toil and labor, assisted in his researches by several scholars of known atility, and has been got up at a great expense by the proprietors. No pains have been spared in the ex-ecution of the Illustrations and Maps, which are prepared expressly for this work. Indeed, all the other historical writing of Mr. Goodrich, sink into insignificance, when compared to this, the result of his riper and maturer years. It is admitted that one hundred dollars could not purchase the same matter in any other shape, and the publishers confidently expect, in consideration of the great literary value of the work, the large sum expended in preparing it for the press, and the exceedingly moderate price at which it is officied, that it will be favorably received by every lover of good books. Many of our first scholars, di-vines and gentlemen, who have examined the work, have given it their unqualified approbation and commendation, given it their unqualified approbation and commendation, which it richly descrives. Books upon almost every other subject have been circu Books upon almost every other subject have been circu-lated among the people, except those relating to the very interesting and important one of Natural History. The books which have heretofore been published on this sub-ject, have been adapted to mere children, or to those who made it a thorough study. Hence, very few of the millions of readers in this country have, within their reach, any-thing satisfactory upon this subject. This indicates a great and an obvious want, as no subject is more intensely interesting, and none more improving, than that of the living beings that people the globe. This want we are con-fident we tully meet, in the work we here offer to the pub-lic.
