for the Farmer.

We make the following extracts from an important communication which we find in the last number of the Country Gentleman, from a leading farmer in New-Jersey, on a are best. It will be seen by my last year's system of potato culture. We need only say article, that I grew them on a level surface that it meets entirely our own views on the suject, long entertained, and more than once both system were to state how their land lay, alluded to in the Telegraph. We have no flat or sidehill, heavy or light loam, then we doubt that Mr. Howatt is correct. This article was written last autumn, as is evident from its wording-another and the first, on the same subject, having been written a year before. We hope it may be in time for a trial the present year .- Ed. Germantown Tele-

" * * * I am glad that I have been the means of introducing a good system into practice, which will yet be the rule and not the exception. It is an economical as well sow with turnips. In ten days afterwards one stem appeared to each set, and quite regularly in the drills; I then determined to let them when digging, to be the best crop I had ever raised. This was conclusive evidence to me that one eye was better than three; and the potatoes were of much evener size than any I have ever grown. Since then I have grown altogether on the one-eye on my potatoes at other Socities than ours.— It has been said that our land is suited to the potato, and so my fine crops. Such is not the case. Ours is not a potato soil, and as to a fine crop, I do not consider it such. I prised to hear of some of your readers turning out next fall four hundred bushels of "Prince Albert potatoes" to the acre, on the one-system; but then if they wish this, they must make up their minds whether they intend grownig weeds or patotoes. To grow potatoes well, you must not let a weed be seen. Keep your ground stirred; harrow, plow cultivate until they come into ploom; then use no tools among them. If you keep them properly cultivated up to that time, they will not require hand weeding when in this stage; if you do not this, you need not expect a paying crop. This is also an important point, as at this stage the turbers set, and by working them you deteriorate their growth materially.

I cut the potato a month before planting, and mix with hot lime to dry up the cuts, which it will do, and shrivel them completely up, (a good sign.) When planted, they immediately start to grow, and you will see your eye bursting a nice blue top. The set being completely dry, there is no danger of their rotting in the ground; whereas if put in the ground as soon as cut, they lay dormant until this cut heals, and if wet weather, many other manner, as subscribers shall order.

TWENTY THOUSAND DOLLARS IN WORKS OF they are liable to rot. Another reason: Before planting you see your eyes bursting, and you need plant only such as are good. You will then have no vacancies in your drills .--By cutting so far ahead, you set them earlier, as the moment you cut them is like planting them; they commence growing the mo ment you mix them with lime; whereas if planted at that time, the ground being cold and wet, they would be likely to rot. When you have them cut, you need not care being a week behind or before in planting. One thing must be observed when they are cut. that is, they must not be put into a dark hot cellar. Place them where they will have plenty of light, and if there is any danger of frost at night, cover them over, (removing in day time.) If placed in a cellar, they commence to burst their eyes, and not having light, they will be white and spindly, completely drawn and good for nothing. By being in a garret or some such place, they burst strong. Let it not be supposed that if the eye should be broken off that the set is lost. If kept dry it will immediately throw out another sprout. Let any that may be skeptical on this point cut and prepare as above, and cut and plant the same day, as is the common practice, and note the result. Practice is better than theory. To cut a potato to advantage, requires a

little practice. I here give directions how to do it, which by following you will soon be an adept. Hold your potato in your left hand; cut the root end completely off as the eye by the root should never be planted; it only produces small and watery potatoes. Your next eye cut something like a half moon observing not to cut through another eye; then turn your potato, and your next eye will be angular, your next half moon, your next angular, and so on. Then the top of your potato (where there is a cluster of eyes,) will in general be flat, when properly cut; those you cut in single eyes, and you should be your other cuts, as those should be planted by themeselves, as they will ripen their tubers from a week to a fortnight earlier than the rest. I always have two sets of hands to cut them—one to cut off the tops and throw them by themselves, and the other to cut them by themselves, and the other to cut the manufacture of the segment of the cut them and one of the numbered subscription receipts, entitling the holder to the Magazine one year and to ach a nee in the distribution. This offer is made only to those who desire to act as agents or to form clubs. Address careful and keep all of those seperate from them by themselves, and the other to cut to act as agents or to form clubs. Address OAKSMITH & CO... from that to the root end, reserving the top | Jan. 13, 18-8,

