The plan appears feasible, and we all know that a sheep killing dog is not likely to encounter the horns of cattle. Such dogs are generally cowards, and cattle have an instinctive dis- like to them and will resist their presence: "Your cattle, both heifers and bullocks, are mated and herded with lambs, until they become raturally attached to each other, the early training of the young horned stock being to bait them with dogs, teasing and fretting them, until they uterly detest

ANEODOTE OF HUME.—An amusing anec- dote is told of Dr. Robinson, of Scotland, who, with a ready wit, drew an illustration from a misfortune of David Hume to point an argu- ment. It was as follows: The celebrated Mr. Hume wrote an essay on the sufficiency of nature; and the no less cele- brated Dr. Robertson on the sufficiency of Revelation, and the insufficiency of the light of nature. Hume came one evening to visit Robertson, and the evening was spent on the subject. The friends of both ware present, and it is said that Robertson reasoned with accustomed clearness and power. Whether Hume was convinced by his reasoning or not	are compiled from every possible source of in- terest—from the press; from the enactments of Congress; from the resolutions of conven- tions; from the decisions of the Supreme Ceurt; from the speeches of the Executive.— They present through the discriminating judg- ment of their author the completest journal of the country's life for the past five years and the strongest argument in support of Repub- blican principles which it is possible to pre- sent to an intelligent public. The labor re- quired for the preparation of these volumes is one such as any man with a less clear insight of the public necessity or with a less deter- mined energy and industry than Mr. MoPHER- son's, would shrink from. These documents are sold and distributed by thousands throughout the entire country, and in their influence for the spreading of truth and correct opinion among the people are worth a legion of orators. Beyond the special object of preparing these political pamphlets Mr. McPHERSON constantly lays under contri- bution the press of the entire country for such articles as may, for any purpose, at any period, serve to throw light upon the history of the times. In this manner he has gained and is gaining for the future such a compendious expression of public opinion as perhaps will be vainly sought elswhere. In fine, by the mere force of systematic industry, no man is to-day serv-	drowned, and disemboweled—women have been scourged, outraged, and murdered, and a band of "Regulators," countenanced by lo- cal authority, and defying that of the State, threaten the life of every negro or radical whom they may choose for a victim. THERE is a curious story in 'Houston, Tex- as, of an indigent individual who kicked the cover off the coffin the other day, as they were on the way to the "dismal grave." It seems that he was foolish enough to suppose that he wasn't quite dead, and hence the ca- tastrophe. After some dispute with the pall- bearers, whether he was in his "right sense and mind," he was brought back and put to bed, with a fair chance of recovery. In consequence of alleged bad manage- ment of the affairs of the Antietam Cemetery, Gov. Fenton, of New York, feels justified in refusing to pay over the entire appropriation made by the Legislature of that State until a special commission shall have presented a satisfactory report upon the past and present management. Gov. Geary has also appointed a special commission for a like purpose. SENATOR Frelinghuysen, in a speech at Newark on Wednesday evening, in speaking of the public debt, said that this generation ought never to attempt to pay a dollar of the principal of it. The next generation will be arrer in number and in wealth, and a burden	hogshead tub, put in two or three inches of hard wood ahes, the same depth of bones; then ashes and bones until full; pound or press solid as convenient; fill with water or urine, all that will absorb. If done in the spring or summer, by the spring it will shov- el out fully decomposed, the bones being as soft as chalk. Then add all your hen manure, shovel and rake it over once a week, for three or four weeks before planting time; by that time it will be finely powdered. Put about equal to a handful of compost into a hill, for corn, pe- tatoes, squasses, melons, &c., when it will be found to forward the crops to a wonderful de- gree. DOGS VS. SHEEP.—We take the following from an article contributed to the "Ameri- can Stock Journal" by R. C. Kendall, and commend the practice to our farmers. The plan appears feasible, and we all know that a sheep-killing dog is not fikely to encounter the horns of cattle. Such dogs are generally cowards, and cattle have an instinctive dis- like to them and will resist their presence : "Your cattle, both heiters and bullocks, are mated and herded with lambs, until they become naturally attached to each other, the early training of the young horned stock being to balt, them with dogs, teasing and factting them, until they uterly detest the whole capine race, and at sight of the cur

