?

ed. This may appear a small matter, in a large crop allowed to ripen dead the loss will be very considerable. 3. Early harvesting gives more time for securing the grain properly, without being hurried to prevent loss by shelling out if the weather is dry, or from sprouting if the weather is wet. Among the scientific reasons in support of carly harvesting are these: At twelve or fourteen days before becoming "dead ripe" the grain is in the milk state, and there is hurt listle woody fibre, almost the entire THE undersigned, having bought ont J.