The Potato Culture Again.---Important I have grown most of the potatoes at present in cultivation, and I said in my article last year that the Prince Albert potato was our best. It is suited to all our soils, and all

say it does not rot. * * * * * *

As to flat culture and high earthing, both without any earthing. This year I grew them in drills, well earthed up. If the advocates of we could judge for ourselves, as to which system would be best suited to our individual soil; for instance, if I intended growing potatoes on a low flat piece of land, not under-drained, and where the rains would lay, I should grow them in drills according to my last year's practice, (high drills;) if I grew on side-hill, or on ground that I was sure the the water would not lay on, I should grow them on the flat system, which, when applicable, I prefer. The quality of the soil you cable, I prefer. The quality of the soil you intend to grow on, must also be a guide to you as to the system you should adopt. If a heavy loam, I should adopt the high drill sysas a better system which will be more gener- tem, as by it you pulverize the soil and make ally admitted when tried. * * * I have it mellow. A good crop can be got off soil of been asked 'why' I adopted the one-eye sys- this description by the high time system were adopted on tem. I had at one time a field of early potatoes, when at the latter end of May we had a very severe frost, at which time my potato stems were four and five inches high. The sets were cut three eyes to each; the frost sets were cut three eyes to each; the frost sets were cut three eyes to each; the frost sets were cut three eyes to each; the frost sets were cut three eyes to each; the frost sun will burn your roots, and you have no error. Where, if you had grown on the flat systems on the flat systems on the flat system tem. I had at one time a field of early pota- this heavy soil, you would not succeed in getsystem, you would have had a full crop .--Use the roller freely on a light soil to compress it tightly, and on a heavy soil use your heavy and light harrows freely. Men, them remain and see the result, and I found apopting a system from a written article, should fully understand that the same practice is applicable to their soil, and that a system which would be best for one field, should be reversed on another, thus adapting the system to the condition of the field. Out of this one thing paoceeds most of the difference of opinion as to which is best of the different systems. As to potato culture, sysetm on all soils. I have taken premiums | the one-eye system is applicable to light and heavy soils.—Gerald Howatt, Nemton, New

TINRIVALLED ATTRACTIONS !--

EMERSON'S MAGAZINE
AND PUTNAM'S MONTHLY,
TWO GREAT MAGAZINES IN ONE!! have seen land in this and other States, on which I could double it. I shall not be surtwenty thousand double at. I shall not be surtwenty thousand double at. I shall not be surtwenty thousand double at.

TWENTY THOUSAND DOLLARSIN SPLENDID WORKS
OF ART.
FIVE-DOLLAR ENGRAVING TO EVERY
SUBSCRIBER.
THE GREAT LIBRARY OFFER—AGENTS GETTING
RICH!!!!
The union of Emerson's Magazine and Putnam's Monthly
has given to the consolidated work a circulation second to
but one similar publication in the country, and has secured for it a combination of literary and artistic talent probably unrivaled by any other Magazine in the world. Du-

ed for it a combination of literary and artistic talent probably unrivaled by any other Magazine in the world. During the first month, the sale in the trade and demand from subscribers exceeded 90,000 copies, and the numbers already issued of the consolidated work are universally conceded to have surpassed, in the richness of their literary contents, and the beauty and profuseness of their pictorial illustrations, any magazine ever before issued from the American press. Encouraged by these evidences of favor, the publishers have determined to commence the new volume in January with still additional attractions, and to ume in January with still additional attractions, and to offer such inducements to subscribers as cannot fail to oner such inducements to superiors as cannot that to place it, in circulation, at the head of American magazines. With this view they now announce the following splendid programme. They have purchased that superband costly steel-plate engraving,

"THE LAST SUPPER,"

"THE LAST SUPPER,"
and will present it to every three-dollar subscriber for the
year 1858. It was engraved at a cost of over \$5,000, by
the celebrated A. L. Dick, from the original of Raphael
Morghen, after Leonardo Da Vinci, and is the largest steelplate engraving ever executed in this country, being three times the size of the ordinary three-dollar engravings.

