

ITEMS OF LOCAL INTEREST

Mrs. Donald Shope was visiting relatives in Harrisburg last Wednesday.

Mrs. Frank McClellan, with two guests, visited her mother, Mrs. C. F. Emery, Saturday.

Mr. and Mrs. Harry Taylor, Jr., of Salona were guests of Mr. and Mrs. Sidney Riegel, Tuesday.

Keith Luse, 4-year-old son of Mr. and Mrs. Fred Luse, is recovering from a severe case of pneumonia.

Mr. and Mrs. Sidney Riegel and Jack spent Sunday at Salona with Mr. and Mrs. Harry Taylor, Jr.

Mr. and Mrs. J. F. Wetzel and Clara Lou spent Thursday evening at the Farm Show in Harrisburg.

Mrs. Harry Gauld has been visiting at the home of her daughter, Mrs. Charles H. Light, since last week.

Mary Kay Burkholder, daughter of Mr. and Mrs. Carl Burkholder, has been ill since last week with pneumonia.

January has six days yet to run. Will it please do that running as swiftly as possible and allow us to forget it was ever here.

Mr. and Mrs. David I. Graybill entertained Miss Evelyn Harner, a cousin of the former from State College, Friday and Saturday.

The Rev. Ward K. Hosterman, just released from scarlet fever quarantine, met all five of his appointments Sunday and will continue to do so for several weeks.

Mrs. Clayton H. Homan of Centre Hall, a surgical patient in the Centre County hospital, is reported to be improving satisfactorily, although she will remain in the hospital for another week or two.

Robert Myers of Spring Mills and Garman Matter of Centre Hall went to Detroit over the week-end for a Plymouth sedan and a Dodge truck for R. S. Hagan. The truck was purchased by Mrs. Vera Myers of Spring Mills.

Paul Bender added a fall to his wrestling record by throwing Hartzell of Lock Haven, Friday night, when the State College high school wrestling team defeated the purple matmen 26 to 20. His time was five minutes, twenty-one seconds.

C. A. Rickard and family will vacate the Thomas L. Moore residence on Friday, and on the following day Mrs. Sallie Ruble and family will occupy the place. It will be remembered that Mr. Rickard, an insurance agent, has been transferred by his company to an Ohio district.

William Weaver, son of Mr. and Mrs. Grover Weaver of Centre Hall was taken to the Centre County hospital on Saturday upon advice of the family physician, exhibiting symptoms of appendicitis. Wednesday noon reports from the hospital were that he is still under observation, it being not definitely known whether an operation will be imperative.

Walter Hosterman, son of Mr. and Mrs. W. R. Hosterman of State College, former Centre Hall residents, has been elected captain of the Penn State soccer team for 1940. Coach Jeffrey of the State team declared young Hosterman the outstanding player on last year's team. Penn State's soccer team is something to rave about. It has gone through seven undefeated seasons in clashes with major colleges.

Careers in Engineering
By R. T. Strohm
Dean, International Correspondence Schools

THE engineer is aware that new applications of scientific knowledge are continually developing. The more that man knows about the forces and materials of nature, the better chance he has to rise them in some manner beneficial to the human race. The future is a great challenge to that trio of servants of mankind—the scientist, the inventor and the engineer—who among them, and frequently through overlapping activities, have been responsible for our present standards of living. They hold the key to the improvement of these standards in the future.

The engineer finds a larger and larger place in our system of national planning, in our natural industrial development and in our entire national economy.

One authority has pointed out that it is now a commonplace to say that the great day of the geographical pioneer is past and that the future is in the hands of the scientific pioneer. In very few places are there remaining vast unclaimed stores of natural resources of minerals, fertile soil and timber. We are faced with the necessity, not of finding more and more resources of the old kind, but of finding new resources which can be produced by science and engineering and the problems of handling these resources more efficiently and more wisely.

Never before have the opportunities in engineering been so great as they are now. Certainly never before has the need been so acutely felt.

WHEN THE CENSUS MAN COMES TO MR. FARMER'S HOME

He Will Ask You 232 Questions In 16 Sub-Divisions In Order to Get All the Facts.

This is the year for the census. It doesn't seem that ten years have passed since the last quiz was put to Mr. Farmer, as well as to others.

This article has to do with the farm census, which has 232 questions in sixteen sub-divisions. When it is completed the government should know more about the agricultural situation in the nation than ever has been known before. If it doesn't it isn't because every effort hasn't been made to find out every fact.

The questionnaire starts out with the usual age, race, color, etc., statistics. Then they ask you to state if you own or rent the farm and if you rent, who is the owner? What does he furnish as his share of the work animals, tractor power, fertilizer, seed and what yearly rent do you pay?

