New Mode of Grafting. [From the Country Gentleman.]

An eccentric ingenious friend of mine, claims to have discovered a new mode of grafting fruit, which he says he has thoroughly and successfully tested, and with the best results. If this is really so, it ought to be of two dollars for each and every offence. made public, and, if it cannot be successfulby fruit culturists, many of whom will I hope after reading this, try it at once. As I know the gentleman who communicated this to me, will not write it out for you or any one else, facia evidence to convict under this Act. I take the liberty "to steal some of his thunder" for the public good. He says that last spring (a year ago now,) he cut some scions of pears and other fruit very late in the season, after the buds had become very much swelled, grafts, on account of other and more pressmode of grafting than the old-fashioned cleftgrafting, although he had no very strong hopes that the grafts would live, and was in fact, very indifferent whether they did or not. His mode was simply this :-Instead of cutting off a limb and making a cleft, he took any desired limb that was large enough to admit of it, and made a gush into it with his knife, downwards and diagonally to the grain of the wood, at about the angle that a limb would naturally grow, not deep enough to weaken the limb too much ; indeed, the limb must be large enough to admit of a gash or cut deep enough to let the scion in, so as to secure it firmly. The limb, before the scion is inserted, looks as though it had received a light blow with a sharp hatchet, at about the angle that a man would naturally strike with a hatchet. The gash must be smooth, and the bark smoothly cut-not mangled. He then shaved off the lower end of the scion, as in cleft-grafting, and inserted in this gash up to the bark of the scion, so that when done, the bark of the scion and the bark of the grafted limb met evenly on both sides of the scion. All that remained to do, was to put wax in the angles made by the scion with the limb, and on each side of the scion into the gash. To his great surprise, the majority of his scions so grafted lived, and are now thrifty, although hastily and earlessly set.-This year he has improved on his method, by using a sharp three-eighth or one-quarter inch (or even in some cases one-half inch,) "firmer chisel" which he drives into the limb, or even into the trunk of a tree when not too Agreements, Leases, Judgment and Promissory Notes, or even into the trunk of a tree when not toomaking a gash.

He has grafted a great deal this spring in this way, and he says with unusual success. In this way he has grafted into the trunks of young thrifty trees that were four and Job work of all kinds-such as Handbills. Circulars even six inches in diameter, and he says more beeds. Mortgages, and all kinds of blanks, &c., &c., &c. of his grafts live than any that he ever grafted in any other way. His large experience and practical skill in this line, entitle his opinions to the respect which it duces me to write you on the subject. He points out the following decided advantages of this over the clef.-grafting. time. Limbs can be made to grow in any desired place or posture on the tree. Economy of wax, and above all, greater certainty by far that grafts will live.

TTHE NEW YORK STEAM SAW-

THE NEW YORK STEAM SAW-MILL AND MACHINE COMPANY, CAPITAL, TWO HUNDRED AND FIFTY THOUSAND DOLLARS. This company has been organized with the above capital for the purpose of supplying the demand for the COMBINATION PORTABLE STEAM SAW-MILL, and other improved machinery. They have purchased the entire machinery business here-tofore carried on by J. M. Emerson & Co., also the Mont-gomery Works at Yonkers, on the Hudson, near this city, and with the experience and facilities combined in its or-ganization are prepared to furnish machinery of all kinds at more liberal rates, than has ever been offered at any other establishment. The Combination Saw-Mill was patented October, 1856, and is now generally acknowledged to be the cheapest, and most practical, and efficient lumber manufacturing ma-chine in the world. A number of them are in successful

most practical, and efficient hunder manufacturing ma-chine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufactu-rers in preference to all other mills. The following letter expresses the general opinion of those who are using the Combination Mill: MESSNS, EMERSON & Co.—Gentlemen: I have tried the even mill numbered of you and will say that it northerms

MESSES, EMERSON & Co.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my liftle finger, which was much more than sufficient to supply the boiler. We are able to cut 3,000 feet of beautiful lumber in 12 hours, with something less than one cord of wood.— It is the very thing we have so much needed in our county for a long time. With a liftle trouble and expense, we are able to move it from five to ten miles per day, and set it up in the heart of the timber, which saves the great burden of hauling the logs a long distance to the mill. Yours respectfully, JESSE KEER, Jr.,

JESSE KERR, Jr., Yours respectfully,

The company has purchased Lund's Patent Feed Ar-rangement, which is illustrated and described in the Scien-tific American for October 24. This adds greatly to the fliciency of the mill.

THE COMBINATION MILL,

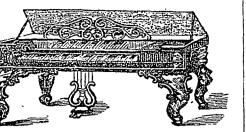

with all the recent improvements, and steam power of 15 horses, is capable of sawing from 3,000 to 4,000 feet in 12

Boilers furnished at greatly reduced prices from former quotations.
Drawings, with plans and specifications for buildings and machinery, furnished grafts to our customers.
Competent mechanics are sent out top nut up and set in operation our machinery, when required.
We also manufacture Shingle Machines, Planing Machines, Sugar-Mills, and Machinery in general.
Special attention paid to getting up Shafting and Pullies for manufactories, and all kinds of mill-wright work.
This company are selling in great numbers a Patent Conical Burr.Stone Mill, for flour, cora meal, and all kinds of feel, which is pronounced by experienced millers, both in this country and Europe, the best nill ever constructed.
It will grind more grain in the same time, and with half the power, of any mill of the same price in the market.
We also furnish other styles of Grist-Mills, when required.

vere MENTAL AND PHYSICAL DISORDERS to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain nurcotic and poisonous properties most dangerous in their effects, which by entering into the blood derango the functions and operations of the Heart, causing many to suppose that organ to be seriously deceased. TOBACCO affects also the entire nervous system, mani-festing itself—as all who have used the noxious weed will bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dynepsia, and many othor disorders of a similar

Brash. Dyspepsia, and many other disorders of a similar character. THE TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved com-pletely successful in a multitude of cases, and wherever used. Being harmless in themselves they exert a benefi-cial effect upon the entire system, restoring the taste which has become vitilated or destroyed by great infulgence, com-pletely removing the irritation and accompanying tickling sensation of the Threat—which are always consequent upon abstaining from the use of Tobacco, and by giving a healthy tone to the Stomach, invigorate the whole system. Persons who are irretrievably undermining their com-stitutions and shortening their lives, should use these Troches immediately and threw off the injurious and un-pleasant habit of Tobacco Chewing. These Troches or Lozenges are put up in a convenient and portable form at the low price of 50 Cents per Box.— A liberal discount to the Trade.