The first impressions of this engraving are held at ten dollars, and it was the intention of the artist that none of the engravings should ever be offered for a less sum than five dollars, being richly worth that amount. Thus every three-dollar subscriber will receive the Magazine one year rear at three dollars and this sul

richly worth \$5; thus getting for \$3 the value of \$8.
We shall commence striking off the engravings immediately, yet it can hardly be expected that impressions of so large a plate can be taken as fast as they will be called for by subscribers. We shall, therefore, furnish them in the order in which subscriptions are received. Those who desire to obtain their engravings early, and from the first impressions, should send in their subscriptions without delay. The engraving can be sent on rollers, by mail, or in any other manner, as subscribers shall order.

TWENTY THOUSAND DOLLARS IN WORKS OF ART.

In addition to the superb engraving of "The Last Supper," which will be presented to every three-dollar subscriber for 1858, the publishers have completed arrangements for the distribution, on the 25th of December, 1858, of a series of splendid works of art, consisting of one hundred rich and rare Oil Paintings, valued at from \$200 to or a series of splendid works of art, consisting of one number of rich and rare oil Paintings, valued at from \$190 to \$1,000 each. Also 2,000 magnificent Steel-Plate Engravings, worth from three to five dollars each, and 1,000 choice Holiday Books, worth from one to five dollars each, making, in all over three thousand gifts, worth twenty

thousand dollars.

Inclose \$3 to the publishers and you will commence receiving the Magazine by return mail. You will also receive with the first copy a numbered subscription receipt entitling you to the engraving of "THE LAST SUPPER,"

and a chance to draw one of these "three thousand prizes." REASONS WHY YOU SHOULD SUBSCRIBE FOR EMERSON'S MAGAZINE FOR 1858. 1st. Because its literary contents will, during the year, embrace contributions from over one hundred different writers and thinkers, numbering among them the most

distinguished of American authors. distinguished of American authors.

2d. Because its editorial departments, "Our Studio,"
"Our Window." and "Our Olio," will each be conducted
by an able editor—and it will surpass, in the variety and
richness of its editorial contents any other magazine. 3d. Because it will contain, during the year, nearly six

3d. Because it will contain, during the year, nearly six hundred original pictorial illustrations from designs by the first American artists.

4th. Because for the sum of \$3 you will receive this splendid monthly, more richly worth that sum than any other magazine, and the superb engraving of "The Last Supper," worth \$5.

5th. Because you will be very likely to draw one of the three thousand prizes to be distributed on the 25th day of December, 1858—perhaps one that is worth \$1.000.

Notwithstanding that these extraordinary inducements can hardly fail to accomplish the object of the publishers

three thousand prizes to be distributed on the 25th day of December, 1858—perhaps one that is worth \$1,000.

Notwithstanding that these extraordinary inducements can hardly fail to accomplish the object of the publishers without further efforts, yet they have determined to continue through the year.

THE GREAT LIBRARY OFFER.

To any person who will get up a club of twenty-four subscribers, either at one or more post offices, we will present a splendid Library, consisting of over Forty Large Bound Volumes, embracing the most popular works in the market. The club may be formed at the club price, \$2 a year, without the engraving, or at the full price, \$3, with the Last Supper to each subscriber. List and description of the Library, and specimen copy of the Magazine, will be forwarded on receipt of 25 cents. Over 200 Libraries, or \$,000 volumes, have already been distributed in accordance with this offer, and we should be glad of an opportunity to furnish a Library to every school teacher, or to some one of every post office in the country.

AGENTS GETTING RICH.

The success which our agents are meeting with is almost astonishing. Among the many evidences of this fact, we are permitted to publish the following:

GENTLEMEN: The following facts in relation to what your Agents are doing in this section, may be of use to some enterprising young man in want of employment.—The Rev. John E. Jardon, of this place, has made, since last Christmas, over \$4,000 in his agency. Mr. David M. Heath, of Ridgly, Mo., your general agent for Platt county, is making \$8 per day on each sub-agent employed by him, and Messrs. Weimer & Evans, of Oregon, Mo., your agents for Holt county, are making from \$5 to 25 per day, and your humble servant has made, since the 7th day of last January, over \$1,700, besides paying for 300 acros of land out of the business worth over \$1,000. You are at liberty to publish this statement, if you like, and to refer to any of the parties named.