Sub-division Number Three is designed to find out the acreage of your farm. They want to know the total number of acres, the number crops were harvested from in 1939, the number no crops were harvested from in 1939, amount of cropland lying idle during 1939, land used for pasture and grazing in 1939 and the woodland on the farm.

Then you must tell the total value of the farm, how much of the total value of the farm you own, value of the buildings on the farm and the value of the implements, including automobiles and trucks.

Next comes the sections devoted to the financial setup. If you own all or part of the farm the census taker will ask you what the mortgage debt was on April 1, 1940, if any. He will want to know the annual contract rate of interest on the first mortgage down to a fraction.

In giving the amount of the taxes it will be necessary to include only the taxes levied on the part of the farm owned by you and on the personal property you may have on the farm. You will also be asked to list other land you may own that is not included in the particular farm in question.

"How many days in 1939 did you work for pay or income off the farm you operated?" is another question you will be asked, Mr. Farmer, and the census taker will want to know how many of these days were spent on non-farm jobs. You will also be required to tell how many years you have been on this farm and specify what other industries you have ever been engaged in.

One question that will not concern many Centre county farmers is on the subject of irrigation. The government wants to know from what land irrigated crops are harvested, how much irrigated land was used for grazing and pasture only and what irrigation enterprises supplied the water.

You will be asked whether or not you did any business with co-operative selling, buying or service organizations. One of the questions concerns the number of persons employed on your farm, whether or not they are unpaid members of the family, labor hired by the day or week or others including piece work and contract labor.

Questions 14 and 15, the expenditures you made on your farm during the year 1939. You will have to state the amount you paid for hay, grain, mill feed and other products for use as feed for domestic animals and poultry; amount expended for purchase of farm implements and machinery, including automobiles, tractors, motortrucks and trailers; amount expended for gasoline, distillate, kerosene and oil for use on the farm; amount expended in 1939 for building materials, including lumber, roofing materials, hardware, cement, paint, fencing, etc., for use on the farm.

Then the government wants a census of what you have on your farm. They will ask you to tell how many automobiles you have, how many motortrucks, how many tractors. They will ask whether or not your farm is lighted by electricity, and if so what is the source of your power. You will even be asked what kind of road your farm is located on.

Questions 14 and 15 are lengthy in the respect that you must give a complete account of the number of animals, amount of crops and what you did with each during 1939.

The last question asks you the value of products used and of forest products sold in 1939.

Orphans' Court PUBLIC SALE.

Estate of William H. Blauser, deceased, the undersigned, will offer at public sale at the Court House in Bellefonte Borough, on FRIDAY, JANUARY 26TH, 1940, at 2 o'clock P. M., the following REAL ESTATE.

Situate in Potter Township, Centre County, Pennsylvania.

THE FIRST THEREOF, situate in the Village of Pottery Mills, BEGINNING at a post on the Centre and Kishacoquillas Turnpike, thence North 56 1-2 degrees East 39.6 perches to a stone corner of land formerly owned by David Wasson, thence along same South fifteen degrees East 48 perches, thence South 69 degrees West 12.8 perches to a stone on the above mentioned Turnpike, thence along said Turnpike, North 26 degrees West 10 perches, thence along same, North 41 degrees West 33 perches to the place of beginning. CONTAINING five (5) acres and 117 perches neat measure.

THE SECOND THEREOF, BEGINNING at a post in an alley, thence along lands of Alexander McCoy, North 69 1-2 degrees East, 36 perches to stone, thence by lands of Allison heirs South 11 degrees East four and five-tenths perches to a stone, thence by land of same South 4 1-2 degrees West 11.5 perches to a stone, thence by lands of Catherine Carson South 70 degrees West 8 perches to a post, thence by same North 12 1-2 degrees West 1.5 perches to a stone, thence by same South 89 degrees West 14 perches to a post, thence by same South 69 degrees West 13.2 perches to a stone, thence by land of J. O. Stover, North 15 degrees West 12.5 perches to the place of beginning.

CONTAINING three (3) acres and twenty perches, be the same more or less.

THE THIRD THEREOF, BEGINNING at a wild cherry corner, it being the North-east corner of a larger tract of O. J. Reichley, thence by blue line South 25 degrees East, 63 perches to stones, thence by residue South 65 degrees West, 64 perches to stones, same, North 25 degrees West, 63 perches to stones on blue line, thence by same North 65 degrees East, 64 perches to place of beginning. CONTAINING twenty-five (25) acres and 32 perches, neat measure.

TERMS OF SALE: 25 per cent of the purchase price in cash at sale, and the balance in cash upon confirmation of sale and delivery of deed.

