for the Farmer.

Mr. FREAS:-The cultivation of much lightland, which otherwise might be of great value, is often rendered difficult if not almost impossible, by the tendency it exhibits to produce real sorrel. I have known whole fields to be abandoned simply in consequence of the preponderance of this pest over more valuable vegetation. Yet this is not the proper course to adopt in such an emergency. Sorrel never finds sustenance, and of course can never grow where there is lime enough in the soil. Land of this kind possesses a sweetness which is not congenial to sorrel, and if takes root, it rarely outlives the first year, and never spreads. By liming lands infested with this weed, or by overcoming their acidity by liberal applications of house ashes, they will become fertile in other productions, even though the sorrel should have monopolised them entirely. Sorrel is not wholly valueless. It may be fed profitably to sheep and horses during winter; or it may be ground, (the seed) and fed to swine. Yet no farmer will ever think of cultivating it .-When it will grow—as many contend is sometimes the case, despite all reasonable efforts to restrain it-it would be well to appropriate it to some use which will prevent, in some degree, the inevitable loss its growth involves, and for this purpose we know of none more effectual than the above.

One thing to which it may not be improper to allude is, that lands which have once produced a crop of mature sorrel seed-whether that crop be cut for hay or turned in, will not be likely to be purified "in a hurry," by any process whatever, unless it involves an entire and thorough constitutional change of the soil; which lime, and lime only, (perhaps) can completely insure. The seed of this pest is so hard, or rather the shell of it is so indurated that it will remain on, or far beneath the surface, for years, without injury. Hence lands natural to its production, when once well stocked, with it, though they may be turned out to pasture, or cultivated with the most adroit skill and assiduity, will, on being laid down again, become immediately foul.-Sorrel rarely maintains its appearance or place among cultivated grasses more than two or three seasons, but afterwards re-appears in full vigor as soon as the land is broken up.

Lands common to sorrel are, on many accounts, the most valuable for arable purposes, being light, and remarkably easy to work, and answering admirably all the purposes usually required of the more ponderous description of soils, and are almost equally productive, whether cultivated in grain, hay, or roots.
Burlington Co., N. J., April 30, 1858.

Things for the Boys to do.

It is spring now, boys, and the time is coming when a good deal of work must be done. Now some of you must take hold and work like the full grown man all day. If this is your lot, don't whimper nor complain. Be brave, and cheerful, and stick to it. It may seem hard now. But in the end, it will do you no harm, and may do you some good.

But most of you will have much time on your hands. Your work will not do as much good, as some other things that you may do. Can you guess what they are? Now we know you are good at guessing. But perhaps you might guess forty times, and miss every time. So we mention a few of these things.

You can put every tool you use back in its place, after wiping it clean and dry.

You can shut every gate, and put up every set of bars you pass through, unless you know they are to be kept open.

You can do every errand you are sent on, promptly, coming back and reporting to your parents, or employer, as soon as possible.

You can do all the chores (little jobs) entrusted to you, faithfully and well.

You can offer to do any little piece of work that some other person would do, if you did not. Such a habit will make you very popular at home and abroad.

You can clean your shoes at the door, place your hat and overcoat in their places, and be a pattern of neatness in your own room.

You can be good-natured and polite to your equals, and respectful to your superi-

This is the first lesson. When you have learned this pretty well, we will try to have another ready, which will be worth as much as this.—Ohio Farmer.

ROCK OR STONE TURNIP .- Editors Country Gentlemen-I wish to tell your numerous readers of a turnip worth raising, to wit, the Rock or Stone Turnip.

I raised from ten rods of ground, (one sixteenth of an acre,) ninety bushels, weighing sixty pounds per bushels, which I think worth as much to feed cattle, as potatoes .-I have no doubt I can raise 1,500 bushels on an acre of light, warm land, suitably enriched as for corn. I sow the seed in a bed, as for cabbage, and after my ground is well plowed and harrowed, transplant in rows eighteen inches apart, and the plants twelve inches; but I think eight inches would be better .-You will find but little trouble in keeping the weeds out till they cover the ground .-Whole cost not over six cents per bushelworth from $37\frac{1}{2}$ to 50, for the table, and will keep the year round. Sow the seed as soon as the ground is fit in the spring, and transplant when large enough. The turnip when cut is white and very sweet. Junson Wans-

WORTH, West Winsted, Connecticut.

Manure.