DANIEL GREGG, Carrolton, Mo. With such inducements as we offer, a

to be cut carefully for early use. This, to any one who requires early potatoes, will be to subcribe! PREMIUMS AND REDUCTIONS.

THE NEW YORK STEAM SAW-MILL AND MACHINE COMPANY, CAPITAL, TWO HUNDRED AND FIFTY THOUSAND

CAPITAL, TWO HUNDRED AND FIFTY THOUSAND DOLLARS.

This company has been organized with the above capital for the purpose of supplying the demand for the COMBINATION PORTABLE STEAM SAW-MILL, and other improved machinery.

They have purchased the entire machinery Lusiness here tofore carried on by J. M. Emerson & Co., also the Montgomery Works at Yonkers, on the Hudson, near this city, and with the experience and facilities combined in its organization are prepared to furnish machinery of all kinds

ganization are prepared to furnish machinery of all kinds at more liberal rates, than has ever been offered at any other establishment.

The Combination Saw-Mill was patented October, 1856.

and is now generally acknowledged to be the cheapest, and most practical, and efficient lumber manufacturing machine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have

the tested they are being adopted by lumber manufacturers in preference to all other mills.

The following letter expresses the general opinion of those who are using the Combination Mill:

MESSIS. EMERSON & Co.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it upon a small stream that afforded constant water about as thick as my little finger, which was much more than sufficient to supply the iler. We are able to cut 3,000 feet of beautiful lur holler. We are able to cut 3,000 feet of beautiful lumber in 12 hours, with something less than one cord of wood.—
It is the very thing we have so much needed in our county for a long time. With a little trouble and expense, we are able to move it from five to ten miles per day, and set it up in the heart of the timber, which saves the great burden of hauling the logs a long distance to the mill.

Yours respectfully,

Legiswith, Tennances.

The company has purchased Lund's Patent Feed Arrangement, which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the mill.

THE COMBINATION MILL, THE COMBINATION MILL, with all the recent improvements, and steam power of horses, is capable of sawing from 3,000 to 4,000 feet in hours, and is sold for \$1,650.

THE NEW YORK CIRCULAR SAW-MILL

Is manufactured only by this company. It is of superior contraction, and sold for 25 per cent, less than other mills of no greater capacity. A mill with 36 to 54-inch saw can be sold for \$450 to \$500, and with a 20-horse engine and beiler is sold for \$2,200.

Steam Engines and Boilers; Engines of from 1 to 100 horse power; Locomotive, Tabular, Flue and Cylinder Boilers furnished at greatly reduced prices from former Drawings, with plans and specifications for buildings

Drawings, with plans and specifications for buildings and machinery, furnished gratis to our customers.

Competent mechanics are sent out to put up and set in operation our machinery, when required.

We also manufacture Shingle Machines, Planing Machines, Sugar-Mills, and Machinery in general.

Special attention paid to getting up Shafting and Pullies for manufactories, and all kinds of mill-wright work.

This company are selling in great numbers a Patent Co-This company are selling in great numbers a Patent Co-nical Burr. Stone Mill. for flour, corn meal, and all kinds of feed, which is pronounced by experienced millers, both in this country and Europe, the best mill ever constructed. It will grind more grain in the same time, and with half

the power, of any mill of the same price in the market.

We also furnish other styles of Grist-Mills, when required.

J. M. EMERSON & CO., Agents,

Personal attention paid to all orders received by mail. Second-hand Pianos taken in exchange for new. Catalogues sent by mail. Great inducements offered to agents to sell the above. A liberal discount to dealers, teachers, seminaries and clergy men.

Each Instrument guaranteed to give satisfaction, or purchase-money refunded. SECOND-HAND PIANOS AT GREAT BARGAINS constantly in store; prices from \$30 to \$140. TESTIMONIALS FROM PROFESSORS AND OPINIONS

OF THE PRESS.

