REMOVED METHOD OF REARING YOUNG CAT-GETTYSBURG HOW TO CURE LOOK HERE OPENED OUT AGAIN SPRING AND SUMMER Gettysburg Springs Railroad WM. J. MARTIN, CONSUMPTION! JOSEPH JACOBS, NATIONAL BANK There are two objects in rearing calves SCHEDULE, READY-MADE G O O D S THE PHILOSOPHY OF DR. SCHENCK'S GREAT MEDITAINES.—Will people never-tearn to know that a diseased liver and stomach necessarily disease the entire system? The plarnest Principles of common sense teach this and yet there are hundreds who ridicule the idea and continue in the course which almost inevitably plings them permaturely to the grave. Living as the majority of the people do, at complete variance with the laws of nature, it must be apparent to all that, sooner or later, nature will revenge herself. Hence we find that persons who indulge to excess in the use of very rich or indigestible food or intoxicating drinks, invariably pay a heavy penalty in the end. The stomach becomes disordered and refuses to act; the liver fails to perform its functions, dyspepsia and its attendant evils follow, and still the suffering individuals persist in clinging to the thoroughly exploded ideas of the past. Dr. Schenck's medicines are recommended to all such. They bring sure and certain relief wherever they are used as directed, and all that is necessary to establish their reputation with every alling man or woman in the land is a fair and impartial trial of them. Let those who are skeptical on this point, and who have permitted interested persons to prejudice them against these now celebrated remedies for Consumption, discard their prejudices, and be governed by the principles of reason and common sense. If the system is disordered depend upon it, in nine cases out of ten the seat of disorder will be found in the MERCHANT TAILOR ing on the 21st day of June, 1870. each of which is of great importance.-1st.—To effect it without the assistance CLOTHING Wholesale and Retail dealer in LEAVE SPRINGS HOTEL AT Grain & Produce Business HAS REMOVED 7.45; 9.15; 11 A. It may be asked by those who are not familiar with the virtues of these great remedies, "How do Dr. Schenck's medicines effect their wonderful cures of consumption:"

The answer is a simple one. They begin their work of restoration by bringing the stomach, liver and bowels into an acree healthy condition. It is food that cures this formidable disease.—SCHENCK'S MANDIAKE PILIS action the liver and stomach, promoting healthy secretion, and HEADQUARTERS they are about two months old, then I scriptions and Family recipes PRODUCE DEALERS turn them out to grass. By this method accurately put up. Physicians and coun-CALICO transfer at a trifling expense. INTERNAL REVENUE STAMPS of all denomin er and bowels into an acive healthy condition. It is food that cures this formidable disease.—
SCHENCK'S MANDRAKE PILISAC ton the liver and stoniach, promoting healthy secretion, and removing the bile and slime which have resulted from the inactive or torpid condition of these organs, and of the system generally. This suggish state of the body, and the consequent accumulation of the unhealthy substances named prevent the proper digestion of food, and, as a natural consequence creates disease, which results in prostration and finally in death.

SCHENCK'S FULMONIC STRUP and SEA. WEEP TONIC, when taken regularly, mingle with the food, aid as a natural consequence, give flesh and strength to the patient. Let the faculty say what it may, this is the only true cure for consumption. Experience has proved it beyond the shadow of a doubt, and thousands are to-day alive and well who a few years since were regarded as hopeless cases, but who were induced to try Dr. Schenck's remedies, and were restored to permanent health by their use.

One of the first steps the physician should take with a consumptive patient is to invigorate the system. Now how is this to be done? Certainly not by giving medicines that exhaust and enervate—medicines that impair instead of improve the functions of the digestive organs. Dr. Schenck's medicines cleanse the stomach and bowels of all substances which are calculated to irritate or weaken them. They create an appetite—promote healthful digestion—make good blood, and, as a consequence, they invigorate and strengthen the entire system, and more especially those parts which are diseased. If this eannot be done, then the case must be regarded as a hopeless one.

If the physician finds it impossible to make a PATIENT VEEL HUNGRY, if the diseased person cannot partake of good nourishing food and properly digest it, it is impossible that he can gain less and strength; and it is equally impossible to bring a patient to this condition so long as the liver is burdened with diseased bile, and the stomac with a trifle of expense.