It is worth a great deal more than a bag of money. I have no doubt saying no as if you did not mean it, has ruined many a child. When a bad boy or girl tries to coax you to do a wrong thing, say "no," as if you meant "no," and no mistake. When Satan whispers for you to serve him and do wrong, and make you great promises, as he did'to the Lord Jesus in the wilderness, do not say "no," easy, but answer him as Je- sus did: "Get thee behind me, Satan." That is a "no" he can understand. "Whatsoever ye do, do it heartily, as to the Lord, and not unto men." ANECDOTE OF HUME.—An amusing anec- dote is told of Dr. Robinson, of Scotland, who, with a ready wit, drew an illustration from a misfortune of David Hume to point an argu- ment. It was as follows: The celebrated Mr. Hume wrote an essay on the sufficiency of nature ; and the no less cele- brated Dr. Robertson on the sufficiency of Revelation, and the insufficiency of the light of nature. Hume came one evening to visit Robertson, and the evening was spent on the subject. The friends of both were present, and it is said that Robertson reasoned with accustomed clearness and power. Whither Hume was convinced by his reasoning or not we cannot tell; but at any rate he did not ac- knowledge his conviction. Hume was very	are compiled from every possible source of in- terest—from the press; from the enactments of Congress; from the resolutions of conven- tions; from the decisions of the Supreme Court; from the speeches of the Executive.— They present through the discriminating judg- ment of their author the completest journal of the country's life for the past five years and the strongest argument in support of Repub- blican principles which it is possible to pre- sent to an intelligent public. The labor re- quired for the preparation of these volumes is one such as any man with a less clear insight of the public necessity or with a less deter- mined energy and industry than Mr. MoPHER- son's, would shrink from. These documents are sold and distributed by thousands throughout the entire country, and in their influence for the spreading of truth and correct opinion among the people are worth a legion of orators. Beyond the special object of preparing these political pamphlets Mr. MoPHERSON constantly lays under contri- bution the press of the entire country for such articles as may, for any purpose, at any period, serve to throw light upon the history of the times. In this manner he has gained and is gaining for the future such a compendious expression of public opinion as perhaps will be vainly sought elswhere. In fine, by the more force of systematic industry, no man is to-day serv- ing the Republican organization with such happy success. This industry is the more ad- mirable from the fact that it gives itself scarce-	drowned, and disemboweled-women have been scourged, outraged, and murdered, and a band of "Regulators," countenanced by lo- cal authority, and defying that of the State, threaten the life of every negro or radical whom they may choose for a victim. THERE is a curious story in Houston, Tex- as, of an indigent individual who kicked the cover off the coffin the other day, as they were on the way to the "dismal grave." It seems that he was foolish enough to suppose that he wasn't quite dead, and hence the ca- tastrophe. After some dispute with the pall- bearers, whether he was in his "right sense and mind," he was brought back and put to bed, with a fair chance of recovery. In consequence of alleged bad manage- ment of the affairs of the Antietam Cemetery, Gov. Fenton, of New York, feels justified in refusing to pay over the entire appropriation made by the Legislature of that State until a special commission shall have presented a satisfactory report upon the past and present management. Gov. Geary has also appointed a special commission for a like purpose. SENATOR Frelinghuysen, in a speech at Newark on Wednesday evening, in speaking of the public debt, said that this generation ought never to attempt to pay a dollar of the principal of it. We thank the boy for his secret. It is worth a great deal more than a bag of money. I have no doubt saying no as if you did not mean it, has ruined many a child. When a bad boy or girl tries to coax you to do a wrong thing, say "no," as if you meant "no," and no mistake. When Satan whispers for you to serve him and do wrong, and make you great promises, as he did'to the Lord Jesus in the wilderness, do not say "no," easy, but answer him as Je- sus did: "Get thee behind me, Satan." That is a "no" he can understand. "Whatsoever ye do, do it heartily, as to the Lord, and not unto men." ANECDOTE OF HUME.