HOVEN OR BLOAT IN CATTLE.-At FAHNESTOCK BROTHERS this season of the year, many cows are lost from hoven. I will give a short aspier from my own experience, some Dry Goods, Carpets, &c. years ago I turned my cow into theclover field in the morning while the grass was wet with dew. She soon became blorted, and to all appearance, there HARDWARE, SADDLERY, &c. was danger that she would shortly die CEDAR-WARE. if not soon relieved. A near neighbor GROCERIES, told me to run a knife into her and let the wind off the stomach. I was not exerienced in this sticking business, and elined following his advice. But I hastily forced her mouth open, and put a club in it. By the smell of the breath, I knew the gas in her stomach had commenced escaping I then tied a piece of hickory bark to each end of the club, and passed it over the head and behind the horns and then together .-In half an hour my cow was perfectly J. —Cor. Cin. Gazette. DRY GOODS USE YOUR OLD THRESHING MA-CHINES.—A great many farmers have old threshing machines which may be put to good account. A correspondent Thest harvest, when the time came for grinding up my mowing machine knives and cradling scythes, there was, NOTION of course, a great deal of growling a the thought of turning the grindstone and having blistered hands. I thought I might possibly save some labor, and that has been brought to Gettysburg I accordingly took my grindstone and attached it to the shaft running from which will be sold at the lowest possithe large wheels to the pit-wheel of the threshing machine. Or, in other words I made a wooden shaft, and after taking off the crank, joined the two together. This was easily done, I then put a horse to one of the sweeps, and the knives and scythe were all ground by home power, and that in a very short time. The boys who did the Spring & Summer Goods, saving machine, and gave me a hearty vote of thanks for my invention. AT PETERSBURG, Y. S., PA. WHETHER hogs require sulphur as an essential to their health, er whether it is sought by them as a condiment may not be known for certainty. But GRIEST & BOWERS one thing is sure, they devour it with for this purpose, probably, that they eat large quantities of soft coal, which contains a large amount of sulphur. Perhare this is the seconomical method of supplying hogs with sulphur during the winter, when they require a great deal of carbon. But in the summer it is better to feed it to them in substances which contain less carbon, on account of their producing less heat.
