## Agricultural.

A Valuable Recipe --- First-rate White-

The editor of the American Agriculturist says he has tried various preparations for white-washing ceilings, and the walls of unprepared rooms, but has never found anything that was entirely satisfactory until the der to allow you to lift and carry it by such present spring. He has now something that projection. This is your main hive, in which affords a beautiful, clear, white color, which the bees are to make their brood combs and cannot be rubbed off, and which he prepares rear their young. Upon the top of this box in this wise:

worth of the first quality of 'Paris White'-33 pounds at three cents per pound—and for of the thinnest kind to be found. Make this quantity one pound of white glue, of the them 12 inches by 6, and 6 or 7 inches high. best quality, usually called Cooper's glue, In one end a pane of glass should be inserted because manufactured by Peter Cooper, of in a groove made to receive it. This glass is because manufactured by Peter Cooper, of New York. Retail price 50 cents per pound.

For one day's work, half a pound of glue was put in a fin vessel, and covered with cold water over night. In the morning this in a groove made to receive it. This glass is necessary in order to sell your honey in the fall to good advantage. In the bottom of each box, bore three inch holes, and the same number in the top of your hive, to correstant in the act of beattiful lumber in 12 hours, with something less than one cord of wood.—

It is the very thing we have so much needed in our county for a long time. With a little trouble and expense, we are also to cut 3,000 feet of beattiful lumber in 12 hours, with something less than one cord of wood.—

It is cold water over night. In the morning this number in the top of your hive, to corresthis was carefully heated until dissolved, pond in position, when the supers are adjuswhen it was added to sixteen pounds of the ted to their places. The outer cap should Paris White, previously stirred in a moder- be made of pine boards like the lower secate quantity of hot water. Enough water was then added to give the whole a proper milky consistency, when it was applied with a brush in the ordinary manner. Our thirty
ordinary manner. Our thirty
ont out to allow the top box to set down a lite.

THE NEW YORK CIRCULAR SAW-MILD

Is manufactured only by this company. It is of superior contraction, and sold for 25 per cent. less than other mills of no greater capacity. A mill with 36 to 54 inch saw can be sold for \$450 to \$500, and with a 20-horse engine and three pounds of Paris White and one pound | cut out to allow the top box to set down a litof glue sufficed for two ceilings, and the walls | the below the surface, or the rains would be and ceilings of seven other small rooms.

lime wash, while the white is far more bril- can be properly made without the aid of a liant than lime. Indeed the color is nearly joiner, or by some one familiar with the use of equal to that of 'Zinc White,' which costs at tools, and having the necessary tools to do least four times as much. We are satisfied, good work. In the lower section of such a by repeated trials, that no white-wash can be hive, two wooden rods should be placed crossmade to adhere firmly without glue, or some | wise, and diagonally from corner to corner in kind of sizing, and this will invariably be the middle of each. By using two such rods, colored in time, with the caustic lime. The the bees may build their combs in any direc-Paris White, on the contrary, is simply pure washed chalk, and is entirely inert, producing no caustic effect on the sizing. Any of our readers who try this, and are as well pleased with it as we are, will consider the information worth many times the cost of an entire volume of the Agriculturist. Had we known of it when we first 'set up housekeeping,' it would have saved us much labor, and the annoyance of garments often soiled by contact with white-wash-not to mention the saving of candles, secured by always having the ceiling white enough to reflect instead of absorbing the rays of light."

Value of Buckwheat.

A late issue of Hunt's Merchants' Magazine, in an article upon buckwheat, thus speaks of it concerning its properties as an edible:-"Considering the good qualities of buckwheat, it is probably less appreciated than any other bread grain. Writers on agricultural products seem to eschew it as food for man, and regard it only as a mischievous adulteration of wheat flour, or as a product of poor soil for cattle. It is of a totally different family of plants from the cereals, and will flourish on sandy hill-sides which are barren for other grain. It is probably the most easily cultivated, and the cheapest bread grain in the world. It is extensively cultivated, in Belgium and some parts of France, where it forms the basis of food for the inhabitants. Though its properties are very different from wheat, it is, nevertheless, quite as rich in all important compounds, and in extremely cold weather, it is more substantial than wheat. It is, however, less digestible, and apt to disagree with weak stomachs, or persons unaccustomed to it. By analysis, buckwheat is second to wheat in gluten, but deficient in starch. By the addition of oneproved."