—An amusing anec- dote is told of Dr. Robinson, of Scotland, who, with a ready wit, drew an illustration from a misfortune of David Hume to point an argu- ment. It was as follows: The celebrated Mr. Hume wrote an essay on the sufficiency of nature ; and the no less cele- brated Dr. Robertson on the sufficiency of Revelation, and the insufficiency of the light of nature. Hume came one evening to visit Robertson, and the evening was spent on the subject. The friends of both were present, and it is said that Robertson reasoned with accustomed clearness and power. Whither Hume was convinced by his reasoning or not we cannot tell; but at any rate he did not ac- knowledge his conviction. Hume was very much of agentleman, and, as he rose to de- part, bowed politely to those in the room, while, as he retired through the door, Robert-	are compiled from every possible source of in- terest—from the press; from the enactments of Congress; from the resolutions of conven- tions; from the decisions of the Supreme Court; from the speeches of the Executive.— They present through the discriminating judg- ment of their author the completest journal of the country's life for the past five years and the strongest argument in support of Repub- blican principles which it is possible to pre- sent to an intelligent public. The labor re- quired for the preparation of these volumes is one such as any man with a less clear insight of the public necessity or with a less deter- mined energy and industry than Mr. MoPHER- son's, would shrink from. These documents are sold and distributed by thousands throughout the entire country, and in their influence for the spreading of truth and correct opinion among the people are worth a legion of grators. Beyond the special object of preparing these political pamphlets Mr. MoPHERSON constantly lays under contri- bution the press of the entire country for such articles as may, for any purpose, at any period, articles as may, for any purpose, at any period, ar	drowned, and disemboweled-women have been scourged, outraged, and murdered, and a band of "Regulators," countenanced by lo- cal authority, and defying that of the State, threaten the life of every negro or radical whom they may choose for a victim. THERE is a curious story in Houston, Tex- as, of an indigent individual who kicked the cover off the coffin the other day, as they were on the way to the "dismal grave." It seems that he was foolish enough to suppose that he wasn't quite dead, and hence the ca- tastrophe. After some dispute with the pall- bearers, whether he was in his "right sense and mind," he was brought back and put to bed, with a fair chance of recovery. In consequence of alleged bad manage- ment of the affairs of the Antietam Cemetery, Gov. Fenton, of New York, feels justified in refusing to pay over the entire appropriation made by the Legislature of that State until a special commission shall have presented a satisfactory report upon the past and present management. Gov. Geary has also appointed a special commission for a like purpose. These documents are sold and distributed by thousands throughout the entire country, and in their influence for the spreading of truth and correct opinion among the people are worth a legion of grators. Beyond the special object of preparing these political pamphlets Mr. MoPHERSON constantly lays under contri- bution the press of the entire country for such articles as may, for any purpose, at any period, serve to throw light upon the history of the times. In this manner he has gained and is gaining for the future such a compendious expression of public opinion as perhaps will be vainly sought elswhere. In fine, by the more force of systematic industry, no man is to-day serv- ing the Republican organization with such happy success. This industry is the more ad- mirable from the fact that it gives itself scarce- ly an interval of rest. From the first session of the Thirty-seventh Congress to which Mr. MoPHERSON was returned the youngest mem- ber, until the present time, he has passed his time between his/home at Gettysburg and the	drowned, and disemboweled—women have been scourged, outraged, and murdered, and a band of "Regulators," countenanced by lo- cal authority, and defying that of the State, threaten the life of every negro or radical whom they may choose for a victim. THERE is a curious story in Houston, Tex- as, of an indigent individual who kicked the cover off the coffin the other day, as they were on the way to the "dismal grave." It seems that he was foolish enough to suppose that he wasn't quite dead, and hence the ca- tastrophe. After some dispute with the pall- bearers, whether he was in his "right sense and mind," he was brought back and put to bed, with a fair chance of recovery. In consequence of alleged bad manage- ment of the affairs of the Antietam Cemetery, Gov. Hume was very much of agentleman, and, as he rose to de- part, howed politely to those in the room, while, as he retired through the door, Robert- son took the light to show him the way. "O, sir," he continued, "I find the light of nature always sufficient," as he bowed cn. The street door was open ; presently, as he bowed along the entry, he sumpled over	are compiled from every possible source of in- terest—from the press; from the enactments of Congress; from the resolutions of conven- tions; from the decisions of the Supreme Ceurt; from the speeches of the Executive.