This territarie is composed of the best fertilizing chemicals that can be had. Ture no oil of wirriot; it does not contain any amon ing, therefore I do not use it. Neither do I use lime nor ashes. THE OBJECT OF THE CHEMICAL FERTILIZER is to introduce a fertilizer that will had for a series crops—not only for one. It contains sufficient and make it flies early matter to mature the grain and make it flies early matter to mature the grain and make it rip to early, while the amounts roces the growth.
