"Yesterday the greatest question was decided that ever was debated in America; Spent a few days at Williamsport, attend-Clover Seed, decided among men. A resolution was passed, without one discenting colony, that these United States are, and of right ought to be, free and independent spaces. The day is passed. By the way; have you heard of the new party. "Peace Union," which has presented the name of Dr. Robert Simpson, of Liverpool, Perry co., Pa. for President, and Mr. ELDRIDGE, of Baltimore, for Vice President. They seem determined to revolutionize the world, and for this purpose have chosen Foutz's Valley as their Headquarters. They had a convention in Harrisburg a few days ago, which President Simrson pronounced a grand success, but of which they will tell nothing. It was unfindable. Probably it would be policy on the part of Gen. GRANT to withdraw from the contest. Poor CHASE; he will soon be so low that it will require very sharp eyes to see him. I am sorry for him. IMPORTANT DECISION.—Chief Justice Woodward of the Supreme Court of Pennsylvania, has delivered the following opinion which is important to our merchants, manufacturers, workingmen, and, in fact, the people of the whole country. He says: "I find 'HOOFLAND'S GERMAN BITTERS' IS NOT AN intoxicating beverage, but is a good tonic, useful in disorders of the digestive organs, and of great benefit in cases of debility, and want of nervous action in the system." No better recommensuation could be given to so valnable a tonic as this celebrated standard Bitters. "Hoodand's German Bitters" contains no Alcohholic material. Hoofland's German Tonic is a mixture containing all the ingredients of Hoofland's Bitters, combined with pure Santa Cruz Rum, orange, anise,

THE WORLD'S MOWER AND REAPER, THE WORLD'S MOWER AND REAPER,

This is an entire new machine, but Judging from Its onstruction and the testimonials it has received, It will be the testing machine. The genring is cut out of foolig from making every wheel and cog exact, fitting up close, and running as true as a clock, which makes the use bines since lighter of drift, and no cutting of cogs or cear. The gearing is all closed in a tight case the same as a watch, entirely excluding water, dirt, or grass, and udered preventing everything that becalculated to prove infortions to the machinery. To it, you simply open the aid when all the oling places are exposed and conveni unders preventing continues. To it, you simply open the industrial at the machinery. To it, you simply open the individual when all the ording places are exposed and conveniently offed. The ture are all encased the exist as the same way and when once lightened down—there is no danger of working loose, as the convenient with other machines. The Company do not be conveniently as the convenient with other machines.