The Artificial Manure Question.

At a meeting of the Oxford Farmers' Club. on Wednesday, Jan. 14, the following resolution, proposed by Mr. Mein, and seconded by Mr. Cloggins, was carried unanimously; "that this Club considers the use of artificial manure as still too much limited; that Peruvian guano, as standard, is the best topdressing for corn-crops; farm-yard manure, guano, nitrate of soda, and bone dust for grass land; that mixed manures are the best for root crops; and that without a liberal use of artificial manure the present extent of land in this country could not be kept in cultivation, as there is nothing that has tended more to assist high farming than the introduction of artificial manure: and, finally, that this Club does not consider that the decay of the root crop is attributable to the lavish application of manures." At the same meeting, Mr. Thompson, of Culham, was reelected Chairman of the Club for the ensuing year .- Farmer's (Eng.) Magazine.

Insects.-Professor Asa Fitch says, in his new contributions to the Transactions in the New York Agricultural Society, "I sometimes think there is no kind of mischief going on in the world of nature around us, but that some insect is at the bottom of it.-Certain it is that these little creatures, seemingly so insignificant and powerless as to be unworthy of a moment's notice from anybody but the curious, occupy a most important rank in the scale of creation, and on every side of us their performances are producing most important results, tending probably in an equal degree to our benefit in one direction, as to our detriment in another." It is impossible to over-estimate the value of these contributions to science, when we reflect that it is computed that all the species of insects taken together which exist in nature, | frequently to crack off. The sows themselves

A Cheap Bee-Hive.

A correspondent writes to know how to make cheap bee-hives, with caps on the top, to contain the surplus honey. The size for this latitude should be one foot square inside and fourteen inches deep—made of inch pine boards, unplaned. Put on a roof or cover to project a little on each side of the hive, in order to allow the allow to allow the life and the root to ganization are prepared to furnish machinery of all kinds down to allow to allow the life at any life and some the top, to contain the surplus honey. The size for the purpose of supplying the demand for the COMBINATION PORTABLE STEAM SAW-MILL, and other improved machinery. They have purchased the entire machinery business here to the purpose of supplying the demand for the COMBINATION PORTABLE STEAM SAW-MILL, and other improved machinery.

Emerson & Co., also the Montgania with the experience and facilities combined in its or ganization are prepared to furnish machinery of all kinds and other improved machinery. make chean bee-hives, with caps on the top, your boxes for surplus honey are to be placed, "We procured at a paint store, a dollar's called supers or caps. These caps may be made of thin boards-clapboards, for instance, tion of the hive, and if the roof of this projects over on each side a litte it will be found apt to beat under to the injury of the bees A single coat is equal to a double coat of on some occasions. No good common hive tion, and they will find bars running transversely to which they may attach their The foregoing is about all the description

that we can give of such a hive, without being very minute in the details. From a long experience, we have ascertained that bees in any latitude north of the city of New York, require about 2,000 cubic inches of space in their main hive; in warmer latitudes from 1,700 to 1,800 cubic inches will do very well. Common unplaned hives like the above, should be white-washed to protect them, or if the boards be planed, they may be painted white, and they will be beautiful hives if well made.-Rural American.

The Cut Worm.

In wet seasons, like the present, this worm is most destructive. It appears to flourish best while the weather is wet and cool, the first hot days putting an end to its operations. A writer in the American Agriculturist says it is produced from eggs deposited about the roots of grass, close to the ground, by an ash colored moth or miller. They are hatched by the first warm weather of Spring and of May, when they generally change to the fly form. The same writer explains why the best Greceries, call on DAVID GROVE, Portstown.

