Books upon almost every other subject have been circulated a second those relating to the very Books upon almost every other subject have been circulated among the people, except those relating to the very interesting and important one of Natural History. The books which have heretofore been published on this subject, have been adapted to mere children, or to those who made it a thorough study. Hence, very few of the millions of readers in this country have, within their reach, anything satisfactory upon this subject. This indicates a great and an obvious want, as no subject is more intensely interesting, and none more improving, than that of the living beings that people the globe. This want we are confident we fully meet, in the work we here offer to the public.
