## For the Farmer.

A Few Notions of Breeding Horses. There is an obvious connection between the eternal vital organs of horses and their external forms. For instance, good lungs broad and deep chest, giving room for the heart and lungs to perform their functions.— A round, hooped barrel shows that the animal posesses a full capacious punch, affording room for the materials from which the blood is provided, and indicating a tendency to easy fattening. A large pelvis in the female is an almost certain indication of good reproductive organs; large bones are evidence of hard keepers, and the farmer's object should be to lessen the bony structure, and strive after a close, snug, solid, not too

large, but well covered skeleton. The strength

of animals depends far more upon the devel-

opment of the muscular system than upon

the mass of bones. This fact should have

full weight in the selection of horses for

breeding. Animals of any kind, which have

poor keeping while young, have their heavy

structure disproportionately developed. I am of the opinion that too little attention has been paid to the proper selection of males. I would have the horse smaller than the mare, than otherwise. The practice of putting large males to small females, will destroy any race of animals, if persisted in. A large male begets a large fectus, and this a small female can neither accommodate, nor duly support before or after birth. Let the horse be of a medium size, a hard, compact animal—and let the female be rather above this point, for them; and the progeny will continue to improve rather than degenerate. A stallion, above all other male breeding animals, should have compactness; he should be multem in parco indeed. It may not be possible to find a male of any race which is perfect—those must be chosen which have the fewest defects. Especially should the breeder avoid male animals which do not possess the good qualities of form which he wishes to transmit to the offspring. No reasonable man certainly would unite animals which show similar defects. Great size and weight are not always an improvement. Locality and climate must be taken into consideration in deciding upon what race or breed of horses we shall propagate. In cold latitudes, a hardy race, not over nice in its food, will be found most profitable. A refined, delicate constitution will soon degenerate in such situations. Therefore, I prefer a horse not too large, and as old observers say, one with as much grey or white as possible, especially about the head. A horse with white feet and white hoofs will not do as much service as one with dark hoofs, because the white hoofs are more liable to break. Such horses

Stock that can be Raised on an Hundred Acres.

pondent Southern Farmer.

will require to be shod all the time. -- Corres-

In the Journal of the Royal Agricultural Society we find a very interesting article on the stock that can be kept profitable on an hundred acre farm. "Good treatment, and skilful culture," it is stated, will enable a farmer gradually to double the number of animals previously fed upon the same ground. If this is so how materially it will increase the farmers profits, particularly at this time, when meat is about the only thing the farmer raises that sells at a high price. This change, it is very truly stated, must be made gradually. Make a bold effort, by raising roots, or

corn for fodder, or both, to provide an extra quantity of food. This will increase the quantity of manure, and the next season, with this extra manure, it will be easy still further to increase the food, which will admit the land can be brought to the highest state of culture, and made to support a very large amount of stock. Of the ability of the soil to maintain a large amount of stock, several examples are given,—we select but one. Mr. Littledale, of Seacombe, maintains 83 milch cows of the large Yorkshire breed, and 15 farm horses, on 104 acres. The author, the Rev. W. H. Beevor, says that while three acres of Italian rye-grass has furnished the entire summer food of six horses and five work oxen, besides furnishing a bite for the cows, twice a day, when they were brought to be milked; in the same neighborhood, on different soil or different culture, four acres is often required to furnish feed for a cow.—No general rule can, therefore, be given to the Yorker.