For the best Greceries, call on DAVID GROVE, Portstown. rapidly increase in size until about the end worm is often so destructive upon land which For Queensware, Glassware, &c., call on DAVID GROVE, Portstown. has been twice plowed. He says the early For Salt, Fish, &c., &c., call at the Cheap Store of DAVID GROVE, Portstown. fluence of the warm air. The second plowing turns them up again and they are readily hatched.

West Huntington, May 5, 1858.

TO PREVENT Sows FROM KILLING THEIR young, a new remedy has sprung up, which is said to be entirely effectual. It is neither more nor less than to give the sow, in her mess, about half a pint of rum or gin, which produces intoxication, and while in this confourth quantity of oat, or Indian meal to dition the young pigs find their lacteal supbuckwheat flour, the bread is very much im- | ply of food. When the late unnatural mother comes to rights again, and finds her progeny busy helping themselves, she looks upon them with a mother's affection, and the utmost kindliness of disposition follows .-This is surely an easy remedy to try, and if it shall prove to be all that is said of it, it may be regarded as about the best use to which rum can be put .- Germantown Tele-

BLOWING UP STUMPS.—Select a solid place in a large root, near the ground, of an oak or any stump with a tap root, and with an inch and-a-quarter augur, bore in, slanting downward, to as near the heart of the base of the root as you can judge; then put in a charge of one or two ounces of powder, with a safety fuse, and tamp in dry clay or ordinary ty fuse, and tamp in dry clay or ordinary tamping material, to fill the hole, some six inches above the charges they tough fire to inches above the charge; then touch fire to in an unobjectionable style. the fuse, and get out of the way. If and make it hop right out of the ground. If
the charge is put too high up, the blast will
only split the top of the stump without lifting
the Olic Collins of the stump without lifting it .- Ohio Cultivator.

Common turnips may be sown from the middle of July to the middle of August. We prefer the last week in July, if the weather is not too dry. Almost every farmer has patches of rich low ground, where the young corn has been destroyed by the wet weather of the past month, and such ground is generally well suited for turnips, if well plowed and pulverized. Or what is better still, clear up a piece of new ground, where free from grass and weeds, and after plowing or well harrowing, sow the seed at the rate of one pound to the acre, and cover with a brush

Buckwheat Bran is said to be injurious to nursing sows. It causes the skin of the latter to crack all over, and the cars and tails do not fall short of four hundred thousand! | dry up, and the pigs are apt to die.

THE NEW YORK STEAM SAW-MILL AND MACHINE COMPANY, CAPITAL, TWO HUNDRED AND FIFTY THOUSAND

at more liberal rates, than has ever been offered at any

ganization are prepared to jurnish machinery of all kinds at more liberal rates, than has ever been offered at any other establishment.

The Combination Saw-Mill was patented October, 1856, and is now generally acknowledged to be the cheapest, and most practical, and efficient lumber manufacturing machine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufacturers in preference to all other mills.

The following letter expresses the general opinion of those who are using the Combination Mill:

MESSAS. FMERSON & CO.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little finger, which was much more than sufficient to supply the boiler. We are able to cut 3,000 feet of beautiful lumber We are able to cut 3.000 feet of beautiful lumber

Yours respectfully, JESSE KERR, Jr.,
Louisville, Tennessee.
The company has purchased Lund's Patent Feed Arrangement, which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the mill.

THE COMBINATION MILL,

with all the recent improvements, and steam power of 15 horses, is capable of sawing from 3,000 to 4,000 feet in 12 hours, and is sold for \$1,650.

THE NEW YORK CIRCULAR SAW-MILL

boiler is sold for \$2,200. boiler is sold for \$3,200.

Steam Engines and Boilers; Engines of from 1 to 100 horse power; Locomotive, Tabular, Flue and Cylinder Boilers furnished at greatly reduced prices from former Orange, with plans and specifications for buildings and machinery, furnished gratis to our customers.

Competent mechanics are sent out to put up and set in

operation our machinery, when required.

