Poor House Affairs .- The American, Journal, Shirleysburg Herald, and Directors of the Poor, have been pitching into each other for some time. As a committee has been appointed, at the request of the Directors, to investigate the affairs of the institution, we shall await their report and give it to our readers at the earliest day.

THE PHILADELPHIA ELECTION.—The Election in Philadelphia, on the 4th inst., for Mayor and Councilmen, resulted in a severe defeat of the Democracy. Mr. VAUX for May- no doubt upon the subject. Nearly, if not or, was defeated by over four thousand majority. The Councilmen are two-thirds opposition-and this great change has been brought swered, and the citizens generally are of the about by the tyrannical course of would-be same opinion. The Times thus concludes:

We are happy to inform the commuof Dr. Cutter's Chest Expanding Suspender and Shoulder Brace, for ladies and gentle-

This is entirely a new, superior and greatly improved article, combining all the advantages of a Suspender and Shoulder Brace. It is constructed upon anatomical and physiological principles, and is highly approved by physicians and surgeons as being conducive to health and gracefulness, and is far superior to the old excruciating articles in regard to simplicity, comfort and durability. His Brace and Belt for ladies deserve particular attention, being light, elastic and easily adjusted so as to secure the under garments in a proper position, without concentrating their weight in one particular part of the body. Send your orders immediately and secure for yourself, at a very low price, one of the best inventions extant.

much lively discussion and remark, as well as no small amount of merriment at the expense of the Legislature in general and of Mr. Representative Goepp in particular .-To fairly understand the force of the "joke," it must be recollected that the new License trade in selling liquor-to take from the Courts all discretion in the granting of license-and to make it obligatory on them to grant to every applicant whose papers were in due form, without inquiry into the necessity of the house for the accommodation of of the public. The Senate demurred to this feature of the bill, and amended, so as to allow an inquiry into the necessity of the license but by the pertinacity of the House, was compelled to yield the point, and the free trade bill of the House became a law as now in force.

On Friday a number of new applicants came up before the Court of Northampton county, and were confidently pressed, upon the ground that their necessity for the accommodation of the public was not to be considered-that having complied with the forms of the law, they were entitled to their licenses as a matter of course, and that the Court could not refuse them. Gov. Reeder, however, who was adversely employed, took the ground that the Legislature were entirely mistaken as to the meaning and effect of the law they had passed-that it had no such operation as was generally ascribed to it, and that in fact, the Court was bound to inquire, as under the old law, whether the tavern proposed was necessary for the accommodation of the public, and if, in their opinion, it was not so necessary, they must reject any

"Singularly enough, the counsel for the applicants was Mr. Goepp, who was chairman for the Judiciary Committee in the nity that Mr. WM. J. GEISSINGER of this House, and has the reputation of having preplace has been appointed agent for the sale pared the bill. He is certainly an able lawyer, and a clear-headed, logical man, and yet, we are told, he was unable to meet the posiquestion in such a manner as to convey the the legal operation of a proviso in the sixth section of the new law, and also upon the argument that by the repeal of a repealing law the third section of the act of 1834 was unexpectedly revived. It is generally considered here as a capital joke upon the Legislature.'

The third section of the act of 1834, above referred to, is as follows:

"No court shall license any inn or tavern which shall not be necessary to accommodate the public and entertain strangers or travel-

Whether Gov. Reeder and the Court are right or not in their view of the law, the tables have certainly been nicely turned upon Mr. Geopp, the author of the new license law! CORRESPONDENCE OF THE GLOBE.

You are on the Wrong Road.