How to Manage a Rearing Horse.
Whenever you perceive a horse's inclination to rear, separate your reins and prepare for him. The instant he is about to rise, slacken one hand, and bend or twist his head with the other, keeping your hands low.—This bending compels him to move a hind leg, and of a necessity brings his fore feet down. Instantly twist him completely round, two or three times, which will confuse him very much, and completely throw him off his guard. The moment you have finished twisting that two or three times, which will confuse him very much, and completely throw him off his guard. The moment you have finished twisting that the order of the consection of the large of the disease and effecting a large of the disease and effecting a large of the disease of the large of the disease of the large for hoor of the large of the disease and effecting a large of the disease and effecting a large of the disease of the large for him. The instant he is about to rise, slacken one hand, and bend or twist his lead in the direction you wish to proceed, apply the spins and preventive of the preventive of the large for him. The instant he is about to rise, slacken one hand, and bend or twist his lead in the direction you wish to proceed, apply the spins and process of two of another addition of the stock. In this way the land can be brought to the highest state

and apply the whip and spurs two or three times severely. The horse will not, perhaps, be quite satisfied with the defeat, but may feel disposed to try again for the mastery.— Should this be the ease, you have only to twist him etc., as before, and you will find that in the second struggle he will be more easily subdued than on the former occasion; in fact, you will see him quail under the operation. It rarely happens that a rearing horse, after having been treated in the way described, will resort to this trick a third time.—British Sportsman.

## The Housekeeper.

them frequently; then add brown sugar in them frequently; then add brown sugar in the proportion of one pound of sugar to one pound of fruit; boil for half an hour after a timere liberal rates, than has ever been offered at any and constitutional vigor are indicated by a the proportion of one pound of sugar to one the sugar is in; skim it and pour it into earthenware jars; when cold, paper up the jars, and set aside in a dry cool situation .-Strawberry and black current jams are made in precisely the same manner as the abave: but instead of brown use lump sugar.

How to Dry Cherries .- Take the stems and stones from ripe cherries; spread them on flat dishes, and dry them in the hot sun or warm oven; pour whatever juice may have run from them, a little at a time, over them; stir them about, that they may dry evenly. When they are perfectly dry, line boxes or jars with white paper, and pack them close in layers; strew a little brown sugar, and fold the paper over, and keep them in a dry

To PRESERVE GOOSEBERRIES .- Take fullgrown gooseberries before they are ripe, pick them, and put them into wide-mouthed bottles: cork them gently with new, soft corks, and put them in an oven from which the and put them in an oven from which the be sold for \$450 to \$500, and with a 20-horse engine and boiler is sold for \$2,200.

Steam Engines and Boilers; Engines of from 1 to 100 horse power: Locomotive, Tabular. Flue and Cylinder Boilers furnished at greatly reduced prices from former them out and beat the corks in tight; cut them off level with the bottle, and rosin them down close. Keep them in a dry place.

RASPBERRY JAM.—Pass the raspberries through a fine sieve to extract their seeds; add to them their weight in fine, white sugar, and boil them, stirring them over the fire until you can just see the bottom of the stew-pan.

It is stated that ten thousand dollars are spent daily in New York for straw-

BEAUTIFUL HEAD OF RICH GLOSSY HAIR. COMPLETELY PRESERVED TO THE GREATEST AGE.—And who that is gray would not have it restored to former color: or bald, but would have the growth restored, or troubled with dandruff and itching but would have it removed, or troubled with scrofor with sick headache, (neuralgia) but would be cured, or with sick headache, (neuralgia) but would be cured.—
It will also remove all pimples from the face and skin.—
Prof. Wood's Hair Restorative will do all this, see circular and the following:

ANN Arror. November 6, 1856,
Prof. O. J. Wood—Dear Sir: I have heard much said
of the wonderful effects of your Hair Restorative, but having been so often cheated by quackery and quack nostrums, hair dyes, &c., I was disposed to place your Restorative in the same category with the thousand and one
loudly trumpeted quack remedies, until I met you in
Lawrence county some months since, when you gave me
such assurance as induced the trial of your Restorative in
my family—first by my good wife, whose hair had become
very thin and entirely white, and before exhausting one
of your large bottles, her hair was restored nearly to its
original brown color, and had thickened and become beautiful and glossy upon, and entirely over the head; she ANN ARBOR, November 6, 1856. original brown color, and had thickened and become beau-tiful and glossy upon, and entirely over the head; she continues to use it, not simply because of its beautifying effects upon the hair, but because of its healthful influence upon the head and mind. Others of my family and friends are using your Restorative, with the happiest effects; therefore, my scepticism and doubts in reference to its character and value are entirely removed; and I can and do most cordially and confidently recommend its use by all who would have their hair restored from white or gray the research of sightness or age to engined advanced to may all who would have their Bair restored from white or gray (by reason of sickness or age.) to original color and beauty, and by all young persons who would have their hair beautiful and glossy.