We also manufacture Shingle Machines, Planing Machines, Sugar-Mills, and Machinery in general.

Special attention paid to getting up Shafting and Pullies for manufactories, and all kinds of mill-wright work. for manufactories, and all kinds of mill-wright work.

This company are selling in great numbers a Patent Conical Burr.Stone Mill, for flour, corn meal, and all kinds of feed, which is pronounced by experienced millers, both in this country and Europe, the best mill ever constructed. It will grind more grain in the same time, and with half the power, of any mill of the same price in the market.

We also furnish other styles of Grist-Mills, when required.

Pianos we can speak of their merits, from personal knowledge, as being of the very best quality."—Christain Intelli

geneer.

Nothing at the State Fair displayed greater excellence in any department than the Piano-Forte manufactured by Horace Waters, of this city.—Churchman.

The following is taken from the "Christian Inquirer": "The finest among the many pianos at the Crystal Palace are those placed there by Horace Waters, whose instru-ments are always popular.

The following we take from the "Christian Advocate"

(Memphis, Tenn.) "The Horace Waters, Pianos are built of the best and most thoroughly seasoned material. From all we can learn of this establishment—said to be the largest in the United States—we have no doubt that buyers can do as well, perhaps better, at this than at any other house in the Union."

can do as well, perhaps better, at this than at any other house in the Union."

"Mr. Waters has been long established and is favorably known. We speak from experience when we assure our readers that his prices are below those usually charged for articles in his line."—Jacksonian, X. J.

"Your instruments are a sensible improvement upon American Pionos, and an honor to theskilful manufacturer. There is no doubt but they will be appreciated by the public and all admirers of true merit.—Oscar Comettant.

The treble is clear, pure, powerful, and very melodious, the base is deep, rolling, and sonorous: the middlepart is rich, and sympathetic, and possessing the power of singing, i.e. of uniting the sound of each tone, in a degree but rarely achieved."—Henry C. Watson.

For power of tone, depthof brass, and brilliancy of treble, together with accuracy of touch, they are equal to any make I am acquainted with, and I cordially recommend them to those wishing to purchase.—I. C. Taylor.

"Our friends will find at Mr. Waters' store the very best asortment of music and of pianos to be found in the

pest asortment of music and of pianos to be found in th United States, and we urge our southern and western friends to give him a call whenever they go to New York."
—Graham's Magazine.
"We consider them worthy of special attention, from the

resonant and exceedingly musical tone which Mr. Waters has succeeded in attaining."—N. Y. Musical World and "There is one which, for beauty of finish and richness and brilliancy of tone, equals, if it does not excel, any-thing of the kind we have even seen. It is from the establishment of Horace Waters. Being constructed of the best and most thoroughly seasoned material, and upon improved principles, it is capable of resisting the action of the climate, and of standing a long time in tune.—Savannah Republican, Savannah, Ga."
Waters' pianos and melodeons challenge comparison with the finest made anywhere in the country."—Home

Journal.
C. L. Sholes, editor of the Kenocha "Tribune and Tele-C. L. Sholes, editor of the Kenocha "Tribune and Telegraph" says, "The piano was received in good order, and is pronounced an excellent instrument by good judges, the tone of it is particularly commended, as is indeed its external workmanship and finish, compared with its cost." Speaking of the Horace Waters' Pianos and Melodeous at the Crystal Palace the "New York Disptach" says:—
"A number of these pianos and pedal bass organ melodeous, from their great power, and fullness and richness of tone, attract the very general attention and commendation of visitors. Waters' "New Scale" is recognized by artists as not only a sensible but important improvement rtists as not only a sensible but important improvement

The "New York Express" says: "The Horace Waters' The "New York Express" says: "The Horace Waters' Pianos are pronounced by musical amateurs as a decidedly superior article in all the requisites of this instrument, and it is fast superseding those of other manufacturers."

The "New York Evening Post" says: "The Horace Waters' Pianos are excellent as well as cheap; but he has those of other makers, as well as second-hand ones, capitally adapted to limited means."