"Is this the right road to N-?" inquired a gentleman of a little boy, who was hastening with book in hand, to the district school. "No sir," said the lad pleasantly, happy to set the stranger in the right direction—"you should have taken the right hand road just below the last farm house you passed." The stranger thanked the lad for this information, and hastily retraced his steps in the course pointed out. When I see a young man spending his earnings at the card table and grog-shop, thus ruining his health, blasting the fond hopes of indulgent parents, disgracing friends, and destroying the noblest work of God—the human soul,— I feel like saying to him, "Sir, you are on the wrong road; and unless you retrace your steps-and that quickly too-you are forever Go back, young man go back! If you continue on in your present career, your kind father's gray hairs will be brought down with sorrow to the grave; your sainted mother, worn out with constant care and anxiety for her son, will soon rest in the peaceful tomb; your lovely sister, gathered as a beautiful flower to adorn her master's crown of rejoicing, shall no longer supplicate a throne of grace in your behalf; your boon companions will forsake you; the cold, uncharitable world will call you a poor, drivelling drunkard; tion taken by Gov. GRASSHOPPERS IN TEXAS.—The Austin Gazette of the 24th ult., states that the grasshoppers are making fearful depredations both above and below the river. They are said to be laying waste everything before them, not sparing a stalk of corn, or a blade

The Galveston News of the 27th, has the following in relation to the destruction caused by the grasshoppers in Western Texas:

A gentleman who has just returned from journey through Gonzales, Caldwell, Hays, Comal, Guadalupe, Bexar, Karnes, and De Witt counties, informs us that generally throughout these counties, the grasshoppers have destroyed the entire growing crops of corn, wheat, cotton, and all garden vegetables so that there is scarcely a green thing left. On the Cipolo, the grasshoppers were so numerous a week ago that our informant could not put his foot to the ground without treading on them.

These insects eat everything clean as they go. Our informant says he saw wheat fields on the outside of which the wheat was cut down as clean as it could have been done by a cradle, and every stalk eat up, while the balance of the fields had not been touched at all. They not only eat the corn that is above the ground, but eat everything under ground to the roots. They are now commencing to fly, and this is looked upon as a favorable omen.

THE LAND DONATION BILL.—A bill has passed the House of Representatives, at Washington, for the benefit of Agriculture and the Mechanic Arts, which grants 6,340,000 acres of public lands to be apportioned to each State in amounts equal to 20,000 acres for each Senator and Representative in Congress, to which the States are now respectively entitled. The monies derived from the sales of these lands are to be invested in United States or other stocks, yielding not less than five per centum; the monies thus invested to constitute a perpetual fund, the interest of which shall be inviolably appropriated to the endowment, support and maintenance of at least one College where the leading object shall be, without excluding other scientific or classical studies, to teach such branches of learning as are related to Agriculture and the Machanic Arts in such manner as the Legislatures of the States may prescribe, in order to promote a liberal practical education of the industrial classes in their several pursuits and professions of life. Among the conditions on which the grants are made as one that the State shall provide not less than one College within five years.

The bill has been read-twice in the Senate, and refered to the committee on public Lands. Should this bill become a law the share coming to Pennsylvania will be the proceeds of the sale of 5-10,000 acres of laed-the anual interest of which would probably be not Burning Mountain

The editor of the Pottsville Journal recently paid a visit to a natural curiosity in that cicinity, and thus gives an account of it. It is very interesting: "As is generally known, there is a vein of coal located above water level in Broad Mountain, about seven miles from this Borough, and near Heckscherville, which for twenty-one years has been on fire. The vein which contains excellent white ash coal, is some forty feet in thickness. The origin of the fire is attributed to a coupple of miners, who, having some work to perform in drift in the depth of miners, built a fire-they being cold—in the gangway. The flames destroying the prop timbers, were carried by a strong current, rappidly along the passage, and the fire communicating to the coal, all subsequent efforts to extinguish it were ineffectual. The men were cut off from escape, and were undoubtedly suffocated to death.-Their remains were never found. A few days since we ascended the moun-

tain at the spot of the fire, and were much interested in examining the affect of the fire ubon the surface. The course of it is from east to west, and where the vein is nearest the surface, the ground is for the space of several hundred feet, sunken into deep pits, and while the stones exhibit evidences of having been exposed to the action of intense heat, every vestige of vegetation has been blasted. It is a desert track in the midst of smiling fertility. The ground in some places was almost too warm for the hand to rest upon it, while steam from water heated by the inter-nal fire rose from every porc. The fire has evidently extended for several hundred yards from the place it originated, and finds vent and air to continue its progress, at the pits to which we have alluded. A score of years has passed, still it burns, and will burn until further fuel is denied the devouring ele-

Military Orders.

