A common fault is to use too coarse COURT.-The Nevember Court will weeks. The first week will be occupied in ignited coal. The wood should be of been the most fortunate of all Philadelphis with civil causes. The attendance of Jurors, witnesses, and clients, will furnish a the coal will remain on the top of it, and not hope in the ordinary way to dispose of to send in money; and as we are just now The amount of kindling wood required common mistake is to use too large sized coal. A good rule, where stoves or

through the grate.

CHHNGE OF HOURS.-On Monday last, another change was made in the time table of the Gettysburg Railroad. The first great draught. A coal stove or furnace should be so constructed that its draught can be perfectly controlled. The bottom draught should admit of being closed air tight, as nearly as is possible to make it, and there ought always to be provision made for a top draught. If, however, the draught of the chimney should be so strong that air in too great quantities is drawn in at the bottom when the dampers are closed, a damper in the pipe which will close it partially, must be employed, though in sluggish chimneys

re-fitting their Church, introducing new it ought always to be avoided when possistoves, re-modelling the pews, &c. The ble. The practice of putting ashes on the top THE CONCERT.—Don't forget the Conclinkers, although it answers the purpose cert in Agricultural Hall to-morrow very well in other respects. Damp coal play-ground for the children was never (Thanksgiving) night. There will be good screenings are better, and may be economically burned in this manner. If a music and other attractions. Tickets to be had at A. D. Buehler's, Fahnestock coal fire gets very low, the quickest way Bros, and at the door-25 cents; children to extinguish it is to rake it at the bottom. To, preserve fire under such circumstances, a little coal should be placed on may be added, and the raking deferred In Arreans-John W. Refrowes this until it has got well ignited.