1. One excellent way, is to scatter them thinly over the ground, and leave the dressing to soak in the soil. This is the best mode on meadows that you do not wish to

2. They may be applied in the same way to land which you are going to plow for corn

3. Unleached ashes may be applied to corn after it is up, at the rate of a tablespoonful to a hill, partly as a manure, and partly to arrest the ravages of cut-worms.

4. It may be profitably used as a dressing for strawberry-beds in the spring. It should be applied dry, and spaded in. Strawberries love an application of this sort.

5. They may, when concealed, be strewn over crops when growing. Such as grapes, or oats, or other grain. They should be scat-

6. They may be scattered with the seed of vinter grain, and will often thus be of great

7. They form an excellent dressing for lands, to be used for fruit trees. They contain so much of what is needed for the growth of trees, that a generous application of ashes, plowed in deep, will be beneficial. Trees already set out, may be helped by spading, in ashes sparingly about their roots.

8. Applied to clay soil, they soften it .-Used on sandy soil, they harden it. Scattered on sour land, they correct its acidity .-They are quite generally useful .- Ohio Far-

THE CUT WORM.—Some twelve years ago, we first printed, from the personal statement of a No. 1 farmer of Delaware county, the beneficial results to his crop of corn from an addition, at the usual time of "plastering," of twenty five per cent. of salt-that is to say, to three pecks of plaster he added one peck of salt-apply in the same proportion as is customary with the pure plaster-about a tablespoonful to a hill-taking care, however, that the mixture does not come in contact with the corn, or it may destroy it. The salt is not only found to be a sure protection adainst the cut worm, but greatly increases the vigor of the plant.

153. Remittances must, in all cases, be made direct to the Publishers, for at these prices no commission can be allowed to agents. Address, LEONARD SCOTT & CO., December 30, 1857. No. 54 Gold street, New York. THE NEW YORK STEAM SAW-

MILL AND MACHINE COMPANY,
CAPITAL, TWO HUNDRED AND FIFTY THOUSAND
DOLLARS.
This company has been organized with the above capital
for the purpose of supplying the demand for the
COMBINATION PORTABLE STEAM SAW-MILL,
and other inproved washingty. and other improved machinery.

They have purchased the entire machinery business heretofore carried on by J. M. Emerson & Co., also the Mont-

The Combination Saw-Mill was patented October, 1856, The Combination Saw-Mill was patented October, 1856, and is now generally acknowledged to be the cheapest, and most practical, and efficient lumber manufacturing machine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufacturers in preference to all other mills.

The following letter expresses the general opinion of those who are using the Combination Mill:

MESSIS. EMERISON & CO.—Gentlemen: I have tried the saw-mill nurchased of you, and will say that it performs

MESSES. EMERSON & Co.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little finger, which was much more than sufficient to supply the boiler. We are able to cut 3,000 feet of beautiful lumber in 12 hours, with something less than one cord of wood.—It is the very thing we have so much needed in our county for a long time. With a little trouble and expense, we are able to move it from five to ten miles nor day, and set it we for a long time. With a little trouble and expense, we are able to move it from five to ten miles per day, and set it up in the heart of the timber, which saves the great burden of hauling the logs a long distance to the mill.

Yours respectfully,

JESE KERR, Jr.,

Louisville Taunessee

Jesse Kerr, Jr., Louisville, Tennesse The company has purchased Lund's Patent Feed Arrangement, which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the mill.

THE COMBINATION MILL, with all the recent improvements, and steam power of 15 horses, is capable of sawing from 3,000 to 4,000 feet in 12 hours, and is sold for \$1,650.

THE NEW YORK CIRCULAR SAW-MILL

Is manufactured only by this company. It is of superior contruction, and sold for 25 per cent. less than other mills of no greater capacity. A mill with 36 to 54-inch saw can be sold for \$450 to \$500, and with a 20-horse engine and boiler is sold for \$2.200.

Steam Engines and Boilers; Engines of from I to 100 horse power; Locomotive, Tabular, Flue and Cylinder Boilers furnished at greatly reduced prices from former quotations.'
Drawings, with plans and specifications for buildings and machinery, furnished gratis to our customers.
Competent mechanics are sent out to put up and set in operation our machinery, when required.
We also manufacture Shingle Machines, Planing Machines, Sugar-Mills, and Machinery in general.
Special attention paid to getting up Shafting and Pullies for manufactories, and all kinds of mill-wright work.
This commany are selling in great numbers a Patent Commany of the selection of th This company are selling in great numbers a Patent Conical Burr. Stone Mill, for flour, corn meal, and all kinds of feed, which is pronounced by experienced millers, both in this country and Europe, the best mill ever constructed. It will grind more grain in the same time, and with half the payer, of any mill of the same time, and with half

the power, of any mill of the same price in the market.