Evenings (7:30 p. m.) All Seats Reserved \$1.10, tax included

This picture will be presented exactly as its premiere showing at Atlanta and Broadway . . . in its entirety.

THIS PICTURE will be shown only at advanced prices—at least until 1941.

KITCHEN SNACKS for the Young Crowd

A kitchen party is always fun after the big game or a dance. Have the waffle iron and pitcher of batter handy and let the young folks help themselves.

By Louise Brown

THESE crisp days, when the younger crowd is bubbling with energy, and in a dither about football games, school dances and other activities, do you sometimes find your kitchen raided without ceremony? Why not work on the theory of making home an exciting place (at least you know where they are after the dance) and furnish the young fry with the makings of a snack.

Waffles are always popular, so make a pitcher of batter and have it ready in the refrigerator, set up the waffle iron and percolator and let the boys and girls gather around the kitchen table and help themselves.

One of the prepared biscuit flours can be whisked into a smooth waffle batter in a jiffy. You'll find the directions on the package. If you want a sweet dessert waffle, just add a tablespoon of sugar for each cup of the flour mixture.

Here's a nut waffle recipe that's good for the sweet tooth. Have ice cream ready in one of your refrigerator trays to serve on the hot waffle sections, topped with butterscotch or chocolate sauce, fresh or canned fruit.

NUT WAFFLES

- 2 cups flour, sifted before measuring
- 4 teaspoons baking powder
- 1/2 teaspoon salt
- 2 tablespoons sugar
- 1-1/2 cups milk
- 2 eggs
- 4 tablespoons melted butter
- 1/2 cup chopped nut meats

Assemble and measure all ingredients before starting work. Mix and sift dry ingredients. Add the milk slowly, using electric mixer on High speed. Add the eggs, one at a time, and blend well after the addition of each egg. Add the melted butter and continue beating until mixed. Add chopped nuts. Have waffle iron heated to correct temperature for baking. Place a tablespoon of batter on each section of waffle grid, close cover and bake for 3 minutes or, if waffle iron is automatic, until end of baking period is indicated. Repeat, until all of batter is used.

Cornmeal waffles will make a hit with crisp bacon or sausages and hot maple syrup.

CORNMEAL WAFFLES

- 1-1/2 cups cornmeal
- 3/4 cup bread flour, sifted before measuring
- 4 teaspoons baking powder
- 1/2 teaspoon salt
- 1/2 teaspoon soda
- 2 tablespoons sugar
- 1-1/2 cups buttermilk
- 2 eggs
- 2 tablespoons melted butter

Assemble and measure all ingredients before starting work. Sift dry ingredients together. Beat eggs until light, using the mixer on High speed; add buttermilk slowly. Add dry ingredients using Medium speed. Add melted butter. Allow 1 tablespoon of mixture to each section of waffle iron. Bake 3 to 4 minutes on a waffle iron that has been preheated.

QUESTION ANSWER

Which are the only cough drops containing Vitamin A? (CAROTENE)

YOU CAN HAVE BEAUTIFUL, GLARE-FREE, SHADOWLESS INDIRECT LIGHT

New, Revolutionary

LIGHT ADAPTER

1 Start with the old ceiling fixture you already have. No new wiring, fuses or bother.

2 Then simply screw in the attractive new type fixture shown above . . . available at local stores.

3 Presto! Just insert a Silvered Bowl lamp . . . and say goodbye to harsh glare!

NOW YOU CAN HAVE glare-free, shadowless Indirect Lighting in any room in your house . . . with very little trouble, at only a fraction of its former cost! A single-unit LIGHT ADAPTER . . . like the one shown at the upper left . . . costs only \$2.90, including the Silvered Bowl lamp, and you can put it into place in a matter of 3 minutes. It's unusually attractive and gives an abundance of light all over the room!

In addition, you can get "Snap-On" modernizers for your center fixtures for as little as 70¢ per socket.

On Display AT ELECTRICAL, HARDWARE, VARIETY AND DEPARTMENT STORES . . .

West Penn Power Co.

BIG BARGAIN \$2.90 COMPLETE

6 "EXTRA" HELPS quickly relieve DISTRESS of CHILDREN'S COUGHS DUE TO COLDS

DON'T "take chances" with unknown products to relieve discomfort of your child's spasmodic, croupy coughs caused by colds. Use "Children's" Musherole! Musherole gives such QUICK relief because it's not "just an ordinary salve." Rub it well on your kiddie's chest, throat and back. It soothes and stimulates surface circulation and helps break up local congestion and pain. Its soothing vapors ease breathing. 4¢. Approved by Good Housekeeping Bureau.

CHILDREN'S MUSEROLE MILD