Very truly and gratefully yours.

SOLOMON MANN.

FREAD WOOD: It was a long time after I saw you at Blissfield before I got the bottle of Restorative for which you gave me an order upon your agent in Detroit, and you gave me an order upon your agent in Detroit, and when I got it we concluded to try it on Mrs. Mann's hair, as the surest test of its power. It has done all that you assured me it would do; and others of my family and friends, having witnessed its effects, are now using and recommending its uso to others as entitled to the highest consideration you claim for it.

Again, very respectfully and truly, yours, SOLOMON MANN.

CVELVE, ILL., June 28, 1852, I have used Prof. O. J. Wood's Hair Restorative, and have admired its wonderful effects. My hair was becom-ing, as I thought, prematurely gray, but by the use of his Restorative it has resumed its original color, and I have

Restorative it has resumed no doubt, permanently so.

TETHE LIVER INVIGORATOR! PREPARED BY DR. SANFORD.—Compounded entirely from GUMS is one of the best purgative and Liver medicines now before the public, that acts as a Cathartic, easier, milder, and more effectual than any other medicine known. It is not only a Cothartic but a Liver remedy, acting first on the Liver to eject its morbid matter, then on the lowels and stomach to carry off that matter; thus accomplishing two purposes effectually, without any of the painful feeling experienced in the operations of most Catharties. It strengthens the system at the same time that it purges it; and when taken daily in moderate doses will strengthen and build it up with unusual rapidity.

We take pleasure in recommending this medicine as a preventive for FEVER AND AGES, CHILL FEVER, and all FEVERS of a BLEIOUS TYPE. It operates with certainty, and thousands are willing to testify to its wonderful virtues. All who use it are giving their unanimous testimony in its

favor.

#27 Mix water in the mouth with the Invigorator and swallow both together.

The Liver Invigorator is a Scientific Medical Discovery, and is daily working cures, almost too great to believe.—
It cures as if by magic, even the first dose giving benefit, and seldom more than one bottle is required to cure any kind of LIVER Complaint, from the worst Jaconice or Dyspersia to a common Headache, all of which are the results of a DISEASED LIVER.

PRICE ONE BOLLAR A BOTTLE

PRICE, ONE DOLLAR A BOTTLE.

THE NEW YORK STEAM SAW-

Gooseberries, thoroughly ripe. Boil them by themselves for twenty minutes, skimming them frequently; then add brown sugar in

ganization are prepared to furnish machinery of all kinds at more liberal rates, than has ever been offered at any other establishment.

The Combination Saw-Mill was patented October, 1856, and is now generally acknowledged to be the cheapest, and most practical, and efficient lumber manufacturing machine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufacturers in preference to all other mills.

The following letter expresses the general opinion of those who are using the Combination Mill:

MESSUS, EMERSON & Co.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little finger, which was much more than sufficient to supply the boiler. We are able to cut 3,000 feet of beautiful lumber in 12 hours, with something less than one cord of wood.—It is the very thing we have so much needed in our county for a long time. With a little trouble and expense, we are able to move it from five to ten miles per day, and set it up in the heart of the timber, which saves the great burden of hauling the logs a long distance to the mill.

Yours respectfully,

Louisville, Tennessee.

The company has purchased Lund's Patent Feed Arrangement, which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the nill.

THE COMBINATION MILL,

with all the recent improvements, and stema power of 15

THE COMBINATION MILL.

with all the recent improvements, and steam power of 15 horses, is capable of sawing from 3,000 to 4,000 feet in 12 hours, and is sold for \$1.650.

