The Farmers' High School. [From Correspondence of The Press.]

The report of the Hon. Frederick Watts, President of the Board of Trustees of the nal of a European traveller, that a new and Farmers' High School of Pennsylvania, to the | fearful mode of execution has been adopted Legislature, is an interesting document, as showing the complete success, thus far, of process are thus described: A box, each the experiment. Gen. James Irvin donated side of which is fifteen feet square, is conto the institution two hundred acres of good structed of timber eighteen inches thick, limestsne land as an inducement to have it dove-tailed together, and braced with iron located in Centre county, and an equal amount rods. The outside of the bottom of the box has since been purchased for the sum of eleven thousand dollars.

The present means which the board have and which they expect to realize are as follows:

By Legislature at last session . 25,000 00

\$45,000 00 With these funds the board proceeded first to the erection of such buildings as were absolutely necessary to the enjoyment of the property, and to laying out the grounds and planting as extensively as practicable, preparatory to the commencement of a course of instruction. A convenient farmhouse, a large barn, corn-cribs, wagon-shed, and other nccessary out-buildings have been completed; an edifice two hundred and thirty-three feet in front and five stories high, with wings at either end, built of limestone, is in a state of forwardness, and will be completed during the ensuing summer at a cost of \$55,000.

This building is adapted to the accommodation of at least two professors, with their families, and 300 students. No students have yet been taken, as the progress made in the building is not sufficiently advanced. It has paration of the farm for that profitable instruction of practical agriculture which is the design of the institution to impart.

The resources for the further preparation of the farm and completion of the buildings, the success of which they anticipate in the coming year, are:

A legacy from Mr. E. Cresson..... The appropriation by the Legislature...... Which is made payable when a like sum is raised 25,000 by individual 25,000

Total : . \$55.000 The board have no doubt whatever but that the individual subscriptions will be forthcoming, from their success thus far. This subject of agriculture has been too much neglected as a science, leaving the tilling of the soil to the chances of ignorance, while manufactures have ever received the fostering attention of Government. A new era has begun to dawn, distinguished for patent reapers, mowers, ploughs, and planters, that would rather astonish the old Agricolas; and why may not equal improvements be mede in growing the crops, when a knowledge of soils, sub-soils, and composts is more generally diffused ?

The interior is filled with perfect cubes of granite, weighing in the ag-gregate several thousand tons. A machine is erected after the manner of an ordinary pile-driver, but of course, on an enormous scale, and of tremendous strength. The mass is raised by powerful machinery cast in Birmingham for the express purpose, though it is to be presumed that the machinist by whom it was furnished had no idea of the horrid purpose for which it was intended.-The human victim is placed upon a block of granite, of a corresponding surface, buried in the earth immediately beneath the enormous mass, and covered with a plate of iron. At a signal given by the vicramadack the exccutioner touches a spring, the mass falls, and the victim, crushed at once, is suddenly annihilated, and spread out like a sheet of pasteboard! A Mad Bull---Exciting Chase.

On Monday morning a bull, which had been deemed better to proceed slowly, but certainly, as a measure of economy. It has been found that time is necessary in the pre-been found that time is necessary in the pre-lt was pursued to the corner of Chrystie and Hester streets, where a large number of boys took chase after the animal, which ran bellowing through Chrystie and Division streets into East Broadway. As he passed the Se-venth Ward station house, with a whole crowd in pursuit, the captain of police ordered five officers to follow the bull, which they did, and were led on a most exciting chase. On he ran, down Pike street, into South, and thence through Gouverneur into Grand street. The officers fired at the animal with their revolvers as he ran, which only had the effect to infuriate him ; everywhere the streets were instantly cleared, as the bull appered tearing along almost at railroad speed. At the foot of Rivington street the bull ran into the corporation yard. Here he received a volley of stones and bullets, when he clambered up a pile of stones and scaled a fence eight feet high. He then ran through Goerek street into a tree-nail yard, in Third street. Here a rope, which he carried round his horns, was a rope, which he carried round his horns, was made fast to a post, and another and furious onset was made upon the poor brute. He was struck on the head with mauls and clubs, stabbed with knives on the side and neck, and pistol shots were discharged into his body. The only effect of all this appeared to be to enrage him. For nearly twenty minutes he kept his enemies at bay, dodging the blows of the uplifted maul and club. Finally, he