"The Horace Waters' Pianos are known as among the very best. We are enabled to speak of these instruments with some degree of confidence, from personal knowledge of their excellent tone and durable quality."-N. Y. Evan-

Having inspected a lage number of the Horace Waters Pianos we can speak of their merits, from personal knowledge, as being of the very best quality."—Christain Intelli-

gencer.

Nothing at the State Fair displayed greater excellence in any department than the Piano-Forte manufactured by Horace Waters, of this city.—Churchman.

The following is taken from the "Christian Inquirer": "The finest among the many pianos at the Crystal Palace are those placed there by Horace Waters, whose instru-

ments are always popular.

The following we take from the "Christian Advocate" (Memphis, Tenn.) "The Horaco Waters, Pianos are built of the best and most thoroughly seasoned material. From all we can learn of this establishment—said to be the largest in the United States—we have no doubt that buyers can do as well, perhaps better, at this than at any other house in the Union."
"Mr. Waters has been long established and is favorably

"Mr. Waters has been long established and is favorably known. We speak from experience when we assure our readers that his prices are below those usually charged for articles in his line."—Jacksonian, N. J.

"Your instruments are a sensible improvement upon American Pionos, and an honor to the skilful manufacturer. There is no doubt but they will be appreciated by the public and all admirers of true merit.—Oscar Cometlant.

The treble is clear, pure, powerful, and very melodious, the base is deep, rolling, and sonorous: the middlepart is rich, and sympathetic, and possessing the power of singing, i.e. of uniting the sound of each tone, in a degree but rarely achieved."—Henry C. Watson.

For power of tone, depthof brass, and brilliancy of treble, together with accuracy of touch, they are equal to any make I am acquainted with, and I cordially recommend them to those wishing to purchase.—V. C. Taylor.

"Our friends will find at Mr. Waters' store the very best asortment of music and of planos to be found in the United States, and we urge our southern and western

United States, and we urge our southern and western friends to give him a call whenever they go to New York."

triends to give aim a can whenever they go to tree form from the "We consider them worthy of special attention, from the resonant and exceedingly musical tone which Mr. Waters has succeeded in attaining,"—N. Y. Musical World and

"There is one which, for beauty of finish and richness "There is one which, for beauty of finish and richness and brilliancy of tone, equals, if it does not excel, anything of the kind we have even seen. It is from the establishment of Horace Waters. Being constructed of the best and most thoroughly seasoned material, and upon improved principles, it is capable of resisting the action of the climate, and of standing a long time in tune.—Savannah Republican, Savannah, Ga."

Water, vines and meladeous challenge comparison

Waters' pianos and melodeons challenge comparison with the finest made anywhere in the country."—Home C. L. Sholes, editor of the Kenocha "Tribune and Telegraph" says, "The piano was received in good order, and is pronounced an excellent instrument by good judges, the tone of it is particularly commended, as is indeed its external workmanship and finish, compared with its cost." Speaking of the Horace Waters' Pianos and Melodeons at the Crystal Palace the "New York Disptach" says:
"A number of these pianos and pedal bass organ melodeons, from their great power, and fullness and richness of attract the very general attention and commenda

tion of visitors. Waters "New Scale" is recognized by artists as not only a sensible but important improvement in planos."
The "New York Express" says: "The Horace Waters' have a majority of the Horace waters' and decidedly The "New York Express" says: "The Horace Waters' Pianos are pronounced by musical amateurs as a decidedly superior article in all the requisites of this instrument, and it is fast superseding those of other manufacturers." The "New York Evening Post" says: "The Horace Waters' Pianos are excellent as well as cheep; but he has those of other makers, as well as second-hand ones, capitally adapted to limited means."

Says the "Knoxxille (Tenn.) Standard:" "Mr. Waters has long experience in the business, and has gained a reputation unsurpassed for selling the best instruments in the country."

country.?

