NATIONAL SELF-DISCHARGING STEEL SPRING TOOTH Horse Rake! atented Sept. 9th, 1862, and Re-issued Dec. 6th, 186

THIS Rake is an Independent Steel THIS Rake is an Independent Steel

Spring Tooth Rake, and has proven itself to be the most perfect HORSE RAKE now in mas. With this Rake the Horse does all the work, both the Raking and Discharging, by the Driver moving a lever a few inches, which throws it into gear, and as the horse moves forward it raises the teeth and discharges its load, and then shifts out of gear itself, the teeth dropping down ready to take again. By this operation it is so easily understood that the Raker has hardly any work to do.

Important improvements have been made of late, making it very simple and durable in its construction. Thousands of them have been sold in the few last years and given the best kind of satisfaction.
