cured above two or three minutes, and grass does not attain half its growth by the those around him to remain perfectly fourth of July, and, if cut so early, would want is his watch struck the hours like a its superior quality. It dries up rapidly, the and, it then being on the stroke of uices being only partially developed, and it the watch would soon indicate into lacks nutriment. Any one who has had ocpossession it had fallen. There was a casion to mow a strip of such in the early part lence; but the eye of the proprietor of July, and to cut the grass adjoining this an individual who was trying to edge strip four weeks latter, will be struck with obrom the vicinity, and he immediately serving the difference, not only in quality, ced the skulker as the thief. The latbut in quantity of the two cuttings. There is also a great deal of upland meadow, where seized, and the watch found upon and as the owner quietly put it in his grass is of slow growth and late, and where he remarked, "The watch does not the quality of it for hay improves nearly as he hours, but I thought my assertion long as it continues to grow, retaining its good color and rich aroma quite late in the season. did would enable me to strike out the In seasons of low temperature, such meadows es your watch go well?" asked a bywill furnish an excellent quality of hay, cut as late as the first of September.-Country ooth goes well and returns well," replied Gentleman.

.

FEEDING MILCH Cows.-We do not, as a ARE THE BEST BOYS.-A man once general rule, feed liberally enough. We do ised for a boy to assist in the work of not use a sufficient variety of food for cows in op and to go errands, etc. A few hours milk, nor is the quantity anything like what he morning's papers announced that might be fed to advantage, either in summer boy was wanted, his shop was thronged or winter: Many farmers seem to act as it applicants for the situation. Boys of the food consumed was so much to be added grade from the neatly dressed intelligent to the cost of keeping rather than so much raw material used in the manufacture of milk. down to the ill-bred clumsy boor, came in hope of a situation or to see if an op-If they owned a mill they would feed into it nity offered for a speculation. all the grain it would grind; try to keep it running at full speed, and furnish the largest man, at a loss to decide among so determined to dismiss them all and amount of its products of which it were capa

a plan which he thought might lesson ble, taking into account, of course the wear umber and aid him in his difficult deci- and tear of machinery. They would try to get the largest yield consistent with economy and good management. the morning following an advertisement The same rule ought to be adopted in feedred in the papers, to this effect:

nted to assist in a shop, a boy who obeys | ing cows. Instead of being content with small other." Now, my little friends, how or even ordinary yield, we should so feed as boys, think you, came to enquire for to get all we can consistently with a proper situation after this advertisement ap- regard to the health and protracted usefulness d? If I am rightly informed, among all of the animal. They have carried the matter ds of the great city, who were wanting of feeding to a far higher state of perfection in teans of earning a living or getting a Europe than we have in this country. It may ledge of business, there were but two who almost be said to be reduced to a science, so fearlessly come forward and say, "I minute and careful have many of the experiments and systems of feeding become.

LIQUID MANURES .- Urine diluted with five NOING .- An English lady at the Court o na, with whom an "Imperial Highness", or six waters, or house-sewage, which is beted three times on the same evening, flat- ter, as including the drainage from sinks and by his stitention, frankly expressed her water closets, is excellent for flower beds, and Acation at the compliment. "I did not especially for roses, and may be applied all the d it as a compliment," was the answer. -- | period of growth from early Spring to late Auen," said the lady, "your Highness must tumn. Soot, properly diluted, may be similarery fond of dancing," "I detest dancing," ly applied. Guano is as good for the purpose the unsatisfactory response. "What, as home sewage, but not better. Bone dust may I ask, can be your Imperial High- is good, pointed into the surface of the soil,motive for dancing ?" "Madam," was Sheep's dung makes good liquid manure, but exalted personage's curt reply, "my med- is not so powerful as either house sewage or guano. is there any person whom you partic- need no diluting; at least we never mix with rly wish me to marry ?" said a widow ex- it any water. In conclusion we will add the ant to her dying spouse, who had been expression of our conviction, that, for the gennewhat of a tyrant in his day. "Marry the erality of soils and crops, there is no liquid il, if you like," was the gruff reply. "Oh, manure equal to house sewage. For potted plants, especially if soft-wooded, we use it my dear, you know it is not lawful to marry much weakened with water, and not oftener than once a week. A knowledge of the soil, HAVE you the 'Exile of Erin' here ?" asked and of the plant and its health, is needed beady, a few days since, of a clerk in a book fore any one can say what manure can prore. "No ma'am," was the answer; bably be most suitable.-American Journal ain't got no egg's ile ; we've got a prime artiof Agriculture.

> LAND MEASURE. --- Every farmer should have a rod measure---a light, stiff pole--just 16 1-2 feet long, for measuring land. By a little practice he can learn to step a rod at five paces, which will answer very well for ordinary farm work. Ascertaining the number of rods in width and length of a lot you wish to measure, multiply one into the other, and divide by 160, and you have the number of acres, as 160 square rods makes a square scre.

ally don't know, but it strikes me it was a and of sugar." Goop ADVIOR --- The late Horace Mann A FELLOW once pretended to have seen a once said if a father wishes to give his son a ghost, and was asked what the apparition legacy that will endure him while life exists, and retiring they he, "my pretty id to him. "How should I know ?" he re- let him send him to an institution where he colets: the more mo you live that you have been kinsed by a duke.' remists her household expenses accordingly Do not withhold this knowledge, in order "Ah, but," replied the child.
