BILOUS REMITTENT and INTERMITTENT FEVER, which are so prevalent in the valleys of our great hivers throughout the United States, especially those of the Mississippi, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red. Colorado, Brazos, Feart, Alabama, Mobile, Savannah, Roanoke, James, and many others with their vast tributaries, during the Summer and Autumn, and remarkably so during the seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. There are always more or less obstructions of the liver, a weakness and irritable state of the stomach, and great torpor of the bowels, being clogged up with vittated accumulations. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially encessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegar Bitters, as they will speedily remove the dark colored viscid matter with which the Bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the disestive organs. The universal popularity of this valuable remedy in regions subject to missmatic induences, is sufficient evidence of its power as a remedy in such cases.

he does not avoid taking cold.
In Florida, nearly everybody is using Schenck's
Mandrake Pills, for the climate is more likely to
produce bilious habits than more northern latitudes. It is a well established fact that natives of
Florida rarely die of consumption, especially
those of the southern part. On the other hand,
in New England, one-third, at least, of the population die of this terrible disease. In the Middle
States it does not prevall so largely, still there are
many thousands of cases there. What a wast
percentage of life would be saved if consumptives were as easily alarmed in regard to taking
fresh cold as they are about scarlet fever, small
pox, &c. But they are not. They take what they
term a little cold, which they are credulous
enough to believe will wear off in a few days.—
They pay no attention to it, and hence it lays the
foundation for another and another still, until the
lungs are diseased beyond all hope for oure.

My advice to persons whose lungs are affected
even slightly is, to lay a stock of Schenck's Pulmonie Syrup, Schenck's Seaweed Tonic and
Schenck's Mandrake Pills and go to Floritia. I
recommend these particular medicines because I