Dick, from the original of Raphael Morghen, after Leonardo Da Vinci, and is the largest steel-plate engraving ever excented in this country, being three times the size of the ordinary three-dollar cugravings. The first impressions of this engraving are held at ten dollars, and it was the intention of the artist that none of the engravings should ever be offered for a less sun than five dollars, being richly worth that amount. Thus every three-dollar subscriber will receive the Magazine one year --cheap at three dollars--and this splendid engraving, richly worth \$5; thus getting for \$3 the value of \$8. We shall commence striking off the engraving simmedi-ately, yet it can hardly be expected that impressions of so large a plate can be taken as fast as they will be called for by subscribers. We shall, therefore, furnish them in the order in which subscriptions are received. Those who desire to obtain their engravings early, and from the first impressions, should send in their subscriptions without delay. As follows: Huntingdon, Jackson's Hotel, Tuesday, February 16. Hollidaysburg, Exchange Hotel, "15. Lewistown, National Hotel, "17. Dr. Hardman treats Consumption, Bronchitis, Asthma, Larry ugitis and all diseases of the throat and lungs. by Medical Inhalation, lately used in the Bronton Hospital, London. The great point in the treatment of all human maladies, is to got at the disease in the direct manner.— All molicines are estimated by their settion must the estrant Includies, is to got at the disease in the direct manner.— All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon, which Inhulation is based. If the stomach is diseased we take medicine directly into the stomach. If the lungs are dis-cased, breathe or inhale medicated vapors directly into the lungs. Medicines are antidotes to disease and should be applied to the very scat of disease. Inhalation is the application of this principle to the treatment of the lungs, and for it rives as direct process to these intriends are are interest. application of this principle to the treatment of the lungs, for it gives us direct access to those intricate air cells, and tubes which lie out of reach of every other means of ad-ministering medicines. The reason that Consumption, and other diseases of the lungs, have heretofore resisted all treatment has been because they have never been ap-proached in a direct manner by medicine. They were in-tended to act upon the lungs, and yet were applied to the stomach. Their action was intended to be local, and yet, they were so administered that they should only act con-stitutionally, expending their immediate and principal acstitutionally, expending their immediate and p tion upon the unoflending stomach, whilst the fonl ulcers within the lungs were unmolested. Inhalation brings the medicine in direct contact with the disease, without the disadvantage of any violent action. Its application is so simple, that it can be employed by the youngest infant or feelest invalid. It does not derange the stomach, or inor lectiest invalue. It does not deringe the stomach, or in-terfere in the least degree with the strength, comfort, or business of the patient. "We can hardly be grateful enough for the sulting from gigantic factories, so also are we Resolved, That when a Territory forms a free from their fluctuations. Probably the return. Let them come; they will be welcomed. We shall find work for all. Glad, only too glad shall we be if, in the western land they sought and now fly from, they have learned industry and prudence."

> A DESPERATE PRISONER-At York, Pa., on Monday, four persons were arrested on a charge of creating a disturbance. One of them, named Fisher, made a desperate resistance, and assaulted High Constable Ruby and several citizens with a long-bladed knife, but without doing them any injury. The York Republican says:

It was with much difficulty that he was get a bar of iron, with whch he assaulted one of the keepers, injuring him somewhat. When in the cell he tore off the spiggot of the hydrant, which he threw with much force at those outside, who narrowly escaped feeling its weight. He then broke up some of the wood work inside, with which he made a club, and swore he would knock out the brains of any persons who should enter the ordered him to be shot, and two balls were fired at him, one of which grazed one leg, and the other ball took effect in the other leg. He then submitted-the ball was extracted, mediately.

The Combination Saw-Mill was patented October, 1856, and is now generally acknowledged to be the cheapest, and most practical, and efficient humber manufacturing ma-chine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufactu-rers in preference to all other mills. The following letter expresses the general opinion of those who are using the Combination Mill: MESSE, ExtENSOR & Co.-Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little
