As was Expected—The Journal's notice of the Committee on Printing. What astonished everybody was that the Committee did award the Journal office two premiums for —what? One for specimens of "Janey" printing!—the neatest and only part of the fancy work that could pass inspection, was executed in Philadelphia! And one for an old-fogy form of a Doed, out of use with all who have a nice taste in filling up a blank Doed, and the press-work of which would not pass as a decently spoiled sheet. The Society offered premiums for the best Card, Blank, and Handbill printing—and all these were taken by the "Globe Job Office." Brewster's only chance to get a premium was in offering a kind of specimens not called for in the list, part Philadelphia workmanship, and a form of Deed no printer would think of printing and offering for sale in this progressive age. It was a rough stretch of conscience for the Committee to try to please, the old gentleman in giving him the favorable notice they did, and were we disposed to be strict with the Committee, we would say that they deserve all they got from the Journal, and even a little more, in transconding their duty, by exercising a discretionary power, which was not committed to them; but fully appreciating their motive, we entirely excuse them. The fifth stated meeting of the "Franklin Teachers' Institute," during the present year, was held at Huntingdon Furnace, October

Maj. Zentmyer was called to the Chair, and H. T. White, appointed Secretary pro tem. Mr. Beyer was then called to address the meeting, to which he responded with an able and interesting address; pointing out the imperfections of the Old School System, and the beauties and advantages of the New, a copy of which, was requested for publication.

The following subject was then taken up for discussion: What do we educate for?— On motion, it was opened with some remarks by A. R. Miller, and continued by Messrs. Houck, White, Plotcher, Wommelsdorf, Beyer and others. A mutual and lively interest, on part of both teachers and citizens, characterized the entire discussion, which was attended with marked attention from a large audience. On motion, adjourned, to meet on the following morning at 9 o'clock.

Morning Session .- Convention met according to adjournment. On motion, the subject of teaching Ortliography was selected, and very appropriately opened by Mr. Houck, after which Mr. Pletcher elegantly exhibited his method of teaching said branch by instructing a class. The discussion was then continued by others until noon. On motion adjourned until I o'clock P. M.

Afternoon Session .- Subject for consideration as follows: The impropriety of the too frequent use of "text books" in our Common Schools, which was introduced by Miller, and continued with a spirit of animation by Messrs. PITTSBURGHER SHOT AT CHAMBERSBURG.-From the Post, we learn that on Tuesday last, a shooting affray occured between Isaac Craig of this city and Joseph and Jeremiah M'Kibben, brothers-in-law of Craig, which may result fatally to one of the parties. It would appear that just as the train was starting for Harrisburg from Chambersburg, the M'Kibbens' entered the cars and commenced firing at Craig with revolvers, the latter returning the fire. Eighteen shots were discharged in the car. Mr. Craig was shot in the thigh just below the groin, dangerously, but it was thought not mortally, woun-

The cause of the difficulty between the parties is probably known to most of our readers. Mr. Craig, who is a son of Neville B. Craig, of this city, was married some years ago to a daughter of Mr. Chambers M'Kibben, formerly post-master here, and father of the young man by whom Mr. Craig was assaulted. Mr. M'Kibben has a second daughter-a deaf mute-and during a visit of the latter to her sister's house in this city,

it is alleged that she was seduced by Craig. Prosecutions, both civil and criminal, are now pending in this county against Craig, who utterly denies the charge against him. It will be remembered that soon after the condition of the girl became known, one of her brothers sought the life of Mr. Craig in this city, by firing a revolver at him.

Dr. Hardman treats Consumption, Bronchitis, Asthma,

Larryngittis and all diseases of the throat and lungs, by

Medical Inhalation, lately used in the Bronton Hospital,

London. The great point in the treatment of all human

muladies, is to get at the disease in the direct manner.—

All medicines are estimated by their action upon the organ

requiring relief. This is the important fact upon which

Inhalation is based. If the stomach is diseased we take

medicine directly into the etomach. If the lungs are dis
eased, breathe or inhale medicated vapors directly into

the lungs. Medicines are antidotes to disease and should

be application of this principle to the treatment of the lungs,

for it gives us direct access to those intricate air cells, and

tubes which lie out of reach of every other means of ad
ministering medicines. The reason that Consumption,

and other diseases of the lungs, have heretofore resisted

all treatment has been because they have never been ap
proached in a direct manner by medicine. They were in
tended to act upon the lungs, and yet were applied to the

stomach. Their action was intended to be local, and yet,

they were so administered that they should only act con
stitutionally, expending their immediate and principal ac
tion upon the unoffending stomach, whilst the foul ulcers

within the lungs were unmolested. Inhalation brings

the medicine in direct contact with the disease, without

the disadvantage of any violent action. Its application is

so simple, that it can be employed by the youngest infant the disadvantage of any violent action. Its application is so simple, that it can be employed by the youngest infant or feeblest invalid. It does not derange the stomach, or interfere in the least degree with the strength, comfort, or business of the patient.

Other Diseases Treated.—In relation to the following diseases, either when complicated with lung affectious or existing alone. I also invite consultation, I usually find them

promptly curable.
Prolapsus and all other forms of Female Complaints, Irregularities and Weakness.
Palpitation and all other forms of Heart Disease, Liver Complaints, Dyspepsia, and all other diseases of stomach and bowels, &c. and bowels, &c.

All diseases of the pye and ear. Neuralgia, Epilepsy, and all forms of nervous disease.
