FERTILITY OF THE SOIL.

It is often a question in choosing farms, how cheap is the land? and how near is the market? But a question of quite as much importance is, what are the facilities for keeping up the fertility of the soil? More common sense is required to judge properly of this than of any other question possible. The price of land and the market question can be ascertained on the spot, and at the time; but the manure question is one which requires judgment and foresight to determine satisfactorily.

The *American Farmer*, of Baltimore, says the great Virginia cry now is, "smaller grain-fields and larger pastures," meaning thereby that more home-made manure is one of the essentials of good farming. We of the North have partially learned this lesson already; but a look at many of our neighbors' fields, and of our own, for that matter, will show that we have rather got the lesson by rote, as we often do our learning in the schools, and not that we thoroughly understand its importance. We have rarely known a farmer near a large town, who kept his farm in a high state of fertility, who did not make money by farming; while we have noticed those who failed were usually those who did not estimate the importance of high manuring, or neglected it if they did know how. Yet we have known a few who have failed in attempting to manure well, through acting on the idea that manure was profitable *at any cost*. This is a great mistake. The whole subject is one requiring a great amount of good judgment—the exercise of the strongest common sense.

BATHING HORSES.—A correspondent says he washes sweated horses in cold water with beneficial results, both in summer and winter. After washing, the animal should be rubbed dry, as far as practical and the legs especially. Should the hair on them be too long to admit of this being sufficiently done, flannel bandages should be put on, and a woolen rug thrown loosely over, but without the roller. In the course of an hour the horse will be tolerably dry, and should then have another rub down, and be clothed in the ordinary manner. If horses were treated in a more rational manner than is often the case, with pure air and scrupulous cleanliness, disease would be far less common.

What more refreshing to a man after a hard day's shooting, or other laborious exercise, than a warm or cold bath? And I believe it to be so to the horse. To the tired huntera warm foot-bath and fomentation, if the animal is sufficiently quiet, is most refreshing. Some years ago I visited the royal stables at Buckinghan Palace. There, as I was informed—and at the time witnessed the operation—every horse, summer and winter, was washed from head to foot with cold water, after returning from work, no matter whether it had been out one hour or six. After the ablution, scraping, scrubbing, etc., a kind of web cloth was thrown over to admit of evaporation, and the horse was afterward rubbed down and clothed as usual, in the course of an hour or two. I consider the plan rational and conducive to the health of the horse, if only ordinary care is taken.

BREEDING sows require a variety of nourishing food, clover, hay, milk, boiled potatoes, bran, etc. Do not expose to cold winds or drifting snow.

SOME farmers leave their grindstones exposed to the hot sun, in summer, causing them to harden, besides injuring the wooden frames.

Rev. Mrs. Phœbe A. Hanniford has received and accepted a call to the pastorship of a Universalist church in New Haven.

THE WORLD,

DODGES' OHIO AND BUCKEYE

Reapers and Mowers.

A careful examination of these machines will commence any one of their superior merits over all others, in strength, durability, ease of draft, and reliability in work, on all kinds of ground, and in every variety of grass and grain. Confident of this we invite those in want of a good machine to examine for themselves before purchasing elsewhere.

These machines can be sold as Naked Mowers—REAPERS as Hand Rake, Self-Rake, or Dropper—Two different sizes: No. 1 Machine, with two cutter Bars and three Knives, cutting five and a half feet of grain and four feet eight inches in grass; No. 2, cutting four feet six inches.

We have that confidence in these machines that we are willing to let those wanting a machine test them with any other they may wish, and keep the one that gives most satisfaction. DODGES' AUTOMAN SELF-RAKE has given such general satisfaction that we consider it the best Self-Rake out, and is attached to no other machine except the Dodge Machine, the Ohio and Buckeye patent.

For the benefit of those wanting machines we would refer them to a few of those to whom we have sold the last season, viz:

John Swartzfeger, Sen.,	Henry Culp,
Ephraim Lady,	Henry King,
George Lady,	Elisha Penrose,
Jonathan Wisler,	David Stewart,
James Mickley,	W. Rose White,
Daniel Bastie,	J. J. Kerr,
John Bender,	Andrew Weikert,
John Eckert,	Wm. Bigham,
Wm. Funt,	John Shinn,
Cornelius Lott,	John N. Hoffman,
Wm. Golden,	John N. Boyer,
Wm. Rose.	

Also, WIRE-TOOTH HAY RAKES, including the celebrated Brandt Rake and Self-Discharging Rake. Also, PLOUGHS, FANNING MILLS, and FARM IMPLEMENTS GENERALLY.

Persons wishing to examine machines will find them at the warehouse of JOHN WILLS & SON, Gettysburg, Pa., or at the residence of the subscriber, 2 miles from Gettysburg, on the Harrisburg road. Persons wanting Circulars will address the subscriber, Gettysburg, Pa.

April 23.—t WM. WIBLE, Agent.

STILL AHEAD!

HOFFHEINS'

REAPER & MOWER,

One of the Greatest Machines of the Age,

IS superior to any other Machine now in use, as will excel any that will ever be introduced, having been thoroughly tried and given general satisfaction. I would now inform all those who intend purchasing Machines to call and examine for themselves. This Machine is noted particularly to excel all other machines, in strength, durability, ease of draft, and reliability of work, in all kinds of grass and grain. It cuts ledged grain admirably, which is a great item in Machines to a farmer. It can be used in a hand rake as well as a self-raker. It cuts 5 feet 2 inches in grain, and 5 feet 10 inches in grass. The seat contains but, with wrought iron guards; it can be used as a Hinge Mower as well as a Combined Machine.

A full trial of the Machine can be had.

The SHERMAN'S SELF-DISCHARGING HORSE RAKE, and the great seat of self-known HEAVY RAKE, manufactured and for sale at the lowest rates.

Give your attention to the IRON DOUBLE SHOVEL PLOUGH, wrought iron frame, very light and easy to draft, steel shovels, easily adjusted to run shallow or deep, and in sandy or stony lands.

ALSO, THE KEMBLE AND EXCELSIOR FANNING MILLS, the best Fanning Mills now in use, for many years a great favorite among the farmers of Adams county. It is large and strong, and two cattle to work, and is sold at reasonable prices.

Also all kinds of FARMING IMPLEMENTS always on hand.

Any person wishing to examine these machines can see them at the Battle-field Hotel, or at my residence, 3 miles from Gettysburg, between the Hanoverroad and the Baltimore pike.