— They present through the discriminating judg- ment of their author the completest journal of the country's life for the past five years and the strongest argument in support of Repub- blican principles which it is possible to pre- sent to an intelligent public. The labor re- quired for the preparation of these volumes is one such as any man with a less clear insight of the public necessity or with a less deter- mined energy and industry than Mr. MoPHER- sox's, would shrink from. These documents are sold and distributed by thousands throughout the entire country, and in their influence for the spreading of truth and correct opinion among the people are worth a legion of grators. Beyond the special object of preparing these political pamphlets Mr. MoPHERSON constantly lays under contri- bution the press of the entire country for such articles as may, for any purpose, at any period, serve to throw light upon the history of the times. In this manner he has gained and is gaining for the future such a compendious expression of public opinion as perhaps will be vainly sought elswhere. In fine, by the more force of systematic industry, no man is to-day serv- ing the Republican organization with such happy success. This industry is the more ad- mirable from the fact that it gives itself scarce- ly an interval of rest. From the first session of the Thirty-seventh Congress to which Mr. MoPHERSON was returned the youngest mem- ber, until the present time, he has passed his time between his/home at Gettysburg and the capital wholly in the public service. As a clerk of the House of Representatives	drowned, and disemboweled—women have been scourged, outraged, and murdered, and a band of "Regulators," countenanced by lo- cal authority, and defying that of the State, threaten the life of every negro or radical whom they may choose for a victim. THERE is a curious story in Houston, Tex- as, of an indigent individual who kicked the cover off the coffin the other day, as they were on the way to the "dismal grave." It seems that he was foolish enough to suppose that he wasn't quite dead, and hence the ca- tastrophe. After some dispute with the pall- bearers, whether he was in his "right sense and mind," he was brought back and put to bed, with a fair chance of recovery. In consequence of alleged bad manage- ment of the affairs of the Antietam Cemetery, Gov. Fenton, of New York, feels justified in refusing to pay over the entire appropriation made by the Legislature of that State until a special commission shall have presented a satisfactory report upon the past and present management. Gov. Geary has also appointed a special commission for a like purpose. SENATOR Frelinghuysen, in a speech at Newark on Wednesday evening, in speaking of the public debt, said that this generation ough never to attempt to pay a dollar of the principal of it. The next generation will be arger in number and in wealth, and a burden that would break the back of one man can be borne casily by two. A HARLETOREM OF unparalleled violence swept over Philadelphia, on the 25th ult, the stones varying in size from a cherry-stone to a hen's egg. The <i>Bulletin</i> estimates that fully a million panes of glass were broken, involving a cost of \$200,000. As an evinence of the quantity of hail that fell it may be stated that near noon the next day a conglomerate mass	hogshead tub, put in two or three inches of hard wood shies, the same depth of bones; then ashes and bones until full; pound or press solid as convenient; fill with water or urine, all that will absorb. If done in the spring or summer, by the spring it will shov- el out fully decomposed, the bones being as softas chalk. Then add all your hen manure, shovel and rake it over once a week, for three or four weeks before planting time; by that time it will be finely powdered. Put about equal to a handful of compost into a hill, for corn, pe- tatocs, squashes, melons, &c.', when it will be found to forward the crops to a wonderful de- gree. Does vs. SHEEP.—We take the following from an article contributed to the "Ameri- can Stock Journal" by R. C. Kendall, and commend the practice to our farmers. The plan appears feasible, and we all know that a sheep killing dog is not fikely to encounter the horns of eattle. Such dogs are generally cowards, and cattle have an instinctive dis- like to them and will resist their presence : "Your cattle, both heifers and bullocks, are mated and herded with lambs, until they become raturally attached to each other, the early training of the young horned stock being to bit: them with dogs, teasing and firsting them, until they uterly detest the whole canine race, and at sight of the cur one of the trained bovine will set up a roar, and make a furious drive at the intruder, and away goes the deg for his life as fast as he can leg it; or, presuming to show fight, he gets a thrust or toss into the air that punches or chucks all the appetite for a meal of mutton out of him in a wink. Sometimes each of the bovine alleep guardians is provided with a hell, and then upon the occasion of a canine