St. Louis, May 8 .- Major Gen. Smith has ssued elaborate orders relative to the movement of the trains and troops of the Utah

The trains are to be divided into divisions of two hundred and twenty-six wagons each. The troops will be organized into columns, each column constituting an escort of the Division general supply train. The first column, under command of Lieut. Col. Andrews, is already organized and ordered to march. The second column, under Col. Monroe, comprising the escort to the first division supplies, will march from Leavenworth on the 15th inst. The third column, under Col. May, marches on the 20th. The fourth column, under Col. Morrison, will march on the 25th. The fifth column, under Col. Sumner, marches on the 30th. The sixth column, under Major Emory, marches on the 4th of June. These columns for the present constitute the First Brigade of the Utah forces under command of Gen. Harney. Each column will be supplied with four month's provisions, which are to be replenished in passing Forts Laramie and Kearney. Gen. Smith is yet in this city—the state of his health being such as to require his remaining here a short time longer. Four companies of the Sixth Infantry left Leavenworth on the 6th inst. One company of Infantry, from Fort Riley, join them at Fort Kearney.

John Hartnett, Secretary of Utah, left here yesterday for Leavenworth.

New York City ought to be proud of her selection for law-makers. Among the If you don't believe it persons arrested on Tuesday for selling lotpolicies was a fellow named Alexander McGarren, now a member of the Board of Councilmen of the Fifth Ward. Within a short time one other member has been arrested for beating a woman in a house of prostitution, another for mauling a policemen and trying to bite his nose off; another indulged in a free fight in a theatre saloon; another pitched into a brother member in the clerk's office; another, not a great while ago, was second or bottle-holder in a prize fight; not a few have been keepers of very low grogeries; and now one turns up under arrest and held to bail as a common gambler, in an establishment patronized chiefly by the most wretched of the negro population of the Fifth Ward. Remark is needless.

ARREST AND SUICIDE OF A POISONER.-Mrs. Phobe Westlake, a widow residing in Chester, Orange co., N. Y., was arrested on May 7th, on suspicion of poisoning several persons in the village, and last night destroyed herself by taking arsenic. Before the suicide she confessed that she had administered poison at different times to a Mrs. Fielder, who died about two weeks since, very suddenly. She also confessed that she administered poison to a Mr. J. B. Tuthill, a merchant, who has recovered and is doing well. Mrs. Charles Tuthill and a Mrs. Derrick are now very unwell, with every symptom of having been poisoned; and as Mrs. Westlake had lately sent them some preserves which they had eaten, it is supposed that they were also intended by her as victims.

Dr. Hardman treats Consumption, Bronchitis, Asthma, Larryngittis and all diseases of the throat and lungs, by Medical Inhalation, lately used in the Bromton Hospital, London. The great point in the treatment of all human-maladies, is to get at the disease in the direct manner.—All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon which Inhalation is based. If the stomach is diseased we take medicine directly into the stomach is diseased we take medicine directly into the stomach. If the lungs are diseased, breathe or inhale medicated vapors directly into the lungs. Medicines are antidotes to disease and should be applied to the very seat of disease. Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct access to those intricate air cells, and tubes which lie out of reach of every other means of administering medicines. The reason that Consumption, and other diseases of the lungs, have heretofore resisted all treatment has been because they have never been approached in a direct manner by medicine. They were intended to act upon the lungs, and yet were applied to the stomach. Their action was intended to be local, and yet, they were so administered that they should only act constitutionally, expending their immediate and principal acstomach. Their action was intended to be local, and yet, they were so administered that they should only act constitutionally, expending their immediate and principal action upon the unoffending stomach, whilst the foul ulcers within the lungs were unmolested. Inhalation brings the medicine in direct contact with the disease, without the disadvantage of any violent action. Its application is so simple, that it can be employed by the youngest infant or feeblest invalid. It does not derange the stomach, or incompany the least degree with the strength convert or

terfere in the least degree with the strength, comfort, or business of the patient.
