WINTER MONTHS BEST FOR RURAL RENOVIZE WORK

Spring plowing is the next big job on the farm. Until that time arrives, every Pennsylvania farmer at this season of the year will devote all possible time to the improvement and repair of farm buildings and equipment.

But this year the farmers in their repair, rebuilding and remodeling activities will definitely cooperate in a state-wide movement, a "Renovize Campaign" that is a feature of the big job-finding drive known as the Job Mobilization Program.

Some suggested farm renovize projects include: repair or installation of lighting, plumbing, heating, and lighting rod systems; doors, including storm doors and windows; termite control, fences, landscaping, walks, wells and cisterns, roofing, painting, barn pens, bins, pruning trees and shrubbery, transferring plants and trees, and erection of various necessary farm buildings.

PROOF OF REPENTANCE

When 200 Iowa farmers, most of whom had formerly voted the Republican ticket, attended a Jackson Day dinner in Iowa at \$25 per plate, it means something. It is conclusive proof that those farmers are in the midst of plenty and that they are thoroughly "back" on the farm program of the Democratic party.

FEDERAL AID SAVES MILLIONS FROM WRECKAGE OF HURRICANE

The largest timber-salvaging job on record is now nearly completed. During the freak tropical hurricane which hit New England in September 1938 more than two billion board feet of timber were blown down, enough to circle the earth five times with a boardwalk three feet wide.

Up to December more than 613,000,000 feet in scale logs had been turned over to the Northeast Timber Salvage Association, established in the six New England States, which is handling actual salvage operations.