The "Sunny South" reaches us with the following:—
"This gentleman is one of the most extensive music-dealers in the Union. His pianos and melodeous have obtained great celebrity for their excellent tone and durable

Gaustine "Valley City Advocate." "We have taken a look at a piano which has just arrived from the celebrated establishment of Horace Waters, and must say that for tone and beauty of finish, it surpasses any we over saw Horace Waters' Piano-Fortes are of full, rich, and even

one, and nowerful.—New York Musical Review. They are fully equal to any of the kind I have seen in the United States, and far superior to those of a similar make I saw in England."—Geo. Washbourne Morgan.

"I take great pleasure in announcing them instruments of a superior quality, both in tone and touch."-August

We don't know that we ever saw better planosbetter made, of finer tone and of greater power—than we met with yesterday at the fair in the Crystal Palace. The finest among them are those placed there by Horace Waters, whose pianos are always popular."—Times and Mes

"The Horace Waters' Pianos now on exhibition at the

"The Horace Waters' Pianos now on exhibition at the Fair, have attracted a surprising degree of attention; they are unrivalled by any other instrument, in perfect quality of tone and power."—Courier.

"The Horace Waters' Pianos are among the most celebrated and improved makes of the day. For power, brilliancy and richness of tone, clasticity of touch, and beauty of finish, they will not suffer in comparison with those of any other manufacturer."—Thomas Baker.

The "State Register" contains the following: "For beauty of finish, sweetness and brilliancy of tone, they undoubtedly surpass anything of the kind ever brought before the public. They equal in tone the grand piano; and being constructed of the best and most thoroughly seasoned material, they are capable of resisting the action seasoned material, they are capable of resisting the action Says the "Evening Mirror": They (the Horace Waters'

Pianos) are very superior instruments and the maker may confidently challenge comparison with any other manufacturer in the country, as regards their outward elegance, and quality of tone and power."

§ 9. P. BRUNKER is agent for the sale of these Pianos. by 2.P. BRONGER is agent for the sale of these Pianos, for Huntingdon county. He will attend to the unpacking and putting up of them, and keeping them in tune, for a year, free of charge. He will also see that every purchaser is satisfied. They will be sold as low as any other Pianos in the United States.

Philadelphia, Oct. 14, 1857-ly. IMPROVED PATENT ASPHALTIC ROOFING FELT-A CHEAP, DURABLE AND PER-FECTLY WATERPROOF ROOFING-PRICE, THREE CENTS

WM. LEWIS, Huntingdon, Agent for Huntingdon county. This improved PATENT FELT makes a CHEAP, DURARTE and PERFICIAL WATERFROOF ROOTING, for CHURCHES, CHAPELS, PUBLIC HALLS, RAILROAD STATIONS, HOUSES, COTTAGES, VERANDARS, FARM BULDINGS, CATTLE and SHEEP SHEDS, and every other description of Buildings, in lieu of Tin, Zinc, Shingles, Tiles, Thatch, &c.

Shingles, Thes. Thatch. &c.

It costs only a fraction of a Tin or Shingle Roof and is more durable, as it neither correctes, cracks nor leaks.

It is made of the strongest and most durable materials, and saturated with the best of Asphalte.

It is made up in Rolls, 25 yards long, 32 inches wide, and can be easily applied by any unpracticed person, with few tacks.

It is invaluable for Lining the Walls of Wooden Houses, TRANARIES, BARNS, &c., as rats or other vermin and insects

IT IS IMPERVIOUS TO WET, and being a NON-CONDUCTOR, counteracts the heat of SUMMER and the cold of WINTER, equalizing the temperature within every building where

To the Agriculturist, it makes a chear and effectual Roofing, for Farm Buildings and Shids: a Covering for Corn and Hay Hicks, also a Duffinge for Sheep during snow, and in the Yard as a loose covering for Turnips and other Fodder in Winter-the use of this FELT proves a great It is suitable to every climate.

It is light and portable, being in Rolls, and not liable to

damage in transportation.

When used under Try or other Rootine, it forms a smooth body for the metal to lie tightly on, whereby the Tin wears much longer, not corroding beneath; at the same time DEADENING SOUND. Also being a NON-CONDUCTOR, it keeps the upper rooms cool in Summer, and being Water-proof, prevents the Roof from leaking. August 19, 1857.