Says the "Knoxville (Tenn.) Standard;" "Mr. Waters has long expressed in the husiness and has coined a green has long experience in the business, and has gained a repu-tation unsurpassed for selling the best instruments in the

country."

The "Sunny South" reaches us with the following:— "This gentleman is one of the most extensive music-dealers in the Union. His pianos and melodeons have obtained great celebrity for their excellent tone and durable Says the "Valley City Advocate:" "We have taken a look at a piano which has just arrived from the celebrated establishment of Horace Waters, and must say that for tone and beauty of finish, it surpasses any we ever saw

Horace Waters' Piano-Fortes are of full, rich, and even one, and powerful.—New York Musical Review.
"They are fully equal to any of the kind I have seen in "They are unly equal to any of the kind I have seen in the United States, and far superior to those of a similar make I saw in England."—Geo. Washbourne Morgan.

"I take great pleasure in announcing them instruments of a superior quality, both in tone and touch."—August

We don't know that we ever saw better pianos-pianos better made, of finer tone and of greater power—than we met with yesterday at the fair in the Crystal Palace. The finest among them are those placed there by Horace Waters, whose pianos are always popular."—Times and Mes-

nger.
"The Horace Waters' Pianos now on exhibition at the Fair, have attracted a surprising degree of attention; they are unrivalled by any other instrument, in perfect quality of tone and power."—Courier.

"The Horace Waters' Planos are among the most celebrated and improved makes of the day. For power, brilliancy and richness of tone, elasticity of touch, and beauty of finish, they will not suffer in comparison with

those of any other manufacturer."—Thomas Baker.

The "State Register" contains the following: "For beauty of finish, sweetness and brilliancy of tone, they undoubtedly surpass anything of the kind ever brought before the public. They equal in tone the grand piano; and being constructed of the best and most thoroughly seasoned material, they are capable of resisting the action Says the "Evening Mirror": They (the Horace Waters

Says the "Evening Mirror": They (the Horace Waters' Pianos) are very superior instruments and the maker may confidently challenge comparison with any other manufacturer in the country, as regards their outward elegance, and quality of tone and power."

20 P. BRUNKER is agent for the sale of these Pianos, for Huntingdon county. He will attend to the unpacking and putting up of them, and keeping them in tune, for a year, free of charge. He will also see that every purchaser is satisfied. They will be sold as low as any other Pianos in the United States.

JOHN FRISCH.

Huntingdon, Oct. 1, 1856. TREATEST DISCOVERY OF THE

IMPORTANT TO TOBACCO CHEWERS!! DR. GUSTAV LINNARD'S
Tuste Restorative Troches, the Great Substitute for Tobacco. It is a well known and incontrovertable fact that the use

of Tobacco is the promoting cause of many of the most severe MENTAL AND PHYSICAL DISORDERS to which the vere MENTAL AND PHYSICAL DISORDERS to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain narcotic and poisonous properties most dangerous in their effects, which by entering into the blood derange the functions and operations of the Heart, causing many to suppose that organ to be seriously deceased.

TOBACCO affects also the entire nervous system, manifesting itself—as all who have used the nextons reced will festing itself-as all who have used the noxion bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dyspepsia, and many other disorders of a similar

THE TASTE RESTORATIVE TROCHES are designed to THE TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved completely successful in a multifude of cases, and wherever used. Being harmless in themselves they exert a beneficial effect upon the entire system, restoring the taste which has become vitiated or destroyed by great indulgence, completely removing the irritation and accompanying tickling sensation of the Throat—which are always consequent upon abstaining from the use of Tobacco, and by giving a healthy-tone to the Stomach, invigorate the whole system. Persons who are irretrievably undermining their constitutions and shortening their lives, should use these Troches immediately and throw off the injurious and unpleasant habit of Tobacco Chewing.

These Troches or Lozenges are put up in a convenient and portable form at the low price of 50 Cents per Box.—A liberal discount to the Trade.

Prepared solely by the undersigned to whom all orders Prepared solely by the undersigned to whom all orders should be addressed.