THE NEW YORK CIRCULAR SAW-MILL

Is manufactured only by this company. It is of superior contruction, and sold for 25 per cent, less than other mills of no greater capacity. A mill with 36 to 54-inch saw can be sold for \$450 to \$500, and with a 20-horse engine and below in add for \$2.200.

Boilers' furnished at greatly reduced prices from former quotations.

Drawings, with plans and specifications for buildings and machinery, furnished gratis to our customers.

Competent mechanics are sent out to put up and set in operation our machinery, when required.

We also manufacture Shingle Machines, Planing Machines, Sugar-Mills, and Machinery in general.

Special attention paid to getting up Shafting and Pullies for manufactories, and all kinds of mill-wright work.

This company are selling in great numbers a Patent Conical Burr-Stone Mill, for flour, corn meal, and all kinds of feed, which is pronounced by experienced millers, both in

nical Burr.Stone Mill, for flour, corn meal, and all kinds of feed, which is pronounced by experienced millers, both in this country and Europe, the best mill ever constructed. It will grind more grain in the same time, and with halr the power, of any mill of the same price in the market. We also furnish other styles of Grist-Mills, when required.

J. M. EMERSON & CO., Agents, Jan. 12, 1858.

THE HUNTINGDON FOUNDRY IN BLAST AGAIN!—The subscribers take this method informing their friends and the public generally, that of informing their friends and the public generally, that
they have rebuilt the Huntingdon Foundry, and are now in successful operation,
and are prepared to furnish Castings of
every description, of best quality and
workmanship, on short notice, and on
reasonable terms. Farmers are invited to call and examine our Ploughs. We are manufacturing the HunterPlough: Tilis plough took the first premium at the Huntergroundry Agricultural Fair last fall. Also, Hunter's
celebrated Cutter Ploughs, which can't be beat—together
with the Keystone, Hillside and Bar-shear ploughs. We
have on hand and are manufacturing Stoves—such as
Cook, Parlor, and Office stoves for wood or coat. Hollow
ware, consisting of Kettles, Boilers, Skillets, &c., all of
which we will sell cheap for cash or in exchange for country produce. Old metal taken for custings. By a strict
attention to business, and a desire to please, we hope to receive a liberal share of public patronage.

J. M. CUNNINGHAM & BRO.

Huntingdon, April 30, 1856.

RANKLIN HOUSE, Huntingdon,
Pa. J. S. MILLER. PROPERTY.

Respectfully informs his friends and the travelling public generally, that he has leased the 'Franklin House,' for several years occupied by C. Conts. and that he will be pleased to receive the calls of all who may favor him with their patronage. His table will be furnished with the best the market affords, and every attention will be given to make those who stop with him feel at home. Huntingdon, April S. 1857.

CPECIAL NOTICE.—LOVE & Mc-PECIAL NOTICE.—LOVE & McDIVITT would respectfully inform their numerous
customers and the public generally that, notwithstandings
the "pressure of the times," they still continue to deab
out, at their old stand in Market Square, all kinds of Groceries, Confectionanies, Fruits, Tobacco, Segars of every
grade from Half Spanish to the genuine Principe. La National, &c., &c., at greatly reduced prices. Having learned
from past experience, that the credit system is a daugerous
one to all parties, we have determined to reduce our business to cash or its equivalent, and shall be able to sell on
the most reasonable terms, as our stock has been purchased at the lowest cash prices. Call and see us, friends,
LOVE & McDIVITT.

Huntingdon, Dec. 16, 1857.

Huntingdon. Dec. 16, 1857.

ATCHES, CLOCKS, AND
JEWELRY. The subscriber, thankful to
his friends and patrons, and to the public generally, for their patronage, still continues to carry on at the
same stand, one door east of Mr. C. Conts' Hotel, Market
street, Huntingdon, where he will attend to all who will
favor him with their custom; and also keeps on hand a
good assortment of Watches, Clocks, Jewelry, &c., &c., all
of which he is determined to sell at low prices. Clocks,
Watches and Jewelry of all kinds will be repaired at short
notice, and having made arrangements with a good workman, all repairs will be done in a neat and durable manner,
and any person having articles for repairing, shall have
them done at the promised time. By paying strict attention to business, and selling at low prices, he hopes to receive a share of public patronage. tion to business, and sening across process, ceive a share of public patronage.

