methods. Women are discovering, too, how very economical this sort of cooking is. The complete meal is

- cooked by one method which conserves heat, and simple inexpensive foods can be turned into very savory dishes. The actual cooking cost is surprisingly low. Cover cooker. Turn switch to High and when steam comes from vent in cooker lid turn to Low and steam for 1 hour. Will Rogers' Humorous Story

By WILL ROGERS IT WAS at a bridge party that the ladies were talking about Mrs. Brown's family affairs. Mrs. Green had all the inside dope on the You don't tell me! Absolutely! Brown's. She wasn't a bit bashful about telling it, either. She told how Mrs. Brown's uncle out in California was the one that paid for the new car, and how Brown mighty near got fired last summer and didn't have much of a job anyhow, and that Mrs. Brown often said she had a better chance that she wished she'd never turned down, when she might have been the wife of a rich bootlegger. "Where do you get all your stuff, if I might ask?" says Mrs. Black to Mrs. Green. "Well, I got it straight, all right. You see, the Browns left their two parrots for us to take care of while they went camping last summer," she says. (American News Features, Inc.)