We also furnish other styles of Grist-Mills, when requied. J. M. EMERSON & CO., Agents, Jan. 13, 1858. No. 371 Broadway, New York. THE CASSVILLE SEMINARY. M. McN. WALSH. Principal.

MPROVED PATENT ASPHALTIC ROOFING FELT-A CHEAP, DURABLE AND PER FECTLY WATERPROOF ROOFING-PRICE, THREE CENTS

PER SQUARE FOOT.

WM. LEWIS. Hunlingdon, Agent for Huntingdon county.
This improved Patent Felt makes a Cheap, Durable and
Perfectly Waterproof Roofing, for Churches, Chapels,
Public Halls, Railroad Stations, Houses, Cottages, VerAnnahs, Farm Buildings, Cattle and Sineer Sheds, and
every other description of Buildings, in lieu of Tin, Zinc,
Shingles Tiles Thatch, &c. Shingles, Tiles, Thatch, &c.

It costs only a fraction of a Tin or Shingle Roof and is more durable, as it neither connodes, cracks nor leaks.

It is made of the strongest and most durable materials, and saturated with the best of Asphalte.

It is made up in Rolls, 25 yards long, 32 inches wide, and can be easily applied by any unpracticed person, with few tacks.
It is invaluable for Lining the Walls of Wooden Houses, Franaries, Barns, &c., as rats or other vermin and insects

In Is Impervious to wet, and being a non-conductor ounteracts the heat of Summer and the cold of Winter counteracts the heat of SUMER and the cold of WINTER, equalizing the temperature within every building where To the Agriculturist, it makes a cheap and effectual To the Agriculturist, it makes a CHEAP and EFFECTUAL ROOFING, for FARM BUILDINGS and SUEDS; a COVERING for CORN and HAY HIGKS, also a DEFENCE for Sheep during snow, and in the Yard as a loose covering for Turnips and other Fodder in Winter—the use of this FELT proves a great

vill not touch it.

annual saving to the Farmer.

It is suitable to every climate.

It is light and portable, being in Rolls, and not liable to age in transportation. When used under Tin or other Roofing, it forms a smooth body for the metal to lie tightly on, whereby the Tin wears much longer, not corroding beneath; at the same time peadenting sound. Also being a non-conductor, it keeps the UPPER ROOMS COOL in Summer, and being WATER-PROOF, prevents the Roof from LEAKING.

August 19, 1857. REATEST DISCOVERY OF THE IMPORTANT TO TOBACCO CHEWERS!! DR. GUSTAV LINNARD'S
Taste Restorative Troches, the Great Substitute for Tobacco.

It is a well known and incontrovertable fact that the us of Tobacco is the promoting cause of many of the most severe MENTAL AND PHYSICAL DISORDERS to which the vere MENTAL AND PHYSICAL DISOLULES to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain narcotic and poisonous properties most dangerous in their effects, which by entering into the blood derange the functions and operations of the Heart, causing many to suppose that organ to be seriously deceased.

TOBACCO affects also the entire nervous system, manifesting itself—as all who have used the noxious weed will bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dyspepsia, and many other disorders of a similar

maracter.
THE TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved com-pletely successful in a multitude of cases, and wherever used. Being harmless in themselves they exert a benefiused. Reing harmless in themselves they exert a beneficial effect upon the entire system, restoring the taste which has become vitiated or destroyed by great indulgence, completely removing the irritation and accompanying tickling sensation of the Throat—which are always consequent upon abstaining from the use of Tobacco, and by giving a healthy tone to the Stomach, invigorate the whole system. Persons who are irretrievably undermining their constitutions and shortening their lives, should use these Troches immediately and throw off the injurious and unpleasant habit of Tobacco Chewing. pleasant habit of Tobacco Chewing.

These Troches or Lozenges are put up in a convenient and opticable form at the low price of 50 Cents per Box.—A liberal discount to the Trade.

Prepared solely by the undersigned to whom all orders should be addressed. JAMES E. BROWN, Druggist, Cor. 2d and Race Sts., Phila.