JOSEPH REIGGER.

ALL LINE from Mount Union to CHAMBERSBURG. The undersigned still contin-ues to run a tri-weekly line of stages over the road between Mount Union and Chambersburg. Good horses and comfortable stages have been placed on the route, and experi-cinced and trusty drivers will superintend the running of the Coaches. The proprietor of the line is desirous that it be maintained, and he therefore earnestly calls upon the public generally to patronise it, confident that it will be for their mutual advantage. Every attention necessary will be given, and the running of the stages will be regu-lar.

rr. "我到Stages leave Mt. Union at 5 o'clock, p. m., every Tuesday, Thursday and Saturday—returning on Mondays, Wednesdays and Fridays; arriving at Mount Union in tim- for the cars. Stages stop at Shirleysburg, Orbisonia, Shade Gap, Burnt Cabins, Fannetsburg, Horse Valley, Strasburg, and Keefer's store, † 9. Fare through \$3,00; to intermediate points in pro

August 22, 1855-tf.

TIME HUNTINGDON MILL.—The undersigned owners of the Huntingdon Mill inform the farmers and the public generally that they now have their new mill in running order, with all the modern improvements in the Water Wheels and Machinery.

They have put in five of the Improved Jouval Turbine Water Wheels, and can grind in all stages of water, and during the coldest weather any and all kinds of grain.

They are prepared to sell, and have on hand for side at all times at Market rates all kinds of Flour, Feed, and Stuffs; and Farmers can have their own grain ground and take it back in a return bad, or they can be the inside, in take it back in a return load, or they can be furnished in exchange at a moment's notice, an equal quantity of Flour and Bran, or chopped feed.

Their smut machine is of improved manufacture, and

Their shuit machine is of improved manufacture, and they will insure a "a fall turn out" of superior quality to every bushel of grain left at their mill.

FISHER & MeMURTRIF,

The public generally are requested to call and examine

The public generally and for themselves.

Repairing of Watches, Clocks, and Jewelry, done in the best manner on short notice.

JOHN FRISCH.

Huntingdon, Oct. 1, 1856. TREATEST DISCOVERY OF THE AGE.

IMPORTANT TO TOBACCO CHEWERS!! DR. GUSTAV LINNARU'S
Tuste Restorative Troches, the Great Substitute

for Tobacco. It is a well known and incontrovertable fact that the use It is a well known and incontrovertable fact that the use of Tolsacco is the promoting cause of many of the most severe MENTAL AND PHYSICAL DISORDERS to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain narcotic and poisonous properties most dangerous in their effects, which by entering into the blood derange the functions and operations of the Heart, causing many to suppose that organ to be seriously deceased.

TOBACCO affects also the entire nervous system, manifesting itself—as all who have used the provious weed will

festing itself—as all who have used the noxious weed will bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dyspepsia, and many other disorders of a similar marcter.
THE TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved com-pletely successful in a multitude of cases, and wherever used. Being harmless in themselves they exert a benefi-cial effect upon the entire system restoring the taste which cial effect upon the entire system, restoring the taste which has become vitiated or destroyed by great indulgence, completely removing the irritation and accompanying tickling sensation of the Throat—which are always consequent upon abstaining from the use of Tobacco, and by giving a healthy tone to the Stomach, invigorate the whole system. Persons who are irretrievably undermining their constitutions and shortening their lives, should use these Troches immediately and throw off the injurious and unpleasant habit of Tobacco Chewing.

These Troches or Lozenges are put up in a convenient and portable form at the low price of 50 Cents per Box.—A liberal discount to the Trade.

Prepared solely by the undersigned to whom all orders should be addressed.

JAMES E. BROWN, Druggist.
